To whom it may concern:

For the purpose of conforming with FCC and ISED Installation Requirements and RF Exposure Requirements, the JADAK Bluetooth Module, Part Number 1803-0180, is only installed in one of our PRI brand host instruments at our facility in Syracuse, New York. This module is custom designed for our instruments and, as such, uses a unique connector and pinout that only works with our host instruments. Additionally, this module is not sold to customers.

Steven Bryant

Senior Engineer, JADAK
