Modular Approval Request

FCC ID: 2AAXW2400RM2

The following attestation addresses the requirements to support modular approval:

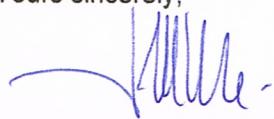

Modular approval requirement	Yes (provide brief statement)	No *
(a) The radio elements must have the radio frequency circuitry shielded. Physical components and tuning capacitor(s) may be located external to the shield, but must be on the module assembly	RF components are shielded.	
(b) The module must have buffered modulation/data inputs to ensure that the device will comply with Part 15 requirements with any type of input signal	The RF Module contains an onboard processor with buffered I/O.	
(c) The module must contain power supply regulation on the module	The radio module contains an onboard power supply permitting operation from +7 to 40VDC max.	
(d) The module must contain a permanently attached antenna, or contain a unique antenna connector, and be marketed and operated only with specific antenna(s), per Sections 15.203, 15.204(b), 15.204(c), 15.212(a), 2.929(b)	The module is intended to be used only in the manufacturers product line. It will not be sold commercially as a stand alone unit. In addition, the end products are designed for industrial applications and are professionally installed.	
(e) The module must demonstrate compliance in a stand-alone configuration	The module has been tested to demonstrate compliance in a stand alone configuration	
(f) The module must be labelled with its permanently affixed FCC ID label, or use an electronic display (See KDB Publication 784748 about labelling requirements)	The unit has a permanently installed label.	
(g) The module must comply with all specific rules applicable to the transmitter. The grantee must provide comprehensive instructions to explain compliance requirements	<p>The module has been tested to comply with applicable regulations.</p> <ol style="list-style-type: none"> 1. Radio components are shielded 2. Has buffered data inputs 3. Has on board power supply regulation 4. Operates with specific antenna(s) 5. has been tested to comply in stand-alone configuration 	

	6. Module has permanently affixed FCC ID label 7. Module has been tested to comply with SAR regulations	
--	--	--

Modular approval requirement	Yes (provide brief statement)	No *
(h) The module must comply with RF exposure requirements	The unit complies with exposure requirements.	

* Please provide a detailed explanation if the answer is "No."

Yours sincerely,

Name Jeffrey Yee
