### Specifications

Model	K61WS
Working frequency	2.4Ghz
Support system	WinXP / Win7 / Win8/ Win10 / Android
Work distance	≤10M
Battery capacity	1000MAh
Charge	3~4 hours ;
Duration of use	about 1080 hours
working voltage / current	5V , ≤10MA
Net weight	0.58KG
Size(L*H*W)	292*101.5*38.5MM

### FCC Warnning:

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following

### measures

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

### Caution

- Any changes or modifications to this device not explicitly approved by manufacturer could void your authority to operate this equipment.
- This device complies with part 15 of the FCC Rules. Operation is subject to the following two

### conditions

(1)This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.
