FCC ID: 2AB6OTX1605

Product Name: TX-1605-5 and TX-1605-1

Attn: Director of Certification

**Explanation of Dual Model Transmitters.**

Transmitter model numbers TX-1605-1 and TX-1605-5 use a single PCB with identical components, identical antennas, firmware, and Tuning and Testing procedures. The difference between the two transmitter models is seen in the figures below. Figure 1 is the TX-1605-5 which allows a user to page up to 5 different pager numbers or send 5 different pre-programmed messages to 1 pager number or various combinations thereof. Figure 2 is the TX-1605-1 which only allow a single button to page a single pager number with a single message.

Offering two keypad versions for the same transmitter gives our customers a choice in how they prefer to implement they're paging application.

Regards,

A handwritten signature in black ink that reads "Mike Williams". The signature is written in a cursive, slightly slanted style.
