User manual

FCC STATEMENT

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/ TV technician for help.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

- 1) This device may not cause harmful interference.
- 2) This device must accept any interference received, including interference that may cause undesired operation.

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE:

1. THE MANUFACTURER IS NOT RESPONSIBLE FOR ANY RADIO OR TV INTERFERENCE CAUSED BY UNAUTHORIZED MODIFICATIONS TO THIS EQUIPMENT. SUCH MODIFICATIONS COULD VOID THE USER'S AUTHORITY TO OPERATE THE EQUIPMENT.
2. The antenna(s) used for this transmitter must not be co-located or operating in conjunction with any other antenna or transmitter.
This device complies with FCC radiation exposure limits set forth for an uncontrolled environment. In order to avoid the possibility of exceeding the FCC radio frequency exposure limits, human proximity to the antenna shall not be less than 20cm (8inches) during normal operation.

FCC RF Radiation Exposure Statement

This equipment complies with FCC RF radiation exposure limits set forth for an uncontrolled environment. This device and its antenna must not be co-located or operating in conjunction with any other antenna or transmitter.

“To comply with FCC RF exposure compliance requirements, this grant is applicable to only Mobile Configurations. The antennas used for this transmitter must be installed to provide a separation distance of at least 20 cm from all persons and must not be co-located or operating in conjunction with any other antenna or transmitter.”

CE Mark Warning

This is a class B product. In a domestic environment, this product may cause radio interference, in which case the user may be required to take adequate measures.

Product introduction

1. Product interface introduction

Dashboard: Show the current status information about the N2QF .

Wizard: Configure your N2QF F quickly and work it.

Network: Configure Local Network IP, Subnet Mask, etc., and enable DHCP Server.

Wireless: Setup Wireless Settings on your N2QF .

System: Important settings for related information with hardware.

2. Product function brief

There are 3 operation Modes, AP Bridge Mode, Client Bridge Mode, and WDS Mode can be selected

Operation Mode

| | |
|--------------------|---|
| AP Bridge Mode | ▼ |
| WDS Mode | |
| AP Bridge Mode | |
| Client Bridge Mode | |

※AP Bridge Mode: The AP Mode is the most commonly and widely used mode of operation. Let mobile devices such as smart phones, tablets, etc. access Internet.

※Client Bridge Mode: In Client Mode, the N2QF F is receive other wireless signals; the unlimited device only be used by connecting to the N2QF .

※WDS Mode: Provides service operate in one of three modes; WDS AP Mode, WDS Client Mode, or WDS Repeater Mode. Please refer to the detailed instructions in section 4-2.

Operation Mode

| | |
|----------|---|
| WDS Mode | ▼ |
|----------|---|

WDS Mode

| | |
|-------------------|---|
| WDS AP Mode | ▼ |
| WDS AP Mode | |
| WDS Client Mode | |
| WDS Repeater Mode | |

- 1) WDS AP Mode: WDS AP Mode is an access point, but it only work on other WDS Mode
- 2) WDS Client Mode: WDS Client, in which WDS APs communicate with WDS Client to access them

- 3) WDS Repeater Mode: WDS repeater, in which WDS Aps communicate with each other and with WDS Client. And extend the original wireless signal.

How to Apply N2QF

3. How to Install N2QF Device

- 1) Connect the PC in PoE LAN port or normal LAN port of N2QF .
- 2) Connect the power to N2QF .

4. How to Configure N2QF

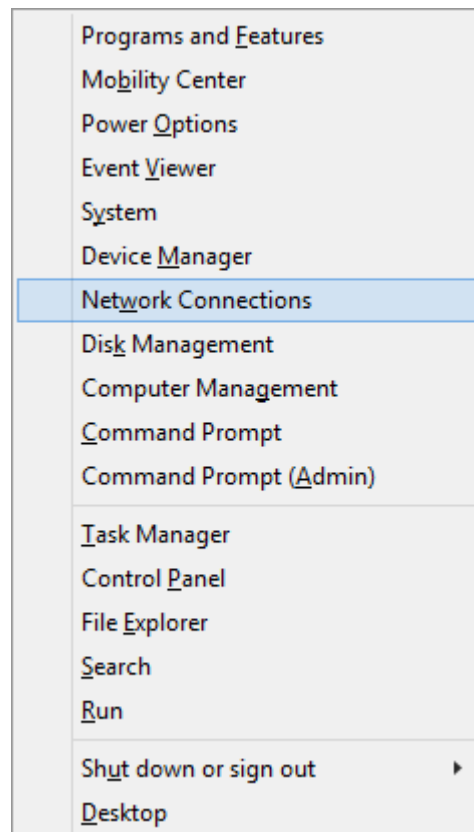

4-1. How to Setup your PC

Follow the steps below to configure in Windows OS.

- 1) Press on the **Windows Key** and **X** on your Keyboard.

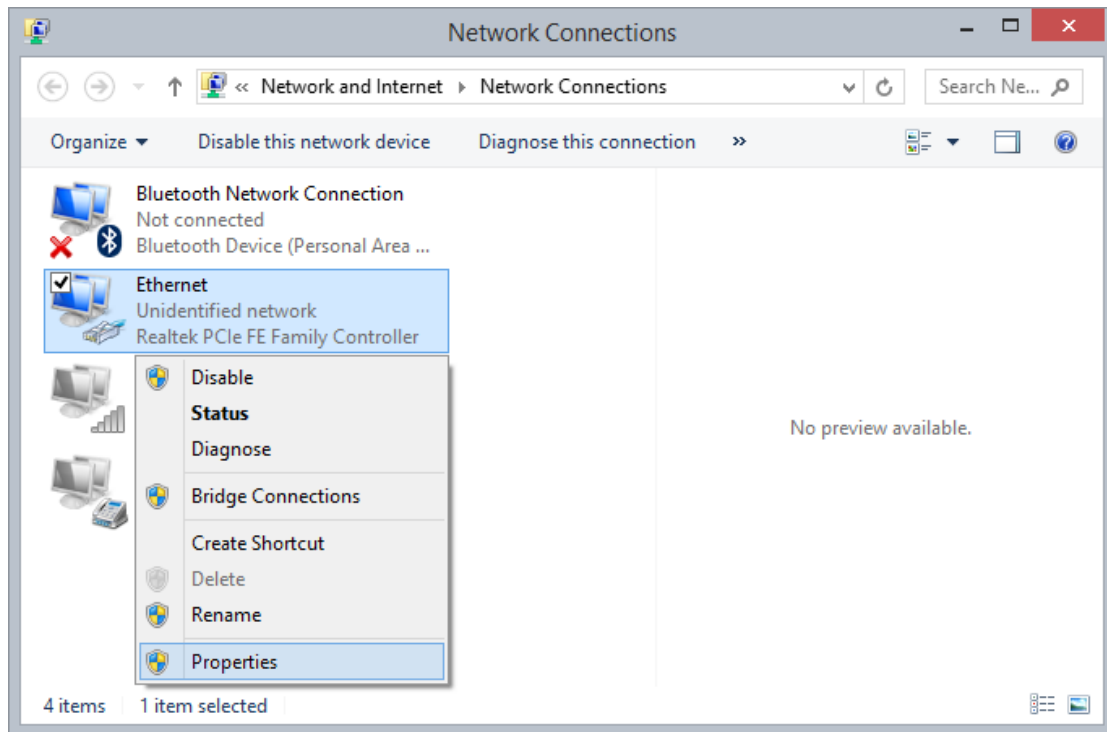

- 2) On the menu that appears and click **Network Connections**.

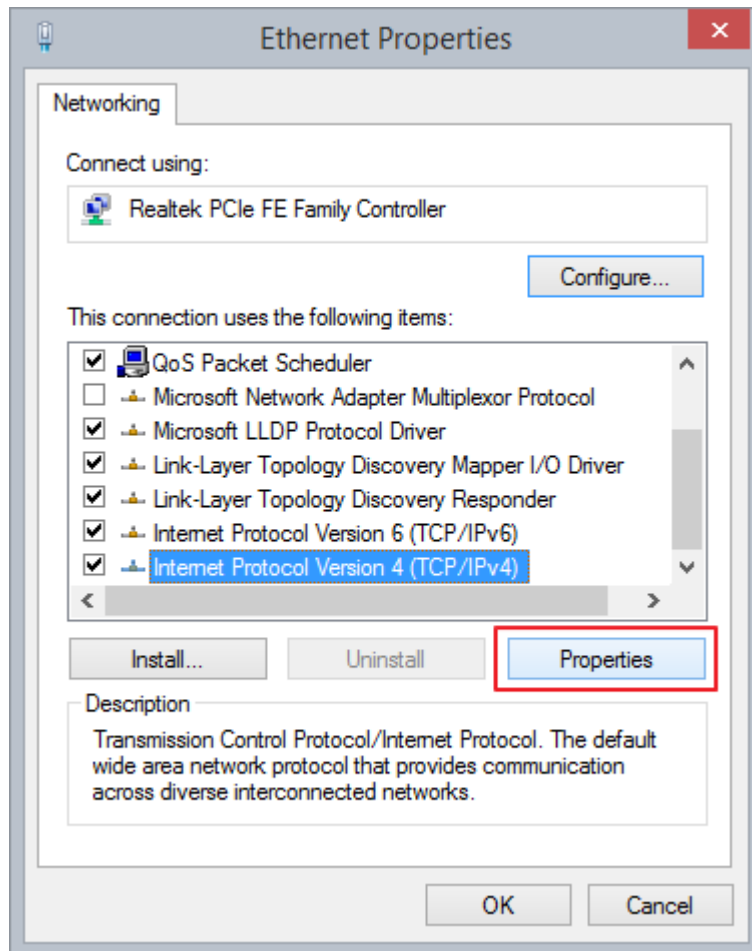

- 3) On the Network Connections screen; Right click on Local Area Connection and click **Properties** (if your Windows OS is **Windows 10**, click **Change adapter settings**)

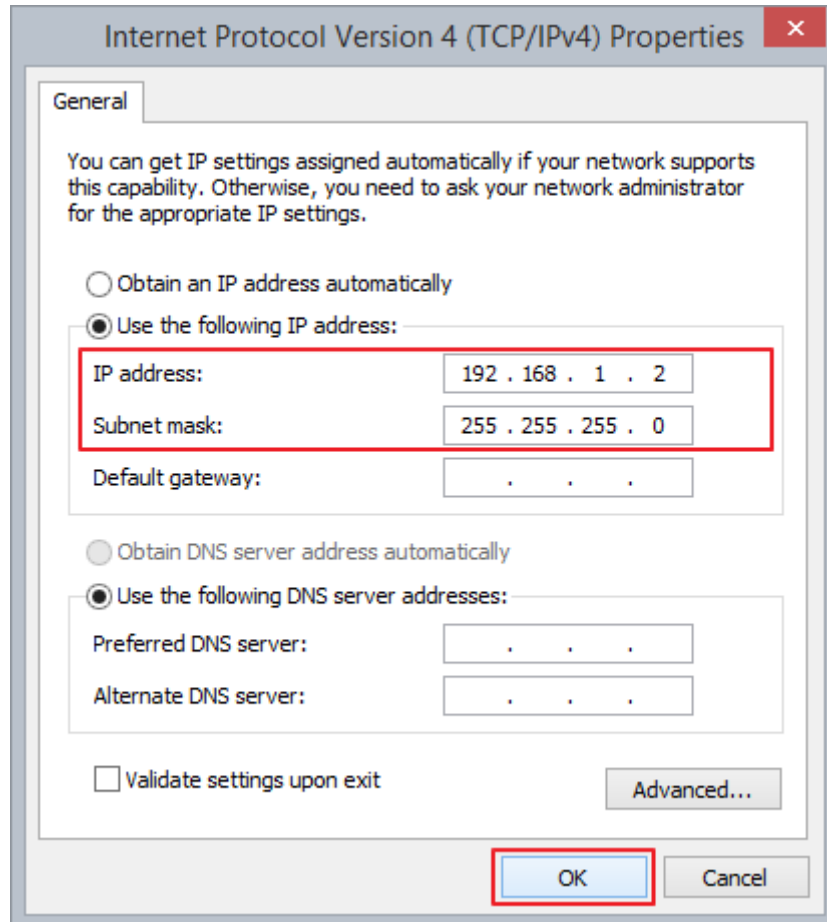

first and follow up the step)

4) Click Internet Protocol Version 4 (TCP/IP) then click Properties

- 5) Set your PC's IP address manually to 192.168.1.2. And set Subnet mask to 255.255.255.0 (or other address in the same subnet).

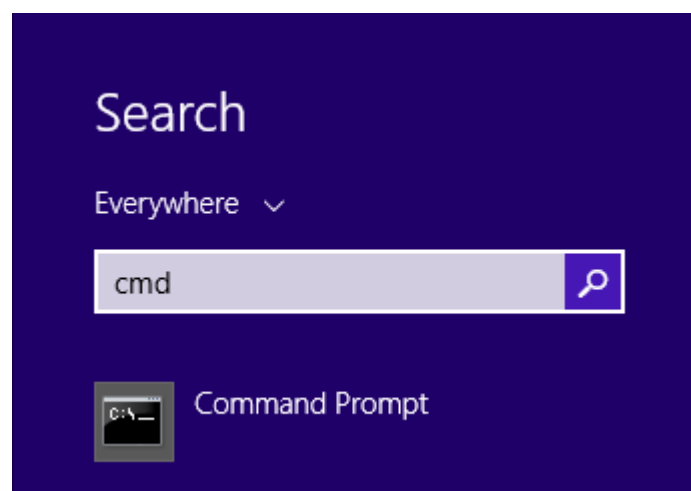

6) Click OK to save and apply your settings.

Now, you can run the Ping command in the command prompt.

7) Click on **Search Icon**; Typing cmd and click on the **Command Prompt Icon**.

8) On the Command Prompt screen; Typing "**ping 192.168.1.1**"

If the result is similar to the one shown below, it means the connection success. If the result is not similar to the one shown below, back to set PC's address steps.

```
Administrator: Command Prompt
Microsoft Windows [Version 6.3.9600]

```

9) After connect success, open a web-browser and type in the default address <http://192.168.1.1> in the address of the browser.

10) A login window will display, and enter the default password "admin" to login.

The image shows a login interface for ALFA NETWORK. At the top, the logo "ALFA NETWORK" is displayed in a bold, black, sans-serif font. Below the logo, the title "Access Point Login" is centered in a large, grey, sans-serif font. Underneath the title, a prompt reads "Please enter your username and password." in a smaller, grey font. There are two input fields: the first is for the username, containing the text "root", and the second is for the password, containing the text "Password". Both fields have a small icon on the right side (a person icon for the username field and a lock icon for the password field). Below the input fields is a blue button with the text "Login" and a right-pointing arrow icon.

4-2. N2QF 's Function Settings

Please follow the teaching steps to configure.

- 1) Open Wizard Settings by clicking on **Wizard** on the left control menu.
