Owner's Manual

Heart Rate Chest Strap

For safe use and product knowledge, please
completely read this Product Owner's Manual. v. 1.0

Technical Specifications

Battery type : CR2032

Operating temperature : 0-50 °C / 32-122 °F

Precautions

- If you have allergic reaction or skin irritation when you are using the sensor, stop using it and consult the doctor.
- With moisture and abrasion, black printing on the surface of sensor might come off and stain your clothes if it is light-colored.
- If you use perfume or insect repellent on your skin, please ensure that it does not get in contact with the heart rate sensor.

Warranty

The heart rate sensor has one-year warranty from the date you purchase it.

- The warranty does not cover the battery, damage due to misuse, abuse, accidents or non-compliance with the precautions; improper maintenance and elastic strap.
- The warranty does not cover any damage, losses, costs or expenses, directly or indirectly related to the product.
- Items purchased second-handed are not covered within warranty, unless otherwise stipulated by local law.

Warranty of product will be provided only for the first authorized sales in the initial country.

This product comes with the following limited warranty valid in North America and the United Kingdom. If you are outside of these areas, please contact your local distributor for warranty information or visit to our website www.LifeSpanFitness.com.

Registration

Should you need to process a warranty claim make sure you retain your purchase receipt to verify the date of purchase and register your LifeSpan product online. To complete the

registration go to www.LifeSpanFitness.com and select "Product Registration".

Technical support

Please log in to our LifeSpan website at www.LifeSpanFitness.com/support, click on "Customer Service" and complete the form to request assistance or call 877.654.3837 option 4 for a Customer Service Agent (please note that certain kinds of service should only be performed by a qualified service technician).

Heart rate sensor parts

1. The plastic electrode areas are on the reverse side of the strap to detect heart rate. (fig.A1)
2. The connector sends the heart rate signal to the receiving device. (fig.A2)

How to wear Heart Rate Monitor with chest belt

1. Tie the strap around your chest just below the chest muscle, and attach the hook to the other end of the strap. (fig.B1)

B1

2. Adjust the length of the strap, so that you can wear it comfortably and it can be securely fastened right below your chest.
3. Fasten the sensor with the connector on the strap. The LifeSpan logo of the sensor should be placed in a central and upright position. (fig.B2)

B2

- 4 Please moisten the electrode area and attach it to your skin closely.

B3

◎Please detach the connector from the strap and rinse it under running water after every use and hang to dry.
Sweat and moisture may keep the electrodes wet and the heart rate sensor will stay activated. This will reduce battery life.

Getting started

The heart rate sensor is compatible with the devices with Bluetooth 4.0/ANT+ which support heart rate measurement.

The Heart Rate Chest Strap can connect to the devices equipped with bluetooth 4.0 of Lifepan Fitness for indoor sport.

A separate application(APP) is required to view heart rate data on the receiving device(ex: smart phone or smart watch).

When you use the heart rate sensor for the first time, you need to pair the heart rate sensor with your receiving device.

Caring for your connector and soft start

The heart rate sensor is a high-tech instrument that should be handled with care. Follow the caring instructions to ensure reliable measurement and maximize the life span of the heart rate sensor.

Connector : Detach the connector from the strap after every use and dry the connector with a soft towel. Clean the connector with a mild soap and water when needed. Never use alcohol or any abrasive material.(ex: steel wool or cleaning chemicals)

Strap : Rinse the strap under running water after every use and hang to dry. Clean the strap gently with a mild soap and water when needed. Do not use moisturizing soaps, because residue will leave on the strap. Do not stretch the strap or bend the electrode areas sharply.

Dry and store the strap and the connector separately to maximize the battery life time of sensor. Keep the heart rate sensor in a cool and dry place. Do not store the heart rate sensor wet in non-breathing material, such as a sports bag, to prevent snap oxidation. Do not expose the heart rate sensor to direct sunlight.

Note: The strap is not machine washable, so please wash it by hand. Never put the strap or the sensor in a dryer.

Battery

The battery level of your heart rate sensor can be displayed on the receiving device.(If the APP has the function of showing battery status.) to change the battery please follow the instruction below (fig.C).

C

1. Use a coin and turn the battery cover counter-clockwise To "▲".
2. Insert a new battery(CR2032) with the positive pole (+) facing the battery cover. Make sure the plastic sealing ring is right in the groove to ensure water resistance.
3. Put the battery cover and battery back with the arrow pointing To "▲".
4. Turn the battery cover clockwise To "▲".

© Keep battery away from children. If it is swallowed, contact the doctor immediately. The battery should be disposed in compliance with local regulation.

Note: Risk of explosion if you insert battery with incorrect type.

Federal Communication Commission Interference Statement

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation.

This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one of the following measures:

- . Reorient or relocate the receiving antenna.
- . Increase the separation between the equipment and receiver.
- . Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- . Consult the dealer or an experienced radio/TV technician for help.

FCC Caution: To assure continued compliance, any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate this equipment. (Example - use only shielded interface cables when connecting to computer or peripheral devices).

FCC Radiation Exposure Statement

This equipment complies with FCC RF radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with a minimum distance of 0.5 centimeters between the radiator and your body.

This transmitter must not be co-located or operating in conjunction with any other antenna or transmitter.

The antennas used for this transmitter must be installed to provide a separation distance of at least 0.5 cm from all persons and must not be co-located or operating in conjunction with any other antenna or transmitter.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:
(1) This device may not cause harmful interference, and (2) This device must accept any interference received, including interference that may cause undesired operation.
