## 1 EUT Details

### 1.1 General

The EUT was a Raspberry Pi single board computer. It was uncased and powered from a mini USB style plugtop power supply.

It had two USB ports, an EtherNet port, an HDMI port, a stereo audio output socket and an RCA composite video output socket. The EUT also has a socket for an SD card which contains the operating system. The system was tested in two modes - one with EtherNet and HDMI and both USB interfaces connected and one with the audio and composite video connected instead of the HDMI.

It is designed to be used primarily by hobbyists or in places of education. The circuitry operates with a maximum clock frequency of 700MHz.

Details of the EUT and associated peripherals used during the tests are listed below. Figure 1 shows the interconnections between the EUT and peripherals.

Item	Manufacturer	Model	Description	Serial No:	FCC Status
1	Raspberry Pi	Raspberry Pi	SBC with element 14 4GB SD Card	PCB Rev 2.4	EUT
2	Stontronics	DSA-12CA-05	5V 2A PSU	none	#1
3	Microsoft	Keyboard 600	Keyboard	0065806454108	DoC
4	Microsoft	Model 1480	Express Mouse	none	DoC
5	D Link	DES-1008D	EtherNet Switch	B2A714C003282	DoC
6	D-Link	071-AD	7.5V 1A PSU	none	#1
7	Hyundai	Q321	Monitor with Composite Input	Q321SABT65E06220	PJILT32DW000
8	HP	Pavilion 22xi	Monitor with HDMI input	3CM33709CB	DoC
9	Liteon	PA-1041-91	19V 2.1A PSU	L21335001302	#1

#1 PSU so FCC ID or DoC not required

## 1.2 Modifications to EUT and Peripherals

Details of any modifications that were required to achieve compliance are listed below. The modification numbers are referred to in the results sections as appropriate.

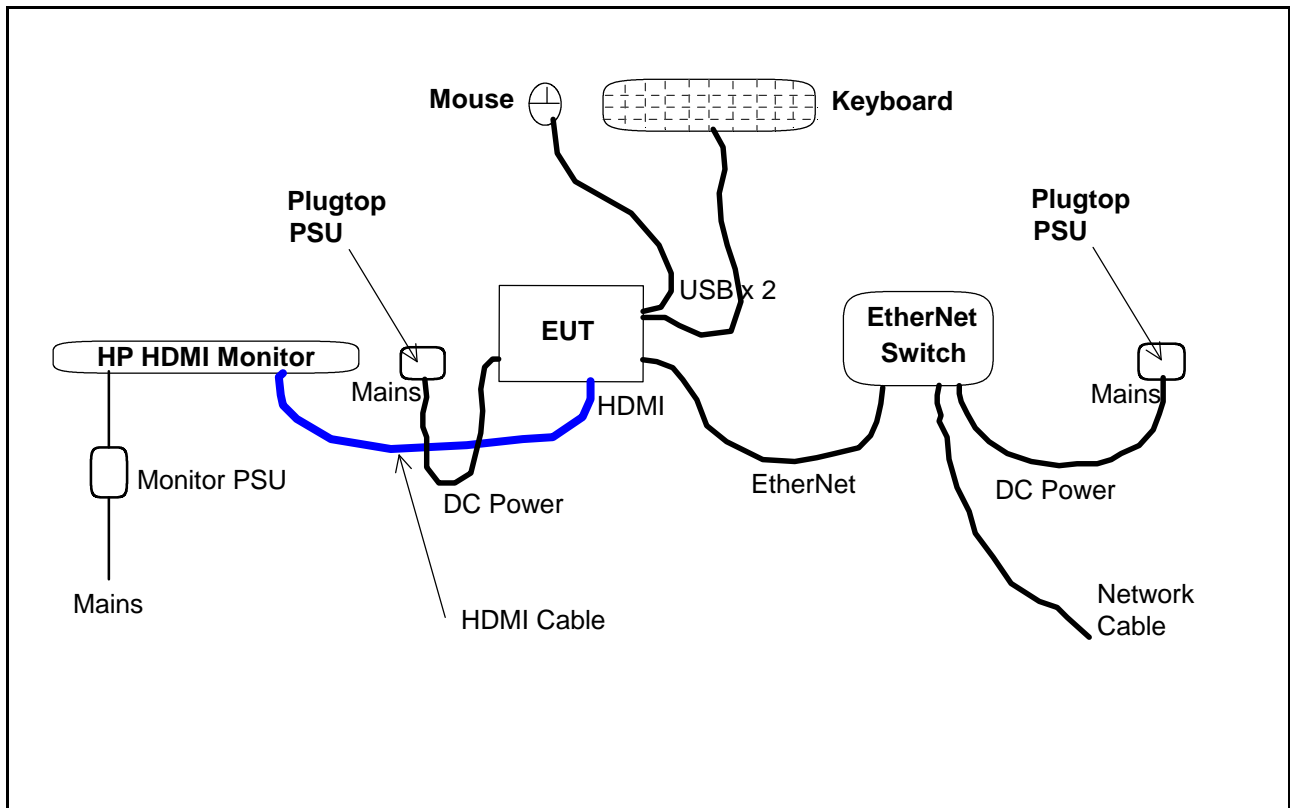

Mod No:	Details	Implemented for
1	As supplied 26th November 2013, with Ethernet mag jack shell bonded to GND plane. PCB changed to Rev 2.4.	Radiated emissions

## 1.3 EUT Operating Modes

The EUT was tested in the following operating mode or modes. Generally, operating modes are chosen that will exercise the functions of the EUT as fully as possible and in a manner likely to produce maximum emission levels or susceptibility. Individual test result sheets reference the operating mode of the EUT.

Operating Mode	Details
1	HDMI mode, running program to read / write memory whilst scrolling H's on the screen.
2	Composite mode, running program as above.

**Figure 1 Arrangement of EUT and Peripherals - HDMI Mode**

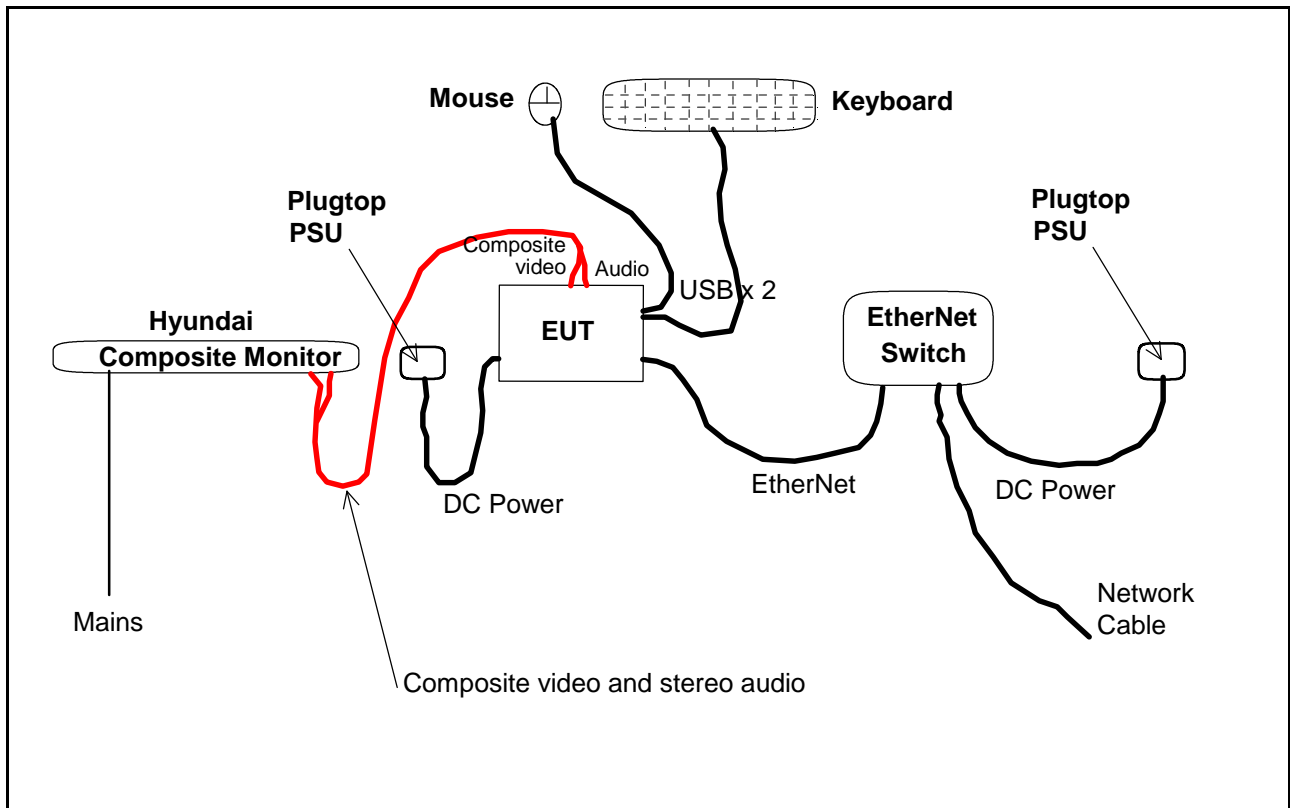

#### 1.4 Details of Interconnecting Cables - HDMI Mode

The following table lists details of the cables connected to the EUT.

From	To	Cable Type	Length	Notes
Mains adapter	EUT micro USB	DC twin unscreened	1.5m	
EUT USB	Keyboard	Integrated keyboard cable	1.5m	
EUT USB	Mouse	Integrated mouse cable	0.9m	
EUT Ethernet	Ethernet Switch	Ethernet SSTP	1m	
Ethernet Switch	PSU	DC twin unscreened	1.8m	
EUT HDMI	HDMI Monitor	Lindy Gold	1m	
HDMI Monitor	Monitor PSU	DC Co-ax	1m	
Monitor PSU	Mains	AC three core	1.8m	

**Figure 2 Arrangement of EUT and Peripherals - Composite Mode**

### 1.5 Details of Interconnecting Cables - Composite Mode

The following table lists details of the cables connected to the EUT.

From	To	Cable Type	Length	Notes
Mains adapter	EUT micro USB	DC twin unscreened	1.5m	
EUT USB	Keyboard	Integrated keyboard cable	1.5m	
EUT USB	Mouse	Integrated mouse cable	0.9m	
EUT Ethernet	Ethernet Switch	Ethernet SSTP	1m	
Ethernet Switch	PSU	DC twin unscreened	1.8m	
EUT Composite	Monitor Composite	Video co-ax	1.4m	
EUT Audio L + R	Monitor Audio	Audio twin co-ax	1.4m	
Monitor	Mains	AC three core	1.8m

### 3 Test Methods

#### 3.1 Conducted Emissions - ac power

This section describes the general method of performing this test. The specific method used and any deviations from this general method are listed in the appropriate results section.

Bench top EUTs and peripheral equipment are normally placed on a 0.8m high non-conducting bench, positioned 0.4m from one of the metallic walls of a screened room. Floor standing EUTs are normally placed 0.1m above the metallic floor of the screened room. Mains leads are bundled so as not to exceed 1m.

The EUT is powered using a 50ohm/50uH Line Impedance Stabilisation Network (LISN). Peripherals are powered using a second a 50ohm/50uH LISN. These LISNs are bonded to the screened room floor.

With the correct supply voltage applied to the EUT scans are performed on both the live and neutral line outputs of the LISN using quasi-peak detection over the specified frequency range. The results of these scans are shown in the plots section at the end of the report.

Significant emissions identified by the scans are measured and the results tabulated. The table of results is shown in the conducted emissions results section.

Final Level (dBuV) = Receiver Reading (dBuV) + Combined Cable & Attenuator Correction Factor (dB)

Example: if, @ 191kHz, receiver reading was 35.8dBuV

Final Level = 45.8 + 10.0 = 55.8 dBuV

#### 3.2 Radiated Emissions

Initial scans are performed in a semi-anechoic screened room at a distance of 3m. Scans are performed over the frequency range specified in the test standard with the antenna both horizontally and vertically polarised. During these scans the EUT and peripherals are rotated through 360°. Bench top EUTs are placed on a non-conducting bench at a height of 0.8m above the ground plane. Floor standing EUTs are placed 0.1m above the ground plane. The EUT cables were manipulated in an attempt to produce maximum emissions. The results of the scans are shown in the plots included at the end of the report.

Significant emissions identified by the scans are measured on an open area test site at the appropriate test distance. Maximised readings are obtained by rotating the EUT through 360° and adjusting the height of the antenna from 1m to 4m. Measurements are made with the antenna both horizontally and vertically polarised and the results tabulated.

Tabulated results show levels based on the following calculation:

Field Strength (dBuV) = receiver reading (dBuV) + CF (dB/m)

CF is the correction factor for the antenna and cable.

For example: if, at 114MHz, receiver reading was 17.9 dBuV, combined correction factor = 13.1 (dB/m).

Total field strength = 17.9 + 13.1 = 31.0 dBuV/m.

### 4 Test Results

The following sections contain tabulated test results. Plots of various scans are included at the back of this section.
