unknown, at least 10 centimeters to insure that there is no coupling between the case of the module and supporting equipment. Any accessories, peripherals, or support equipment connected to the module during testing shall be unmodified and commercially available (see Section 15.31(i)). 6 The modular transmitter must be equipped with either a permanently affixed label or must be capable of electronically displaying its FCC identification number. (A) If using a permanently affixed label, the modulate transmitter must be labeled with its own FCC identification number is not visible when the modulate transmitter must be labeled with its own FCC identification number is not visible when the module is installed inside another device, then the outside of the device into which the module is installed inside another device, then the outside of the device into which the module is installed must also display to label referring to the enclosed module. This exterior label can use wording such as the following: "Contains Transmiter Madule FCC ID: XYZMODELI" or "Contains FCC ID: XYZMODELI" any similar wording that expresses the same meaning may be used. The Grantee may either provide asche a tabled, on example of which must be included in the another included in the another included in the another included in the application for equipment authorization, or, must provide adequate lastractions along with the module with the module is installed in the application for equipment authorization which it is installed. If the modular transmitter or on the device in on which the module is installed must display a label referring to the enclosed module. This externoling and a control of the enclosed module. The sure manula must include instructions on how to access the ame meaning may be used. The user manula must include instructions on how to access the electronic display. A copy of these instructions must be included to the application for equipment authorization for equipment authorization for equipment authorization in the contro	_	-	<u> </u>	
the case of the module and supporting equipment. Any accessories, peripherals, or support equipment connected to the module during testing shall be unmodified and commercially available (see Section 15.31(ii)). 6 The modular transmitter must be equipped with either a permanently affixed label or must be to capable of electronically displaying its FCC identification number. (A) If yaming a permanently affixed label, the modular transmitter must be labeled with its one FCC identification number is not visible when the modular is installed inside another device, then the outside of the device into which the module is installed miss also display a label referring to the enclosed module. This exterior label can use wording such as the following: "Contains Transmitter Module FCC ID: XYZMODELI." Any similar wording that expresses the same meaning may be used. The Grantee may either provide such a label, an example of which must be included in the application for equipment authorization, or, must provide adequate instructions doing with the module which explain this requirement. In the latter case, a copy of these instructions was be included in the application for equipment authorization, or, must provide adequate instructions must be readily accessible and visible on the modular transmitter on on the device in which it is installed. If the module is installed mist adoption the outside of the device into which it is installed inside another device, then the outside of the device into which it is installed mast alsopal valabely referring to the inclosed module. This exterior label can use wording such as the included in the application for equipment authorizations must be included in the outside of the device into which it is installed mast sloplay a label referring to the inclosed module. This exterior label can use wording such as the included in the application for equipment authorizations for equipment authorizations for equipment authorization. 7 The modular transmitter must comply with any specific rules or op		unknown, at least 10 centimeters to		
equipment. Any accessories, peripherals, or support equipment connected to the module during testing shall be unmodified and commercially available (see Section 15.31(i)). 6 The modular transmitter must be equipped with either a permanently affixed label or must be capable of electronically displaying its FCC identification number. (A) If using a permanently affixed label, the modular transmitter must be labeled with its own FCC identification number, and, if the FCC identification number is not visible when the modular transmitter is not visible when the module is installed inside another device, then the outside of the device into which the module is installed must also display a label referring to the eclosed module. This exterior label can use wording such as the following: "Contains TCC ID: XYZMODELL" or "Contains FCC ID: XYZMODELL" or "Contains FCC ID: XYZMODELL" or "Soutians be included in the application, or must provide adequate instructions along with the module which explain this verquirement. In the latter case, a copy of these instructions are so in electronic display of the FCC identification number, the information numst be readily accessible and visible on the modular transmitter uses an electronic display of the FCC identification number, the information must be readily accessible and visible on the modular transmitter uses an electronic display of the FCC identification number, the information must be readily accessible and visible on the modular transmitter must be included in the application for equipment authorization. (B) If the modular transmitter module(s), "Any similar wording that expresses the same meaning may be used. The user monual must include instructions a how to access the same meaning may be used. The user monual must include instructions and he electronic display. A copy of these instructions must be included in the upplication for equipment authorization. 7 The modular transmitter must comply with any specific rules or operating requirements that or ofinarily apply to a		insure that there is no coupling between		
equipment. Any accessories, peripherals, or support equipment connected to the module during testing shall be unmodified and commercially available (see Section 15.31(i)). 6 The modular transmitter must be equipped with either a permanently affixed label or must be capable of electronically displaying its FCC identification number. (A) If using a permanently affixed label, the modular transmitter must be labeled with its own FCC identification number, and, if the FCC identification number is not visible when the modular transmitter is not visible when the module is installed inside another device, then the outside of the device into which the module is installed must also display a label referring to the eclosed module. This exterior label can use wording such as the following: "Contains TCC ID: XYZMODELL" or "Contains FCC ID: XYZMODELL" or "Contains FCC ID: XYZMODELL" or "Soutians be included in the application, or must provide adequate instructions along with the module which explain this verquirement. In the latter case, a copy of these instructions are so in electronic display of the FCC identification number, the information numst be readily accessible and visible on the modular transmitter uses an electronic display of the FCC identification number, the information must be readily accessible and visible on the modular transmitter uses an electronic display of the FCC identification number, the information must be readily accessible and visible on the modular transmitter must be included in the application for equipment authorization. (B) If the modular transmitter module(s), "Any similar wording that expresses the same meaning may be used. The user monual must include instructions a how to access the same meaning may be used. The user monual must include instructions and he electronic display. A copy of these instructions must be included in the upplication for equipment authorization. 7 The modular transmitter must comply with any specific rules or operating requirements that or ofinarily apply to a		the case of the module and supporting		
or support equipment connected to the module during testing shall be unmodified and commercially available (see Section 15.31(ii)). 6 The modular transmitter must be equipped with either a permanently affixed label or must be capable of electronically displaying its FCC identification number. (A) If using a permanently offixed label, the modular transmitter must be labeled with its own FCC identification number, and, if the FCC identification number is not visible when the modular is installed issis deanother device, then the outside of the device into which the module is installed must also display a label referring to the enclosed module. This exterior label can use wording such as the following: "Contains FCC ID: XYZMODEL!" or "Contains FCC ID: XYZMOD				
module during testing shall be unmodified and commercially available (see Section 15.31(i)). 6 The modular transmitter must be equipped with either a permanently affixed label or must be capable of electronically displaying its FCC identification number. (A) If using a permanently affixed label, the modular transmitter must be tableted with its own FCC identification number, and, if the FCC identification number is not visible when the modular transmitter must be tableted with its own FCC identification number is not visible when the modulae is installed inside another device, then the module is installed inside another device, then the module. This exertion table can use wording such as the following: "Contains Transmitter Module. This exertion table can use wording such as the following: "Contains Transmitter wording. The Contains Transmitter Module. This exertion table can use wording with the module is installed must also display of which must be included in the application for equipment authorization, or, must provide adequate instructions along with the module which explain this requirement. In the latter case, a copy of these instructions must be included in the application for equipment authorization. (B) If the modular transmitter was an electronic display of the FCC identification number, the information must be really accessible and visible on the modular transmitter or on the device in which it is installed in the application of or equipment authorization. The modular transmitter module(s). Any similar wording that expresses the same meaning may be used. The sacer monand must include instructions on how to access the electronic display, A copy of these instructions must be included in the application for equipment authorization. The modular transmitter must comply with any specific rules or operating requirements that or originarily apply to a complete transmitter and the manufacturer must provide adequate instructions along with		1 1 1		
ummodified and commercially available (see Section 15.31(ii)). 6 The modular transmitter must be equipped with either a permanently affixed label or must be capable of electronically displaying its FCC identification number. (A) If using a permanently affixed label, the modular transmitter must be labeled with its own FCC identification number, and, if the FCC identification number is not visible when the modular is installed inside another device, then the outside of the device into which the module is installed must dos display a label referring to the enclosed module. This exterior label can use wording such as the following: "Contains Transmitter Module FCC ID. SYMODEL!" or "Contains FCC ID: XYMODEL!" Any similar wording that expresses the same meaning may be used. The Grantee may either provide such a label, an example of which must be included in the application for equipment authorization, or, must provide adequate instructions along with the module which explain this requirement. In the latter case, a copy of these instructions must be included in the application for equipment authorization. (B) If the modular transmitter was on electronic display of the FCC identification number, the information must be readily accessible and visible on the modular transmiter or on the device in which it is installed in the device in which it is installed must display a label referring to the enclosed module. This exterior label can use wording such as the following: "Contains FCC certified transmitter module(s)." Any similar wording that expresses the same meaning may be used. The user manual must include instructions on how to access the electronic display, a copy of these instructions must be included in the application for equipment authorization. 7 The modular transmitter must comply with any specific rules or operating requirements that ordinarily apply to a complete transmitter and the manufacturer must provide adequate instructions along with				
(see Section 15.31(i)). 6 The modular transmitter must be equipped with either a permanently affixed label or must be capable of electronically displaying its FCC identification number. (A) If using a permanently affixed label, the modular transmitter must be labeled with its own FCC identification number, and, if the FCC identification number is not visible when the modular installed inside another device, then the modular installed inside another device, then the modular binstalled inside another device, then the module is installed inside another device, then the enclosed module. This exterior tolet can use wording such as the following: "Contains Transmitter Module PCC ID: XYZMODEL!" or "Contains FCC ID: XYZMODEL!" or "Contains FCC ID: XYZMODEL!" or "Contains FCC ID: XYZMODEL!" or "Module PCC ID: XYZMODEL!" or "Module PCC ID: XYZMODEL!" or "Module In the explication for equipment authorization, or must provide adequate instructions along with the module which explain this requirement. In the latter case, a copy of these instructions must be included in the application for equipment authorization. (B) If the modular transmitter uses an electronic display of the FCC identification number, the highornation must be readily accessible and visible on the modular transmitter use on electronic display of the FCC identification number, the highornation must be readily accessible and visible on the modular transmitter we wording such as the following: "Contains FCC certified transmitter module(s)." Any similar wording that expresses the same meaning may be used. The user mundal must include instructions on how to access the electronic display. A copy of these instructions must be included in the application for equipment authorization. 7 The modular transmitter must comply with any specific rules or operating requirements that ordinarily apply to a complete transmitter and the manufacturer must provide adequate instructions along with				
6 The modular transmitter must be equipped with either a permanently affixed label or must be capable of electronically displaying its FCC identification number. (A) If using a permanently affixed label, the modular transmitter must be liabeled with its own FCC identification number and visible when the modular transmiter must be liabeled with its own FCC identification number is not visible when the module is installed missed moduler device, then the outside of the device into which the module is installed missed soldspay a label referring to the enclosed module. This exterior label can use wording such as the following: "Contains Transmitter Module FCC ID: XYZMODEL!" or "Contains FCC ID: XYZMODEL!" and with the module which explain that expresses the same meaning may be used. The Grantee may either provide such a label, an example of which must be included in the application for equipment authorization. (B) If the modular transmiter was an electronic display of the FCC identification number, the information must be really accessible and visible on the modular transmiter or on the device in which it is installed in sist and visible on the modular transmiter or on the device in which it is installed must display a label referring to the enclosed module. This exterior label can use wording such as the following: "Contains FCC Certified transmitter module(s)." Any similar wording that expresses the same meaning may be used. The user manual must include instructions on how to access the electronic display a closel referring to the enclosed module. This exterior label can use wording such as the following: "Contains FCC certified transmitter module(s)." Any similar wording that expresses the same meaning may be used. The user manual must include instructions on how to access the electronic display, a copy of these instructions must be included in the application for equipment authorization. 7 The modular transmitter must comply with any specific rules or operating requirements that or original and a manual fact		•		
equipped with either a permanently affixed label or must be capable of electronically displaying its FCC identification number. (A) If using a permanently affixed label, the modular transmitter must be labeled with its own FCC identification number; and, if the FCC identification number is not visible when the module is installed inside another device, then the module is installed inside another device, then the module is installed must also display a label referring to the enclosed module. This exterior label can use wording such as the following: "Contains Transmitter Module FCC ID: XYZMODEL!" or "Contains FCC ID: XYZMODEL!" Any similar wording that expresses the same meaning may be used. The Grantee may either provide auche a label, an example of which must be included in the application for equipment authorization, must provide adequate instructions along with the module which explain this requirement. In the later case, a copy of these instructions must be included in the application for equipment authorization. (B) If the modular transmitter uses an electronic display of the FCC identification number, the information must be readily accessible and visible on the modular transmitter was an electronic display of the FCC identification number, the information must be readily accessible and visible on the modular transmitter wor on the device in which it is installed. If the module is installed must display a label referring to the enclosed module. This exterior label can use wording such as the following: "Contains FCC certified transmitter module(s)." Any similar wording that expresses the same meaning may be used. The user meanual must include instructions on how to access the electronic display, A copy of these instructions must be included in the application for equipment authorization. 7 The modular transmitter must comply with any specific rules or operating requirements that ordinarily apply to a complete transmitter and the manufacturer must provide adequate instructions along with		377		
affixed label or must be capable of electronically displaying its FCC identification number. (A) If using a permanently affixed label, the modular transmitter must be labeled with its own FCC identification number is not visible when the module is installed inside another device, then the outside of the device into which the module is installed must also display a label referring to the enclosed module. This exterior label can use wording such as the following: "Contains Transmitter Module FCC ID-XYMODEL!" or "Contains FCC ID: XYMODEL!" or "Contains FCC ID: XYMODEL!" any similar wording that expresses the same meaning may be used. The Grantee may either provide such a label, an example of which must be included in the application for equipment authorization, or, must provide adequate instructions along with the module which explain this requirement. In the latter case, a copy of these instructions must be included in the application for equipment authorization. (B) If the modular transmitter uses an electronic display of the FCC Identification number, the information must be readily accessible and visible on the modular transmitter or on the device in which it is installed. If the module is installed must display albel referring to the enclosed module. This exterior label can use wording such as the following: "Contains FCC certified transmitter module(s)." Any similar wording that expresses the same meaning may be used. The user manual must include instructions on how to access the electronic display along that expresses the same meaning may be used. The user manual must include instructions on how to access the electronic display along that expresses the same meaning may be used. The user manual must include instructions on how to access the electronic display along that expresses the same meaning may be used. The user manual must include instructions on how to access the electronic display that expresses the same manual must include in the application for equipment authorization. The modular transmitter	6			Y
electronically displaying its FCC identification number. (A) If using a permanently affixed label, the modular transmitter must be labeled with its own FCC identification number, and if the FCC identification number is not visible when the module is installed inside another device, then the outside of the device into which the module is installed must also display a label referring to the enclosed module. This exterior label can use wording such as the following: "Contains Transmitter Module FCC ID: XYZMODEL!" or "Contains FCC ID: XYZMODEL!" or "Contains FCC ID: XYZMODEL!" as when provide a deep with the application for equipment authorization, or, must provide adequate instructions along with the module which explain this requirement. In the latter case, a copy of these instructions must be included in the application for equipment authorization. (B) If the modular transmitter uses an electronic display of the FC identification number, the information must be readily accessible and visible on the modular transmitter as on the device in which it is installed. If the module is installed must display alother referring to on the device in which the module is installed must display other FCC identification to the enclosed module. This exterior label referring to the enclosed module. This exterior is the enclosed module artist the module is installed must display a label referring to the enclosed module. This exterior is the enclosed module. This exterior is the comply with any specific rules or operating requirements that ordinarily apply to a complete transmitter and the manufacturer must provide adequate instructions along with			provided.	
electronically displaying its FCC identification number. (A) If using a permanently affixed label, the modular transmitter must be labeled with its own FCC identification number, and if the FCC identification number is not visible when the module is installed inside another device, then the outside of the device into which the module is installed must also display a label referring to the enclosed module. This exterior label can use wording such as the following: "Contains Transmitter Module FCC ID: XYZMODEL!" or "Contains FCC ID: XYZMODEL!" or "Contains FCC ID: XYZMODEL!" as when provide a deep with the application for equipment authorization, or, must provide adequate instructions along with the module which explain this requirement. In the latter case, a copy of these instructions must be included in the application for equipment authorization. (B) If the modular transmitter uses an electronic display of the FC identification number, the information must be readily accessible and visible on the modular transmitter as on the device in which it is installed. If the module is installed must display alother referring to on the device in which the module is installed must display other FCC identification to the enclosed module. This exterior label referring to the enclosed module. This exterior is the enclosed module artist the module is installed must display a label referring to the enclosed module. This exterior is the enclosed module. This exterior is the comply with any specific rules or operating requirements that ordinarily apply to a complete transmitter and the manufacturer must provide adequate instructions along with		affixed label or must be capable of		
identification number. (A) If using a permanently affixed label, the modular transmitter must be labeled with its own FCC identification mumber; and, if the FCC identification mumber is not visible when the module is installed inside another device, then the outside of the device into which the module is installed must also display a label referring to the enclosed module. This exterior label can use wording such as the following: "Contains Transmitter Module FCC ID: XYZMODEL!" or "Contains FCC ID: XYZMODEL!". Any similar wording that expresses the same meaning may be used. The Grantee may either provide such a label, an example of which must be included in the application for equipment authorization, or, must provide adequate instructions along with the module which explain this requirement. In the latter case, a copy of these instructions must be included in the application for equipment authorization. (B) If the modular transmitter uses an electronic display of the FCC identification number, the information must be readily accessible and visible on the modular transmitter or on the device in which it is installed. If the module is installed inste another device, then the outside of the device into which the module is installed must display a label referring to the enclosed module. This exterior label can use wording such as the following: "Contains FCC certified transmitter module(s)." Any similar wording that expresses the same meaning may be used. The user manual must include instructions on how to access the electronic display. A copy of these instructions must be included in the application for equipment authorization. 7 The modular transmitter must comply with any specific rules or operating requirements that ordinarily apply to a complete transmitter and the manufacturer must provide adequate instructions along with				
(A) If using a permanently affixed label, the modular transmitter must be labeled with its own FCC identification number, and, if the FCC identification number, and, if the FCC identification number is not visible when the module is installed inside another device, then the outside of the device into which the module is installed must also display a label referring to the enclosed module. This exterior label can use wording such as the following: "Contains Transmitter Module FCC ID: XYZMODEL!" or "Contains FCC ID: XYZMODEL!" Any similar wording that expresses the same meaning may be used. The Grantee may either provide such a label, an example of which must be included in the application for equipment authorization, or, must provide adequate instructions along with the module which explain this requirement. In the latter case, a copy of these instructions must be included in the application for equipment authorization. (B) If the modular transmitter uses an electronic display of the FCC identification number, the information must be readily accessible and visible on the modular transmitter or on the device in which it is installed! It is installed! It is installed inside another device, then the outside of the device into which the module is installed must display a label referring to the enclosed module. The user manual must include instructions on how to access the electronic display. A copy of these instructions must be included in the application for equipment authorization. 7 The modular transmitter must comply with any specific rules or operating requirements that ordinarily apply to a complete transmitter and the manufacturer must provide adequate instructions along with				
modular transmitter must be labeled with its own FCC identification number, and, if the FCC identification number is not visible when the module is installed inside another device, then the outside of the device into which the module is installed must also display a label referring to the enclosed module. This exterior label can use wording such as the following: "Contains Transmitter Module FCC ID: XYZMODELI." or "Contains FCC ID: XYZMODELI." Any similar wording that expresses the same meaning may be used. The Grantee may either provide such a label, an example of which must be included in the application for equipment authorization, or, must provide adequate instructions along with the module which explain this requirement. In the latter case, a copy of these instructions must be included in the application for equipment authorization. (B) If the modular transmitter uses an electronic display of the FCC identification number, the information must be readity accessible and visible on the modular transmitter or on the device in which it is installed If the module is installed inside another device, then the outside of the device into which the module is installed must display a label referring to the enclosed module. This exterior label can use wording such as the following: "Contains FCC certified transmitter module(s)." Any similar wording that expresses the same meaning may be used. The user memaal must include instructions on how to access the electronic display. A copy of these instructions must be included in the application for equipment authorization. Refer to the OEM installation guide Y The modular transmitter must comply with any specific rules or operating requirements that ordinarily apply to a complete transmitter and the manufacturer must provide adequate instructions along with				
identification number is not visible when the module is installed inside another device, then the outside of the device into which the module is installed must also display a label referring to the enclosed module. This exterior label can use wording such as the following: "Contains Transmiter Module FCC ID: XYZMODEL!" or "Contains FCC ID: XYZMODEL!" or "Contains FCC ID: XYZMODEL!" and the season of the application for equipment authorization, or, must provide such a label, an example of which must be included in the application for equipment authorization, or, must provide adequate instructions along with the module which explain this requirement. In the latter case, a copy of these instructions must be included in the application for equipment authorization. (B) If the modular transmitter uses an electronic display of the FCC identification number, the information must be readily accessible and visible on the modular transmitter or on the device in which it is installed. If the module is installed must display a label referring to the enclosed module. This exterior label can use wording such as the following: "Contains FCC certified transmitter module(s)." Any similar wording that expresses the same meaning may be used. The user manual must include instructions on how to access the electronic display. A copy of these instructions must be included in the application for equipment authorization. 7 The modular transmitter must comply with any specific rules or operating requirements that ordinarily apply to a complete transmitter and the manufacturer must provide adequate instructions along with				
module is installed inside another device, then the autside of the device in to which the module is installed must also display a label referring to the enclosed module. This exterior label can use wording such as the following: "Contains Transmitter Module FCC ID: XYMMODEL!" or "Contains FCC ID: XYMMODEL!" and "Contains FCC ID: XYMMODEL!" and "Similar wording that expresses the same meaning may be used. The Grantee may either provide such a label, an example of which must be included in the application, or, must provide adequate instructions along with the module which explain this requirement. In the latter case, a copy of these instructions must be included in the application, or equipment authorization. (B) If the modular transmiter uses an electronic display of the FCC identification number, the information must be readily accessible and visible on the modular transmitter or on the device in which it is installed. If the module is installed inside another device, then the outside of the device into which the module is installed must display a label referring to the enclosed module. This exterior label can use wording such as the following: "Contains FCC certified transmitter module(s)." Any similar wording that expresses the same meaning may be used. The user manual must include instructions on how to access the electronic display. A copy of these instructions must be included in the application for equipment authorization. 7 The modular transmitter must comply with any specific rules or operating requirements that ordinarily apply to a complete transmitter and the manufacturer must provide adequate instructions along with		FCC identification number, and, if the FCC		
the outside of the device into which the module is installed must also display a label referring to the enclosed module. This exterior label can use wording such as the following: "Contains Transmitter Module FCC ID: XYZMODELI" or "Contains FCC ID: XYZMODELI" Any similar wording that expresses the same meaning may be used. The Grantee may either provide such a label, an example of which must be included in the application for equipment authorization, or, must provide adequate instructions along with the module which explain this requirement. In the latter case, a copy of these instructions must be included in the application for equipment authorization. (B) If the modular transmitter uses an electronic display of the FCC identification number, the information must be readily accessible and visible on the modular transmitter on the device in which it is installed. If the module is installed must display a label referring to the enclosed module. This exterior label can use wording such as the following: "Contains FCC certified transmitter module(s)." Any similar wording that expresses the same meaning may be used. The user manual must include instructions on how to access the electronic display. A copy of these instructions must be included in the application for equipment authorization. 7 The modular transmitter must comply with any specific rules or operating requirements that ordinarily apply to a complete transmitter and the manufacturer must provide adequate instructions along with				
installed must also display a label referring to the enclosed module. This exterior label can use wording such as the following: "Contains Transmitter Module FCC ID: XYZMODELI" or "Contains FCC ID: XYZMODELI" or "Contains FCC ID: XYZMODELI" any similar wording that expresses the same meaning may be used. The Grantee may either provide such a label, an example of which must be included in the application for equipment authorization, or, must provide adequate instructions along with the module which explain this requirement. In the latter case, a copy of these instructions must be included in the application for equipment undhorization. (B) If the modular transmitter uses an electronic display of the FCC identification number, the information must be readily accessible and visible on the modular transmitter or on the device in which it is installed. If the module is installed must display a label referring to the enclosed module. This exterior label can use wording such as the following: "Contains FCC certified transmitter module(s)." Any similar wording that expresses the same meaning may be used. The user manual must include instructions on how to access the electronic display. A copy of these instructions must be included in the application for equipment authorization. 7 The modular transmitter must comply with any specific rules or operating requirements that ordinarily apply to a complete transmitter and the manufacturer must provide adequate instructions along with		· ·		
the enclosed module. This exterior label can use wording such as the following: "Contains Transmitter Module FCC ID: XYZMODELI" or "Contains FCC ID: XYZMODELI" on "Such as the following: "Contains FCC ID: XYZMODELI" or "Ontains FCC ID: XYZMODELI" on "Such a label, an example of which must be included in the application for equipment authorization, or, must provide adequate instructions along with the module which explain this requirement. In the latter case, a copy of these instructions must be included in the application for equipment authorization. (B) If the modular transmitter uses an electronic display of the FCC identification number, the information must be readily accessible and visible on the modular transmitter or on the device in which it is installed. If the module is installed inside another device, then the outside of the device into which the module is installed must display a label referring to the enclosed module. This exterior label can use wording such as the following: "Contains FCC certified transmitter module(s)." Any similar wording that expresses the same meaning may be used. The user manual must include instructions on how to access the electronic display. A copy of these instructions must be included in the application for equipment authorization. 7 The modular transmitter must comply with any specific rules or operating requirements that ordinarily apply to a complete transmitter and the manufacturer must provide adequate instructions along with		· ·		
wording such as the following: "Contains Transmitter Module FCC ID: XYZMODEL1" or "Contains FCC ID: XYZMODEL1." Any similar wording that expresses the same meaning may be used. The Grantee may either provide such a label, an example of which must be included in the application for equipment authorization, or, must provide adequate instructions along with the module which explain this requirement. In the latter case, a copy of these instructions must be included in the application for equipment authorization. (B) If the modular transmitter uses an electronic display of the FCC identification number, the information must be readily accessible and visible on the modular transmitter or on the device in which it is installed. If the module is installed inside another device, then the outside of the device into which the module is installed must display a label referring to the enclosed module. This exterior label can use wording such as the following: "Contains FCC certified transmitter module(s)." Any similar wording that expresses the same meaning may be used. The user manual must include instructions on how to access the electronic display. A copy of these instructions must be included in the application for equipment authorization. Refer to the OEM installation guide Y With any specific rules or operating requirements that ordinarily apply to a complete transmitter and the manufacturer must provide adequate instructions along with				
Transmitter Module FCC ID: XYZMODELI." or "Contains FCC ID: XYZMODELI." Any similar wording that expresses the same meaning may be used. The Grantee may either provide such a label, an example of which must be included in the application for equipment authorization, or, must provide adequate instructions along with the module which explain this requirement. In the latter case, a copy of these instructions must be included in the application for equipment authorization. (B) If the modular transmitter uses an electronic display of the FCC identification number, the information must be readily accessible and visible on the modular transmitter on the device in which it is installed. If the module is installed inside another device, then the outside of the device into which the module is installed must display a label referring to the enclosed module. This exterior label can use wording such as the following: "Contains FCC certified transmitter module(s)." Any similar wording that expresses the same meaning may be used. The user manual must include instructions on how to access the electronic display. A copy of these instructions must be included in the application for equipment authorization. 	requirements. A copy of these instructions must be included in the application for equipment authorization.		
8	The modular transmitter must comply with any applicable RF exposure requirements in its final configuration.	Refer to MPE calculation in the Test report	Y

A **limited modular approval** may be granted for single or split modular transmitters that do not comply with all of the above requirements, *e.g.*, shielding, minimum signaling amplitude, buffered modulation/data inputs, or power supply regulation, if the manufacturer can demonstrate by alternative means in the application for equipment authorization that the modular transmitter meets all the applicable Part 15 requirements under the operating conditions in which the transmitter will be used. Limited modular approval also may be granted in those instances where compliance with RF exposure rules is demonstrated only for particular product configurations. The applicant for certification must state how control of the end product into which the module will be installed will be maintained such that full compliance of the end product is always ensured.
