CHARGE THE BATTERY

Connect this end to phone's USB port.

Tip: Be sure to charge your phone's battery completely after inserting it in the phone for the first time.

INSERT SIM AND Micro SD CARD

Please insert the SIM card(s) according to the label on the phone. Make sure that the clipped corner of the SIM card and the metallic contacts are facing the correct direction. Slide the SIM card into the slot until it doesn't move up any further.

Micro SD card slot is above the SIM card slot. The direction in which the micro SD card has to be inserted into the designated slot is shown by a label on the phone.
Tip: For additional media storage insert a micro SD card.
TURN THE PHONE ON& OFF

Hold down the power button to turn the phone on.

Hold down the power button, then touch Power off to turn the phone off
DIM LOCK & WAKE THE PHONE

When the power is on and you want to dim the screen, press the power button.

When the screen is dimmed and you want to wake the phone, press the power button and then drag the lock to the right.

Touch Settings>Wireless & networks > WI-FI settings. Check Wi-Fi to turn it on. The phone scans for available Wi-Fi networks and displays the names of those it finds. Secured networks are indicated with a Lock icon.

truconnect™

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment. This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and use d in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

--Reorient or relocate the receiving antenna.
--Increase the separation between the equipment and receiver.
--Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
--Consult the dealer or an experienced radio/TV technician for help

This device complies with part 15 of the FCC rules. Operation is subject to the following two conditions:

(1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause und esired operation.

This mobile phone meets the government's require ments for exposure to radio waves.

This phone is designed and manufactured not to exceed the emission limits for exposure to radio fre quency (RF) energy set by the Federal Communications Commission of the U.S. Government. The exposure standard for wireless mobile phones employs a unit of measurement known as the Specific Absorption Rate, or SAR. The SAR limit set by the FCC
 is 1.6W/kg. *Tests for SAR are conducted using standard operating positions accepted by the FCC with the phone transmitting at its highest certified power level in all tested frequency bands. Although the SAR is determined at the highest certified power level, the actual SAR level of the phone while operating can be well below the maximum value. This is because the phone is designed to operate at multiple power levels so as to use only the poser required to reach the network.
 In general, the closer you are to a wireless base station antenna, the lower the power output.

The highest SAR values for the model phone as
 reported to the FCC when tested for use at the head and on the body are:
Head: 0.406W/kg, Body‐worn: 1.016W/kg
Hotspot: 0.693W/kg
Simultaneous Transmission: 1.354W/kg
 (Measurements differ among phone models, depending upon available accessories and FCC
 requirements.)

While there may be differences between the SAR levels of various phones and at various positions, t hey all meet the government requirement.

The FCC has granted an Equipment Authorization for this model phone with all reported SAR levels evaluated as in compliance with the FCC RF exposure guidelines. SAR information on this model phone is on file with the
FCC and can be found under the Display Grant section of www.fcc.gov/oet/ea/fccid after searching on
FCC ID: 2ABDT-D351W

 For body worn operation, this phone has been tested and meets the FCC RF exposure guidelines for use with an accessory that contains no metal and the positions the handset a minimum of 1.0 cm from the body. Use of other accessories may not ensure compliance with
FCC RF exposure guidelines. If you do no t use a body-worn accessory and are not holding the phone at the ear, position the handset a minimum of 1.0 cm from your body when the phone is
switched on.
