

Assembly

Follow the assembly steps in the order listed below.

- 1 Ensure the **gearbox** is completely inserted into the opening in the wheel well.
- 2 Attach the left and right **rear wheel assembly** to the rear axle.
- 3 Attach the left and right **front wheel assembly** to the front axle.
- 4 Insert the **steering wheel** over the end of the steering column. Fasten with the nut and bolt. **Note:** Connect the wire connector from the steering wheel to the wires connector coming from steering column.
- 5 Place each mirror on the mirror bracket, making sure the holes on the bottom of the mirror are aligned. Fasten the mirror to the bracket using the small cap screw.
- 6 **Before** you attach the seat, make the one-time battery connection (see page 8).
- 7 Fasten the **seat** to the body using the two screws (attached to the seat).
- 8 Charge the battery (see **charge the battery** instructions on page 9).
