

## How to Use Correctly

Centrally Placed

Plastic Case  
thickness <math>\leq 4\text{mm}</math>

Not Placed Correctly

Magnetic Case

Bulky Case  
thickness <math>\geq 4\text{mm}</math>

Metal Ring Case

Credit Card Case

## ORBIT WIRELESS CHARGER

SW007

USER MANUAL

## Product Features

Standard Version: WPC – 1.1

Input Voltage: DC 5V /1500mA

Charging Voltage: 5V, 800mA

Charging Distance: 4-6mm.

Conversion Efficiency:  $\geq 70\%$

Charging Methods: Induction Model

Working Frequency: 110 – 160 KHz

## Functions

1. The Orbit Wireless Charger is a high sensitivity, wireless charging pad for mobile phones which is compatible with all wireless charging products in accordance with Qi international standards.
2. After a mobile phone is charged; the Orbit Wireless Charger will automatically enter standby mode until the next use.
3. It is 70% more efficient than most conventional chargers and will produce less heat.
4. If a phone call is received while charging a mobile phone; it can be removed from the charger without disconnecting the cable.

## Charging

1. Connect the Orbit Wireless Charger to a USB port or USB mains adapter with the cable provided.
2. Once connected the LED will glow red to indicate standby mode.
3. To charge a mobile phone, place it directly on top of the charging pad with the screen side facing up. The LED will light blue to indicate the phone is charging.

## Safety

1. Keep credit cards, pacemakers and other sensitive electronic devices away from the wireless charger.
2. Do not use the charger if it is wet.
3. Do not use the charger outside the safe operating temperature range of -20 C to 40 C.
4. Do not use the charger in direct sunlight or high temperatures.
5. Do not place anything between the mobile device being charged and the charging pad.
6. This product is not suitable for use as a travel adapter.

## **FCC Statement**

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference.

(2) This device must accept any interference received, including interference that may cause undesired operation.

2. Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note: This equipment has been tested and found to comply with the limits for a class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation.

This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator & your body.
