User Manual

Keychain speaker

Model:SL175

Congratulations on your BT Keychain speaker!
This BT speaker allows you to enjoy your music without wires.

Please read this manual before use.

DEVICE LAYOUT:

1. Power ON/OFF
2. Keychain
3. LED indicator
4. MICRO USB INPUT

CHARGING THE SPEAKER:

A full charge is approximately 1 hour and plays continuously 1.5 hours.
Connect the speaker to the USB charging cable to charge.
When the LED indicator is RED, the speaker is charging.
The LED indicator goes off when the device is fully charged.

HOW TO USE:

If you want to pair your mobile device with the speaker, please make sure the BT mode on your device is switched on. Switch the power on/off button on to pair the device. After doing so the speaker will be visible in the Bluetooth devices overview of your device. Please select "BT Speaker" to pair your mobile device with the speaker.

SPECIFICATIONS:

Model: SL175

FCC Statement

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference.

(2) This device must accept any interference received, including interference that may cause undesired operation.

2. Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note: This equipment has been tested and found to comply with the limits for a class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation.

This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

The device has been evaluated to meet general RF exposure requirements. The device can be used in portable exposure conditions without restriction.
