

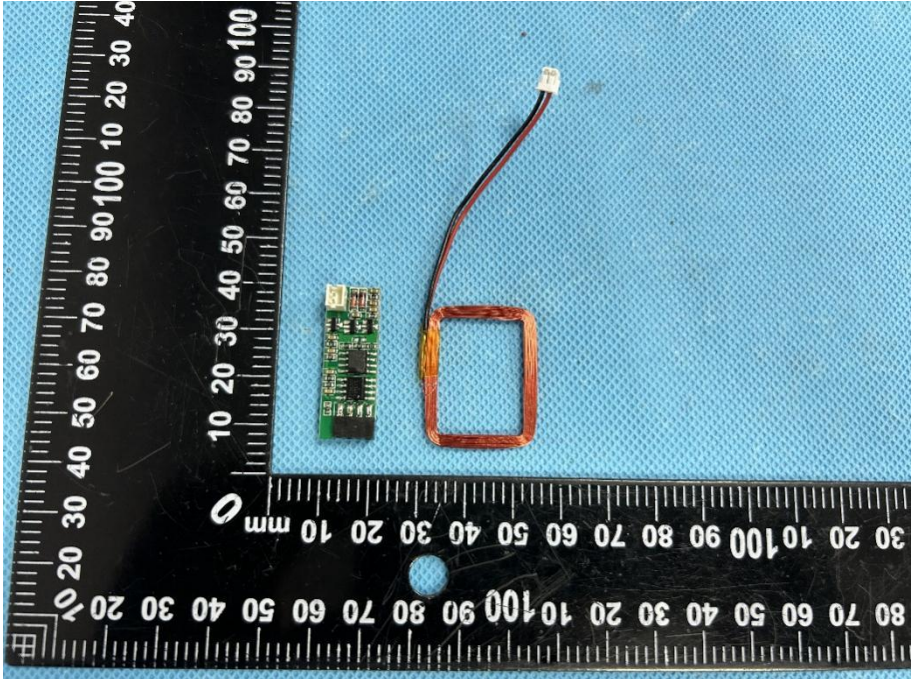

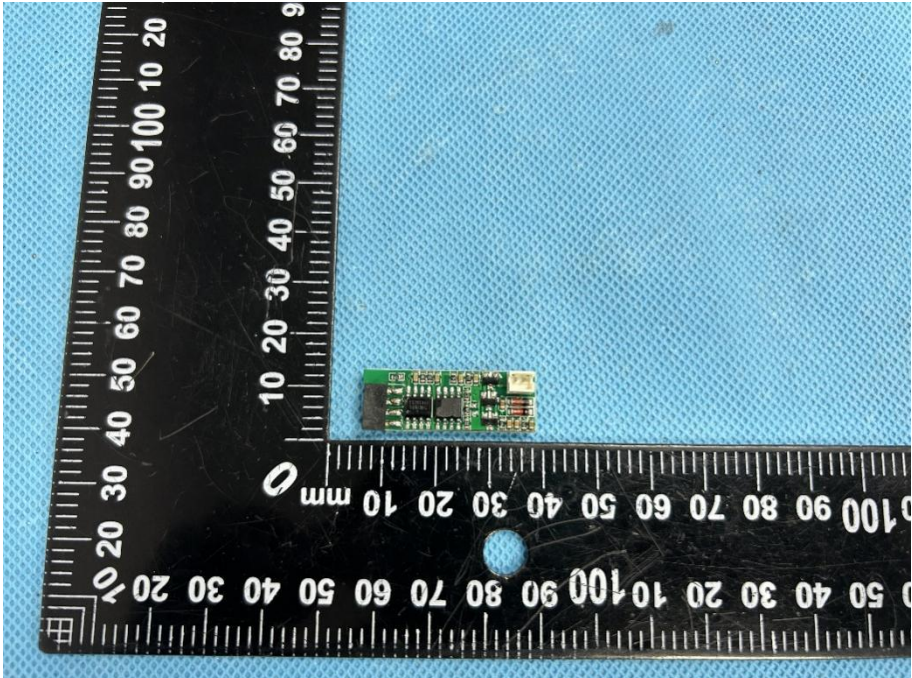

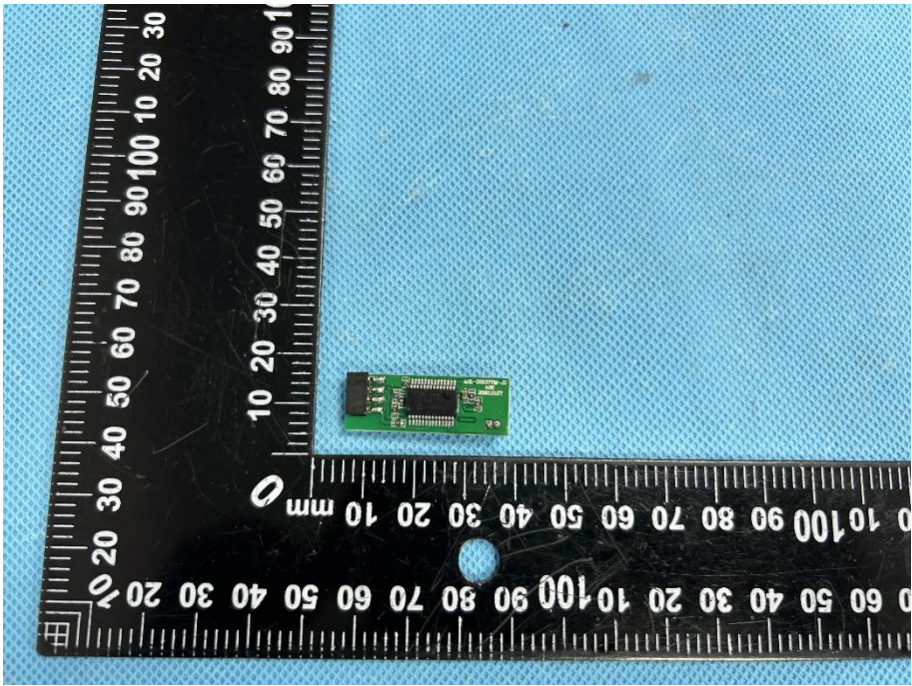

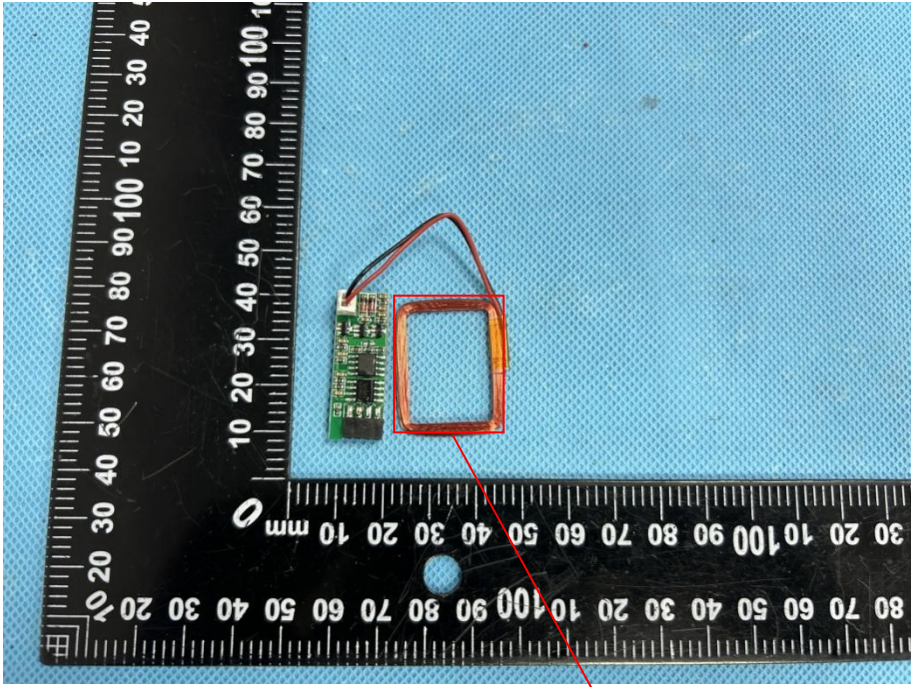

EXHIBIT 3 - EUT INTERNAL PHOTOGRAPHS

<p>EUT Housing and Board View 1</p>	 A photograph showing a small green printed circuit board (PCB) and a square-shaped copper coil component. The PCB has several surface-mounted components and a small white connector. The coil is made of thin copper wire. Both components are placed on a blue textured surface next to a black L-shaped ruler for scale. The ruler has markings in millimeters, with the vertical scale ranging from 0 to 100 mm and the horizontal scale from 0 to 100 mm.
<p>Solder Board-Component View 1</p>	 A close-up photograph of the same green PCB component shown in the first image. It is positioned on a blue textured surface next to a black L-shaped ruler for scale. The ruler's vertical scale is visible, ranging from 0 to 100 mm. The component is centered in the frame, showing its rectangular shape and various surface components.

<p>Solder Board-Component View 2</p>	 <p>A photograph showing a small green printed circuit board (PCB) component with a black integrated circuit (IC) mounted on it. The component is placed on a blue textured surface next to a black L-shaped ruler for scale. The ruler has white markings in millimeters and centimeters. The component is positioned roughly between the 10-20 mm and 30-40 mm marks on the ruler.</p>
<p>Antenna View</p>	 <p>A photograph showing the same green PCB component from the previous view, but with a red rectangular loop antenna attached to it. The antenna is made of a thin red wire. Two thin red wires extend from the top of the antenna loop. The component and antenna are placed on the same blue textured surface next to the same black L-shaped ruler. A red rectangular box highlights the antenna loop, and a red line points from this box to a label in the bottom right corner of the image area.</p> <p data-bbox="1171 1682 1418 1744">125kHz Antenna</p>
