2.2 Additional information about the EUT

The EUT consists of the following units:

Unit	Type	Serial number

The EUT was tested with the following cables:

Port:	Type:	Length: [m]	Specifications:
AC Mains	AC Power	1 m	--

2.3 Peripheral equipment

Peripheral equipment is equipment needed for correct operation of the EUT, but not included as part of the testing and evaluation of the EUT.

Equipment	Type / Model	Manufacturer	Serial no.
Transmitter	--	Essity	--

2.4 Test signals and operation modes

EUT can transmit either BLE or 802.15.4 and EUT can transmit either GSM or LTE-m. Any combination of these is possible i.e the BLE model can operate both with GSM or LTE-m and the 802.15.4 model can also operate with GSM or LTE-m. An assessment before the tests concluded that there was no noticeable difference for spurious emissions whether LTE-m or GSM was operated at the same time as BLE or 802.15.4. Therefore, in these tests the EUT had BLE and LTE-m active together and 802.15.4 and GSM active together.

This report covers BLE and 802.15.4 techniques.
