Product name: **GigaCenter**

To whom it may concern,

Regarding to your questions on "U-NII Declaration letter for Software Security requirements 844F 844FB"

b	What parameters are accessible or modifiable by the professional installer or system integrators?
	Only the country code is configurable by the authenticated installer.

"Please clarify the country code configuration. In the Software Security document, it is mentioned that the country code can be changed by an authenticated installer. Are these users within the service providers or manufacturer? Do they use a different GUI to make this change?"

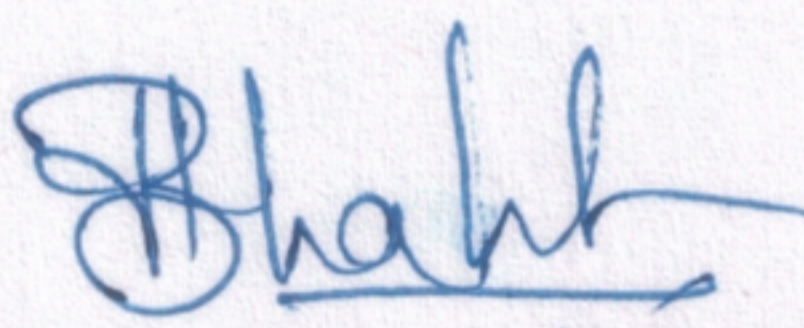

See Calix reply below:

The authenticated installer means authorized service providers. They use a different GUI make the change while a general end user has no access to that particular GUI.

Sincerely yours,

Applicant : **Calix Inc.**
