# FCC REPORT

| Applicant:              | SKY PHONE LLC  |  |  |  |
|-------------------------|--|--|--|--|
| Address of Applicant:   | 1348 Washington Av. Suite 350, Miami Beach, FL 33139 |  |  |  |
| Equipment Under Test (E | EUT)   |  |  |  |
| Product Name:           | 4G Smart Phone                                       |  |  |  |
| Model No.:              | Sky BlackMax   |  |  |  |
| Trade mark:             | SKY DEVICES  |  |  |  |
| FCC ID:                 | 2ABOSSKYBLACKMX                                      |  |  |  |
| Applicable standards:   | FCC CFR Title 47 Part 15 Subpart C Section 15.247    |  |  |  |
| Date of sample receipt: | 02 Jul., 2021  |  |  |  |
| Date of Test:           | 03 Jul., to 27 Jul., 2021                            |  |  |  |
| Date of report issued:  | 27 Jul., 2021  |  |  |  |
| Test Result:            | PASS*  |  |  |  |

\* In the configuration tested, the EUT complied with the standards specified above.

This report details the results of the testing carried out on one sample. The results contained in this test report do not relate to other samples of the same product and does not permit the use of the JYT product certification mark. The manufacturer should ensure that all products in series production are in conformity with the product sample detailed in this report.

This report may only be reproduced and distributed in full. If the product in this report is used in any configuration other than that detailed in the report, the manufacturer must ensure the new system complies with all relevant standards.

This document cannot be reproduced except in full, without prior written approval of the Company. Any unauthorized alteration, forgery or falsification of the content or appearance of this document is unlawful and offenders may be prosecuted to the fullest extent of the law. Unless otherwise stated the results shown in this test report refer only to the sample(s) tested and such sample(s) are retained for 90 days only.

## 4 Test Summary

| Test Items                                       | Section in CFR 47   | Test Data               | Result |
|--|---------------------|-------------------------|--------|
| Antenna requirement                              | 15.203 & 15.247 (b) | See Section 6.1         | Pass   |
| AC Power Line Conducted Emission                 | 15.207              | See Section 6.2         | Pass   |
| Duty Cycle                                       | ANSI C63.10-2013    | Appendix A – 2.4G Wi-Fi | Pass   |
| Conducted Peak Output Power                      | 15.247 (b)(3)       | Appendix A – 2.4G Wi-Fi | Pass   |
| 6dB Emission Bandwidth<br>99% Occupied Bandwidth | 15.247 (a)(2)       | Appendix A – 2.4G Wi-Fi | Pass   |
| Power Spectral Density                           | 15.247 (e)          | Appendix A – 2.4G Wi-Fi | Pass   |
| Conducted Band Edge                              |                     | Appendix A – 2.4G Wi-Fi | Pass   |
| Radiated Band Edge                               | 15.247 (d)          | See Section 6.6.2       | Pass   |
| Conducted Spurious Emission                      |                     | Appendix A – 2.4G Wi-Fi | Pass   |
| Radiated Spurious Emission                       | 15.205 & 15.209     | See Section 6.7.2       | Pass   |
| Remark:  | 1                   | 1                       | 1      |

1. Pass: The EUT complies with the essential requirements in the standard.

2. N/A: Not Applicable.

3. The cable insertion loss used by "RF Output Power" and other conduction measurement items is 0.5dB (provided by the customer).

Test Method:

ANSI C63.10-2013 KDB 558074 D01 15.247 Meas Guidance v05r02

# 5 General Information

## 5.1 Client Information

| Applicant:    | SKY PHONE LLC  |
|---------------|--|
| Address:      | 1348 Washington Av. Suite 350, Miami Beach, FL 33139 |
| Manufacturer: | SKY PHONE LLC  |
| Address:      | 1348 Washington Av. Suite 350, Miami Beach, FL 33139 |

## 5.2 General Description of E.U.T.

| Product Name:                                    | 4G Smart Phone  |
|--|---|
| Model No.:                                       | Sky BlackMax  |
| Operation Frequency:                             | 2412MHz~2462MHz: 802.11b/802.11g/802.11n(HT20)                                |
| Channel numbers:                                 | 11: 802.11b/802.11g/802.11(HT20)  |
| Channel separation:                              | 5MHz  |
| Modulation technology:<br>(IEEE 802.11b)         | Direct Sequence Spread Spectrum (DSSS)  |
| Modulation technology:<br>(IEEE 802.11g/802.11n) | Orthogonal Frequency Division Multiplexing(OFDM)                              |
| Data speed (IEEE 802.11b):                       | 1Mbps, 2Mbps, 5.5Mbps, 11Mbps   |
| Data speed (IEEE 802.11g):                       | 6Mbps, 9Mbps, 12Mbps, 18Mbps, 24Mbps, 36Mbps, 48Mbps, 54Mbps                  |
| Data speed (IEEE 802.11n):                       | Up to 72.2Mbps  |
| Antenna Type:                                    | Internal Antenna  |
| Antenna gain:                                    | 0.5dBi  |
| Power supply:                                    | Rechargeable Li-ion Battery DC3.7V, 1400mAh                                   |
| AC adapter:                                      | Input: AC100-240V, 50/60Hz, 0.15A<br>Output: DC 5.0V, 500mA                   |
| Test Sample Condition:                           | The test samples were provided in good working order with no visible defects. |

| Operation Frequency each of channel for 802.11b/g/n(HT20) |           |         |           |         |           |         |           |  |
|---|-----------|---------|-----------|---------|-----------|---------|-----------|--|
| Channel   | Frequency | Channel | Frequency | Channel | Frequency | Channel | Frequency |  |
| 1   | 2412MHz   | 4       | 2427MHz   | 7       | 2442MHz   | 10      | 2457MHz   |  |
| 2   | 2417MHz   | 5       | 2432MHz   | 8       | 2447MHz   | 11      | 2462MHz   |  |
| 3   | 2422MHz   | 6       | 2437MHz   | 9       | 2452MHz   |         |           |  |
| Note:   |           |         |           |         |           |         |           |  |

1. For 802.11n-HT40 mode, the channel number is from 3 to 9;

2. Channel 1, 6 & 11 selected for 802.11b/g/n-HT20 as Lowest, Middle and Highest channel.

## 5.3 Test environment and mode

| Operating Environment: |   |
|------------------------|---|
| Temperature:           | 24.0 °C   |
| Humidity:              | 54 % RH   |
| Atmospheric Pressure:  | 1010 mbar   |
| Test mode:             |   |
| Transmitting mode      | Keep the EUT in continuous transmitting with modulation |

Radiated Emission: The sample was placed 0.8m (below 1GHz)/1.5m (above 1GHz) above the ground plane of 3m chamber. Measurements in both horizontal and vertical polarities were performed. During the test, each emission was maximized by: having the EUT continuously working, investigated all operating modes, rotated about all 3 axis (X, Y & Z) and considered typical configuration to obtain worst position, manipulating interconnecting cables, rotating the turntable, varying antenna height from 1m to 4m in both horizontal and vertical polarizations. The emissions worst-case are shown in Test Results of the following pages. We have verified the construction and function in typical operation. All the test modes were carried out with the EUT in transmitting operation, which was shown in this test report and defined as follows:

#### Per-scan all kind of data rate, the follow list were the worst case.

| Mode          | Data rate |
|---------------|-----------|
| 802.11b       | 1Mbps     |
| 802.11g       | 6Mbps     |
| 802.11n(HT20) | 6.5Mbps   |

## 5.4 Description of Support Units

The EUT has been tested as an independent unit.

### 5.5 Measurement Uncertainty

| Parameters                          | Expanded Uncertainty |
|-------------------------------------|----------------------|
| Conducted Emission (9kHz ~ 30MHz)   | ±1.60 dB (k=2)       |
| Radiated Emission (9kHz ~ 30MHz)    | ±3.12 dB (k=2)       |
| Radiated Emission (30MHz ~ 1000MHz) | ±4.32 dB (k=2)       |
| Radiated Emission (1GHz ~ 18GHz)    | ±5.16 dB (k=2)       |
| Radiated Emission (18GHz ~ 40GHz)   | ±3.20 dB (k=2)       |

## 5.6 Laboratory Facility

The test facility is recognized, certified, or accredited by the following organizations:

#### • FCC - Designation No.: CN1211

JianYan Testing Group Shenzhen Co., Ltd. has been accredited as a testing laboratory by FCC(Federal Communications Commission). The test firm Registration No. is 727551.

#### • ISED – CAB identifier.: CN0021

The 3m Semi-anechoic chamber of JianYan Testing Group Shenzhen Co., Ltd. has been Registered by Certification and Engineering Bureau of Industry Canada for radio equipment testing with Registration No.: 10106A-1.

#### • A2LA - Registration No.: 4346.01

This laboratory is accredited in accordance with the recognized International Standard ISO/IEC 17025:2005 General requirements for the competence of testing and calibration laboratories. The test scope can be found as below link: <u>https://portal.a2la.org/scopepdf/4346-01.pdf</u>

#### 5.7 Laboratory Location

JianYan Testing Group Shenzhen Co., Ltd. Address: No.101, Building 8, Innovation Wisdom Port, No.155 Hongtian Road, Huangpu Community, Xinqiao Street, Bao'an District, Shenzhen, Guangdong, People's Republic of China. Tel: +86-755-23118282, Fax: +86-755-23116366 Email: info-JYTee@lets.com, Website: <u>http://www.ccis-cb.com</u>

## 6.3 Conducted Output Power

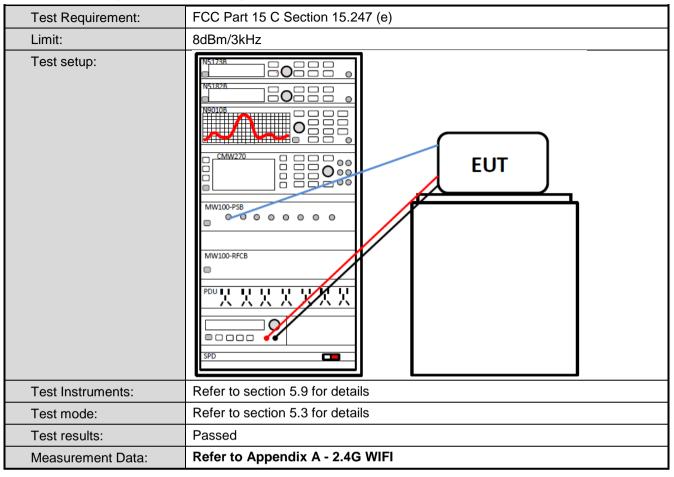

## 6.4 Occupy Bandwidth

## 6.5 Power Spectral Density

## 6.6 Band Edge

#### 6.6.1 Conducted Emission Method

| Test Requirement: | FCC Part 15 C Section 15.247 (d)   |
|-------------------|--|
| Limit:            | In any 100 kHz bandwidth outside the frequency band in which the spread spectrum intentional radiator is operating, the radio frequency power that is produced by the intentional radiator shall be at least 20 dB below that in the 100 kHz bandwidth within the band that contains the highest level of the desired power, based on either an RF conducted or a radiated measurement. If the transmitter complies with the conducted power limits based on the use of RMS averaging over a time interval, as permitted under paragraph(b)(3) of this section, the attenuation required under this paragraph shall be 30 dB instead of 20 dB. |
| Test setup:       |  |
| Test Instruments: | Refer to section 5.9 for details   |
| Test mode:        | Refer to section 5.3 for details   |
| Test results:     | Passed   |
| Measurement Data: | Refer to Appendix A - 2.4G WIFI  |

# 6.7 Spurious Emission

#### 6.7.1 Conducted Emission Method

| Test Requirement: | FCC Part 15 C Section 15.247 (d)   |
|-------------------|--|
| Limit:            | In any 100 kHz bandwidth outside the frequency band in which the spread spectrum intentional radiator is operating, the radio frequency power that is produced by the intentional radiator shall be at least 20 dB below that in the 100 kHz bandwidth within the band that contains the highest level of the desired power, based on either an RF conducted or a radiated measurement. If the transmitter complies with the conducted power limits based on the use of RMS averaging over a time interval, as permitted under paragraph(b)(3) of this section, the attenuation required under this paragraph shall be 30 dB instead of 20 dB. |
| Test setup:       |  |
| Test Instruments: | Refer to section 5.9 for details   |
| Test mode:        | Refer to section 5.3 for details   |
| Test results:     | Passed   |
| Measurement Data: | Refer to Appendix A - 2.4G WIFI  |

#### 6.7.2 Radiated Emission Method

| Test Requirement:     | FCC Part 15 C Se   | ction 15  | .209 ar  | nd 15.205     |        |          |                                     |
|-----------------------|--|-----------|----------|---------------|--------|----------|-------------------------------------|
| Test Frequency Range: | 9kHz to 25GHz  |           |          |               |        |          |                                     |
| Test Distance:        | 3m or 10m  |           |          |               |        |          |                                     |

Remark:

1. Final Level = Receiver Read level + Antenna Factor + Cable Loss – Preamplifier Factor.

- 2. The emission levels of other frequencies are lower than the limit 20dB and not show in test report.
- 3. The Aux Factor is a notch filter switch box loss, this item is not used.

#### Above 1GHz
