1- WELCOME

Congratulations on your purchase of the BLUmobile phone. Your phone provides many functions which are practical for daily use, such as a hands-free loudspeaker, camera, MP3 player, internet and much more.

You can read the manual to understand how to use M7L Mobile phone and experience the well-established functions and simple operation method. Please use the original accessory in order to achieve the best use of effects. Use of non-original components may lead to damage caused to the machinery, in which case BLU shall not be responsible. BLU Warranty Certificate enclosed at the end.

1.1. Exciting Features

- Android Q Go
- 6.52" HD+
- Cameras (8M+13M&2M)
- External Memory (Expandable upto32 GB)
- Dual SIM
- Multimedia player
- Gravity sensor
- Wi-Fi
- GPS
- Battery 4000mAh

▪ For your safety

Read this simple guideline. Avoiding them may be dangerous or illegal. Read the complete user manual for further information.

	Do not switch your phone on when the use of wireless devices is prohibited or when the wireless device may cause interference or danger.
	Do not use your phone while driving.
	Follow relevant rules or regulations in hospitals and health care facilities. Switch your phone off near medical devices.
	Switch your phone off in an aircraft. The radio signal from it may cause interference in signals of the aircraft.
	Switch your phone off near high-precision electronic devices. It may affect the performance of these devices.
	Do not attempt to disassemble your phone or its accessories. Only qualified personnel may service or repair the phone.
	Do not place your phone and its accessories in containers with strong electromagnetic field.
	Do not place magnetic storage media near your phone. Radiation from the phone may erase the information stored on them.
	Do not put your phone in a high-temperature place or use it in a place with flammable gas such as a petrol pumps.
	Keep your phone and its accessories away from children. Do not allow children to use your phone without guidance.
	Respect other's privacy and legal rights when using your phone.

3- GETTING STARTED

3.1. Insert SIM card

M7L is a Dual SIM mobile phone allowing you to use the facility of two networks. Both sim have micro slot.

To insert SIM card(s):

- Turn off the phone and use the ejector pin to remove the card slot.
- Insert the SIM card correctly in the card slot(s). (see below fig)

Insert SIM card carefully!

- Finally inserted into the card slot.

▪ **3.2. Insert Memory card**

M7L allows you to expand external memory with a micro SD card, up to 128 GB.

- Turn off the phone and use the ejector pin to remove the card slot.

Insert the memory card into the slot.

- Finally inserted into the card slot.
Use only compatible memory cards. Incompatible memory

cards may damage the card or the device will corrupt the data stored in the card.

3.3. Unlock the Phone

You may need to provide PIN, Password, Fingerprint, Face authentication or draw a Pattern to unlock your phone.

To unlock the screen:

- Press the power key to wake up the phone.
- Hold and drag the unlock icon to upside to unlock.

You may be required to unlock your phone based on the unlock method in settings.

To set the unlock method:

- On the main menu, touch **Settings > Security**.
- Touch set up screen lock.
- Choose the type of locking as desired. You can set your screen lock on the basis of Pattern, PIN, Password, Fingerprint, Face authentication or none.

3.4. Using the Touch screen

You can use the touch screen in the following ways:

- **Touch:** Acts on items on the screen, such as application and settings icons, to type letters and symbols using the

onscreen keyboard, or to press onscreen buttons.

- **Touch and hold:** Touch and hold an item on the screen until an action occurs.
 - **Drag:** Touch and hold an item and move your finger on the screen until you reach the target position.
 - **Swipe or slide:** Quickly slide your finger across the surface of the screen, (without dragging an item). For example, slide the screen up or down to scroll a list,
 - **Pinch:** In some applications (Such as Browser, and Gallery) you can zoom in and out by placing two fingers on the screen at once and pinching them together (to zoom out) or spreading them apart (to zoom in).
-
- **Rotate the screen:** On most screens, the orientation of the screen changes as you rotate it. You can turn this feature ON and OFF.

3.5. Using the Phone's Buttons

The phone's buttons offer a lot of functions and shortcuts.

Button	Press
	<u>Menu</u> : This is used for recent application
	<u>Home</u> : returns to Home screen.
	<u>Back</u> : Returns to the main screen.

The phone provides you with **Context** menus and **Options** menus for accessing the features in an intuitive way.

3.6. Context Menus

You can open context menu by touching  or  key. Not

User Manual

all screens have context menus. Examples of context menu from Contacts and call environment.

You haven't added any favorites yet

[Add a favorite](#)

3.7. Options menus

When you touch and hold some items on a screen, an Options menu opens.

3.8. Menu Icons

You have the following menu icons to easily let you access its important features:

Opens the dialer

Opens messages

Opens the browser

4-PLACING AND RECEIVING CALLS

You can dial a phone number or touch a number in your contacts. You can also place from the call log or contacts.

4.1. Make a Call

- Tap the  icon on main menu or the home screen to dial the desired number.
- Touch the  icon on main menu or the home screen to make a call from contact, groups or favorites.
 - To dial an international number, touch and hold the 0 key to enter the Plus (+) symbol, and then enter the international country prefix, followed by the phone number
- Touch the  icon to call with SIM 1 or SIM 2.
- Press the **Volume Up/ Down** keysto adjust the call volume.
- You can access **Call Logs, Contacts** from the dialer screen.
- While during a call, touch the  icon to end a call.

4.2. Disable Phone Calls (Airplane mode)

Some locations like airplanes may require you to turn off your mobile, Wi-Fi, and Bluetooth wireless connections.

- Touch the drop down from the top to open the status bar..
- Touch the **Airplane mode**.

4.3. Disable SIM card

If you want to close the SIM card, go to:

Settings -> More

> SIM cards.

> turn off SIM1/SIM2

5-THE HOME SCREEN

When you sign in, the home screen opens.

The Home screen is your starting point to access all the

features on your phone.

The status bar shows the time, signal strength, battery status, and notification.

Touch and hold to move or remove an icon or a widget.

5.1. Open and Close the Launcher

The phone is directly on the main menu after booting.

You have access to all applications installed on your device and their widgets when available.

Touch an application to open and launch it.

To add an application shortcut to another location, press and hold it until it enters the desired location. Place it and release your finger.

Slide the Launcher left or right to bring more icons into view.

As soon as you install a new application, it comes in this list.

Widgets come when you long press on the home screen. You can touch WIDGETS directly.

You cannot launch widget like an application; you can only place it on desktop screen.

Press and hold it until it enters Home screen. Place it and release your finger. A context menu opens to configure the widget or resize it, naturally, it depends on the widget.

5.2. Switch to Recently Used Application

- Press the  icon for open recently used application.
- Touch an icon to open its application. Or press  to return to the current application.

5.3. Customize Home Screen

You can add applications, shortcuts, widgets, and other items to any part of the Home screen or change the wallpaper.

Widgets:

- Long press on home screen for widgets.
- Drag a widget to a home screen: Touch and hold the widget's icon, slide your finger where you want to place it, and lift your finger.
- You may be asked to make further choices before the widget activates. If there isn't room where you dropped it, the widget won't get added to the Home Screen.

Wallpapers: Wallpapers are images from Gallery, still images included with the system. They take the place of the default background for your Home Screen.

Touch and hold anywhere on a desktop Home screen that's not occupied. A list of options appears.

- Touch the following wallpaper source:
 - **Device folders:** Choose from pictures that you've taken with camera or downloaded to your device.
- To set wallpaper, touch right option then select Set wallpaper.

Folders: You can very easily regroup desktop icons in a folder on screen to save space and access more applications.

- Touch and hold any icon on desktop screen to move it.
- Go on another icon and release to create a folder containing both icons.
- Then add as many icons as folder can hold, give it a name, move it where you want.

You have all the tools to customize your Phone.

6-CONNECT TO THE INTERNET

6.1. To configure your Internet:

- **Go to Settings >More>SIM1 or SIM2>Turn on 'Mobile data'**
 - By default, your network provider sends the Access Point Name settings via SMS, or it comes automatically with your SIM card. You may need to install these settings. After this, you can choose from the listed access point names. If the access point names are not listed by default, please contact your network provider for the same.
 - To add any operator Access point Name, go to **Settings >More >SIM1 or SIM2> Access point Names>add.**
 - After you have selected or configured the access point name, go to **Settings >More >SIM1 or SIM2> Data usage** to enable Internet connection.

6.2. Access Internet via Wi-Fi

To browse the Internet via Wi-Fi:

- Go to **Settings>WIFI.**
- Next, select the Wi-Fi connection listed under Wi-Fi networks.

7-MANAGING NOTIFICATIONS

Notification icons inform you of new messages and events. When you receive a notification, its icon appears in the status bar, along with a summary.

7.1. Open the Notifications Panel

Drag the status bar down from the top of the screen as shown below:

The Notifications panel displays your network provider name and a list of your current notifications.

7.2. Respond to Notifications

Open the notification panel and touch a notification to respond to it. What happens next depends on the notification.

7.3. Close Notifications Panel

Drag the tab at the bottom of the Notifications panel to the top of the screen. Or just press the back button. The panel also closes when you touch a notification to respond to it.

8-MESSAGING

8.1. Message environment & Settings

You can use Messages to exchange text messages and multimedia messages with your friends.

9:00 AM      100%

Messages  

Once you start a new conversation,
you'll see it listed here

The **messages settings** allow you to set SMS/MMS notifications, vibrate, message tones, delivery reports and many others.

Take a tour and explore messages settings, you'll find interesting things.

8.2. Using the Onscreen Keyboard

Some applications display the keyboard by default. In others, you touch a text field where you want to enter text, to open the keyboard.

User Manual

Recipient zone: write the name, press right icon to enter numbers or press below frequents or all contacts to access contacts list

Write your message here. After typing, press  icon to close the keyboard. Touch and hold the text field to open a menu and to copy/cut texts.

Touch once to capitalize the next letter you type. Touch and hold or double tap for Caps Lock.

Secondary characters panel (special, symbols, numbers)

This is to erase characters

8.3. Create and Send Multimedia Message

A Message becomes an MMS if you send it to an email address, or add multimedia file(s).

- Touch compose new message.
- Enter or select a mobile phone number.
- Touch the composition text box and write your message.
- Touch Attach to attach various types of files.
- Send the MMS.

8.4. Operation on a message:

- Open the message thread containing the message you want to operate.

Touch and hold this message until menu bar comes above.

Make your choice:

- To share the message.
- To forward a message.

- To copy the message.
- To view the message details.
- To delete the message.

9-MULTIMEDIA

9.1. Camera

Your camera's pictures and videos are stored in both the SD card and device. You can copy pictures and videos from both the SD card and device to a PC and vice versa.

Click on settings icon for more functions

9.2. Gallery

You can use the Gallery to view pictures, play videos and share files.

- Touch the Gallery icon in the main menu.
- Touch an album to open and view its contents.
- Touch a picture or a video in an album to view it.

9.3. Share an image

- Open the main Photos window.
- Check or uncheck the image you want to share.
- Touch the  icon at the bottom of screen to share via Bluetooth, Email, etc.
- You can share via email, Bluetooth, and so on.

9.4.YT Music

You can easily transfer your favorite music from your PC to the SD card and experience a whole world of interesting and melodious music.

Press the phone's volume up/down keys on the right side of the mobile phone to adjust the volume.

9.5. FM Radio

You can listen to your favorite FM channels using the inbuilt FM receiver of your phone and a corded earphone (the wire is

used as antenna).

- Record sound
- Search FM stations
- Enable speaker

Press the phone's volume up/down keys on the right side of the mobile phone to adjust the volume.

9.6. Record Sounds

- Touch the Sound Recorder in the main menu.
- Tap  to start recording a voice clip. "Recording" appears when it is recording a voice clip.
- Tap  to stop and save the recording.

9.7. Make Screenshot

Press and hold for 1 second both Volume Down and Power buttons together. Or also you can long press Power Key to get Screenshot function

Tap to make screenshot

9.8. New features of the volume control

Android Q uses the vertical volume interface, which users can pop up by short press the volume button. It is very convenient to switch the Audio Profiles and adjust the volume.

- Tap to switch audio
- Slide up or down to adjust volume
- Tap to access settings

10-CONNECT TO NETWORKS AND DEVICES

Your phone can connect to a variety of networks and devices, including Wi-Fi, GPRS, Bluetooth, devices, such as headsets. You can also transfer files to/from your PC through the data cable.

10.1. Connect to PC

You can connect your phone to PC via following options:
Connect the phone to your PC with the help of USB cable.
“**Charging this device via USB**” notification will be shown.
Touch the notification, to change and connect to other modes.

Charge only: Phone will only be charged when selected in charge only mode.

Media device(MTP):This feature will let you manage files on the phone and computer at the same time.

Camera(PTP):Let you transfer photos using camera software and manage pictures on computers.

10.2. Connect to Internet

Refer to section 6 for details.

10.3. Connect to Wi-Fi Networks

Refer to Section 6 for details.

10.4. Pair with Bluetooth Devices

- Go to Settings > Connected devices> Connection Preference>Bluetooth.
- If Bluetooth is off, check Bluetooth to turn it on. Your phone scans and displays the Bluetooth devices in range.
- If the device you want to pair with is not in the list, make it discoverable.
- Your phone will remain scanned until it is discoverable by other devices.
- Touch the ID of the other device in the list Settings to pair them. If you are prompted to for a password, enter any password on one device and enter the same password you entered in the other device to be paired, If the pairing is successful, your phone gets connected to the device.

10.5. Connect to Internet via your Phone

You can browse the Internet on your PC using your mobile phone. To do this:

- Connect your mobile phone to your PC via the USB cable.
- Go to Settings> Hotspot & tethering > USB Tethering.

A prompt for installation will appear on your PC. Proceed as suggested.

Maybe you need to manually install the drivers in PC.

10.6. Install Secure Certificate from SD Card

If your VPN or Wi-Fi Network relies on secure certificates, you must obtain the certificates and store them in your phone's storage, before you can configure access to those VPN or Wi-Fi networks on your phone.

You may need to download the certificates from a website.

- Copy the certificate from your computer to the root of the SD card.
- Touch Settings> Security>Encryption & credentials.
- Touch Install from SD card under Credential Storage.
- Touch the file name of the certificate to install. Only the names of certificates that you have not already installed on your phone are displayed.

- If prompted, enter the certificate's password and touch OK.
- Enter a name for the certificate and touch OK.

11-DOWNLOAD APPLICATIONS

The phone has a default configuration which includes some applications. Discover all others apps by using play store. You will be able to connect with mobile data or Wi-Fi for example, and by signing in the application with just an email.

This is what it looks like:

12-PHONE SETTINGS

You can go to Settings to customize your phone's preferences and behavior in a variety of ways:

Network&inter net	Let's you manage WIFI,mobile,data usage,hotspot,etc.
Connected devices	Let's you manage Bluetooth tocommunicate with other Bluetooth devices,or choose USB connection mode.
Apps & notifications	Let's you view all applications downloaded or on SD card and manage all running applications in devices.
Battery	Let's you check the battery level ,status and manage battery usage.
Display	Let's you configure brightness and other screen settings.
Scheduled power on/off	Let's you set the automatic power on time or shutdown time.
Sound	Let's you configure how and at what volume the phone rings, vibrates etc.
Storage	Let's you see and manage available space on your phone and on your SD card.
Privacy	Set password display and lock screen display, etc.
Security & Location	Let's you protect personal information, like adjust your phone's lock, set SIM card lock etc. And set the location related settings.
Accounts	Let's you add, remove and manage your Google and other supported accounts.
Accessibility	Enable your installed accessibility applications and adjust related settings.
Google	Here list google services&preferences.
System	Set language, time and date & restore factory settings, etc.
About device	View information about your phone, such as signal strength, status and phone information.

13- HEALTH AND SAFETY INFORMATION

Certification Information (RoHS)

We at BLU take our social responsibility seriously and are committed to the cause of saving our environment; it is in keeping with these commitments that we are proud to state

that BLU phones are **RoHS compliant**.

Certification Information (SAR)

Your phone is designed not to exceed the limits of emission of radio waves recommended by international guidelines. These guidelines include safety margins designed to assure the protection of all persons, regardless of age and health.

SAR (specific absorption rate) is the unit of body-absorbed RF quantity when the phone is in use. SAR value is ascertained according to the highest RF level generated during laboratory tests.

The true SAR level during phone usage will be far lower than this level.

The SAR value of the phone may change depending on factors such as how close you are to a network tower, use of accessories and other enhancements.

The SAR value may differ depending on national reporting, testing requirements and the network band.

SAR Recommendations

Use a wireless hands-free system (headphone, headset) with a low power Bluetooth emitter.

Please keep your calls short and use SMS whenever more convenient. This advice applies especially to children, adolescents and pregnant women.

Prefer to use your cell phone when the signal quality is good. People having active medical implants should preferably keep the cell phone at least 15 cm away from the implant.

Maintain a preferable distance of 15 cm from the device.

Safe Driving

Do not use the phone while driving. When you have to use the phone, please use the personal hands-free kit.

Please do not put the phone onto any passenger seat or any place from which it may fall down in case of vehicular collision or emergency braking.

During Flight

Flight is influenced by interference caused by the phone. It is illegal to use a phone on the airplane. Please turn off your phone or switch to flight mode during a flight.

In Hospitals

Your Phone's radio waves may interfere with the functioning medical devices. Consult a physician or the manufacturer of the medical device to determine whether they are adequately shielded from external Radio Frequency. Switch off your device when regulations instruct you to do so.

Do not carry the wireless device in the upper pocket.

Turn off the phone if there is any reason to suspect that interference is taking place.

Unsafe Areas

Please turn off your phone when you are close to a gas station or in the vicinity of any place where fuel and chemical preparations, or any other dangerous goods are stored.

Taking Care of Your Device

Your device is a product of superior design and craftsmanship and should be handled with care: The following suggestions will help you protect your phone:

Keep the device dry. If your device gets wet, remove the battery without turning on the device, wipe it with a dry cloth and take it to the service center.

Do not store the device in high or cold temperature. High / cold temperature can shorten the life of electronic devices and damage batteries.

Do not use or store the device in dusty, dirty areas. Its moving parts and electronic components can be damaged.

Do not attempt to open the device other than as instructed in this guide. Repairing the phone by yourself other than our authorized service agents/centers goes against the warranty rules.

Do not drop, knock, or shake the device. Rough handling can break internal circuit boards and fine mechanics.

Do not use harsh chemicals, cleaning solvents, or strong detergents to clean the device. Only use a soft, clean, dry cloth to clean the surface of the device.

Do not store your device near magnetic fields or allow your device to come in contact with magnetic fields for extended period of time.

Battery Recommendations

Please put the battery in a well-ventilated place out of direct sunlight. Charge the battery at room temperature range.

If the time span of the battery after charging becomes much shorter than usual, the battery life is at an end. Replace the battery with a new battery of the same make and specification.

Do not discard the battery with household trash. Please dispose of used battery according to your local environmental laws and guidelines.

Use manufacturer approved batteries, chargers, accessories and supplies. We will not be responsible for user's safety when using unapproved batteries or accessories.

"It is advisable to charge battery to 100% before start using phone for better battery life"

Recycle Your Phone

The WEEE logo (shown at the left) appears on the product (battery, handset, and charger) to indicate that this product must not be disposed off or dumped with your other household wastes. You are liable to dispose of all your electronic or electrical waste equipment by relocating over to the specified

collection point for recycling of such hazardous waste.

Collection and proper recovery of your electronic waste equipment's at the time of disposal will allow us to help preserve the environment. Recycling of the electronic waste equipment will ensure safety of human health and environment.

Do's and Don'ts for disposal e-waste

Do's:

Ensure that an Authorized Person repairs your M7L products.

Call Our Local Authorized Collection Centers to Dispose M7L products.

Always drop your used electronic products, batteries or any accessories thereof after the end of their life at nearest Authorized Collection Point or Collection Center.

Separate the packaging material according to responsible waste disposal options and sorting for recycling.

Always remove the battery from the product, when you do not intend to use the product anymore it in future.

Don'ts:

Do not Dismantle your M7L product on your own

Do not give your e-waste to KabbadiWala / Scrap Dealer/ Rag Pickers.

Do not dispose-off the e-waste in landfills.

Never dump E-waste in garbage bins.

Do not dispose of your product at municipal waste bins or rooms.

Do not throw used batteries into household waste.

Consequences of improper handling and disposal of E-Waste

Improper disposal of waste prevents natural resources from being re-used.

Some waste contains hazardous chemicals and if not disposed of properly may release toxins into the soil and water, and also releases greenhouse gases into the environment

If e-waste is not properly disposed of, it can threaten the health and well-being of humans and animals and it also has an adverse effect on the environment.

Placing of batteries or devices on or in heating devices, such as microwave, ovens, stoves, or radiators and improper disposal of batteries may lead to explosion.

If the battery terminals are in contact with metal objects, it may cause a fire.

Disclaimers

The colors and specifications shown/mentioned in the user manual may differ from the actual product. Images shown are for representation purpose only. Other product logos and company names mentioned herein may be trademarks or trade names of their respective owners.

The content of this manual may vary from the actual content displayed in the mobile phone. In such a case, the later shall govern.

We keep the right to make modifications to any of the content in this user guide without public announcement or prior notification.

For devices with external power supplies, plug socket should be placed in short distance and easily accessible.

Using the wrong type battery replacement there is a danger of explosion, be sure to follow the instructions disposal of used

batteries.

Copyrights

All rights reserved. Reproduction, transfer, distribution or storage of part or all of the contents in this document in any form without the prior written permission of is strictly prohibited.

To prevent possible hearing damage, do not listen at high volume levels of long periods.

To use the device only with the earphones included, never change the earphones included for another one.

FCC Statement

1. This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) This device may not cause harmful interference.
- (2) This device must accept any interference received, including interference that may cause undesired operation.

2. Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE:

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation.

This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that

interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

Reorient or relocate the receiving antenna.

Increase the separation between the equipment and receiver.

Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

Consult the dealer or an experienced radio/TV technician for help.

SAR Information Statement

Your wireless phone is a radio transmitter and receiver. It is designed and manufactured not to exceed the emission limits for exposure to radiofrequency (RF) energy set by the Federal Communications Commission of the U.S. Government. These limits are part of comprehensive guidelines and establish permitted levels of RF energy for the general population. The guidelines are based on standards that were developed by independent scientific organizations through periodic and thorough evaluation of scientific studies. The standards include a substantial safety margin designed to assure the safety of all persons, regardless of age and health. The exposure standard for wireless mobile phones employs a unit of measurement known as the Specific Absorption Rate, or SAR. The SAR limit set by the FCC is 1.6 W/kg. * Tests for SAR are conducted with the phone transmitting at its highest certified power level in all tested frequency bands. Although the SAR is determined at the highest certified power level, the actual SAR level of the phone while operating can be well below the maximum value. This is because the phone is designed to operate at multiple power levels so as to use only

the power required to reach the network. In general, the closer you are to a wireless base station antenna, the lower the power output. Before a phone model is available for sale to the public, it must be tested and certified to the FCC that it does not exceed the limit established by the government adopted requirement for safe exposure. The tests are performed in positions and locations (e.g., at the ear and worn on the body) as required by the FCC for each model. The highest SAR value for this model phone when tested for use at the ear is 0.508W/Kg and when worn on the body, as described in this user guide, is 0.768W/Kg(Body-worn measurements differ among phone models, depending upon available accessories and FCC requirements). The maximum scaled SAR in hotspot mode is 0.768W/Kg. While there may be differences between the SAR levels of various phones and at various positions, they all meet the government requirement for safe exposure. The FCC has granted an Equipment Authorization for this model phone with all reported SAR levels evaluated as in compliance with the FCC RFexposure guidelines. SAR information on this model phone is on file with the FCC and can be found under the Display Grant section of <http://www.fcc.gov/oet/fccid> after searching on FCC ID: 2ABOSSYUN55X Additional information on Specific Absorption Rates (SAR) can be found on the Cellular Telecommunications Industry Association (CTIA) web-site at <http://www.wow-com.com>. * In the United States and Canada, the SAR limit for mobile phones used by the public is 1.6 watts/kg (W/kg) averaged over one gram of tissue. The standard incorporates a substantial margin of safety to give additional protection for the public and to account for any variations in measurements.

Body-worn Operation

This device was tested for typical body-worn operations. To comply with RF exposure requirements, a minimum separation distance of 10mm must be maintained between the user's body and the handset, including the antenna. Third-party belt-clips, holsters, and similar accessories used by this device should not contain any metallic components. Body-worn accessories that do not meet these requirements may not comply with RF exposure requirements and should be avoided. Use only the supplied or an approved antenna.
