Modular Approval Request FCC (Per DA 00-1407)	FCC ID: 2ABRUBDRFM20
Items to be covered	Answer From Applicant
1. The modular transmitter must have its own RF shielding.	Yes
2. The modular transmitter must have buffered modulation/data inputs such inputs are provided) to ensure that the module will comply with 15 requirements under conditions of excessive data rates or over- modulation.	(if Yes Part
3. The modular transmitter must have its own power supply regulation	· Yes
4. The modular transmitter must comply with the antenna requirements Section 15.203 and 15.204(c). The antenna must either be permanentl attached or employ a "unique" antenna coupler (at all connections be the module and the antenna, including the cable).	y l
5. The modular transmitter must be tested in a stand-alone configura i.e., the module must not be inside another device during testing. T is intended to demonstrate that the module is capable of complying w Part 15 emission limits regardless of the device into which it is eventually installed.	his
6. The modular transmitter must be labeled with its own FCC ID numbe and, if the FCC ID is not visible when the module is installed insid another device, then the outside of the device into which the module installed must also display a label referring to the enclosed module This exterior label can use wording such as the following: "Contains Transmitter Module FCC ID: XYZMODEL1" or "Contains FCC ID: XYZMODEL1 Any similar wording that expresses the same meaning may be used. Th Grantee may either provide such a label, an example of which must be included in the application for equipment authorization, or, must pr adequate instructions along with the module which explain this requirement. In the latter case, a copy of these instructions must included in the application for equipment authorization.	e is ." e ovide
7. The modular transmitter must comply with any specific rule or operating requirements applicable to the transmitter and the manufac must provide adequate instructions along with the module to explain such requirements. A copy of these instructions must be included in application for equipment authorization. For example, there are ver strict operational and timing requirements that must be met before a transmitter is authorized for operation under Section 15.231. For instance, data transmission is prohibited, except for operation unde Section 15.231(e), in which case there are separate field strength 1 and timing requirements. Compliance with these requirements must be assured.	any the y r evel
B. The modular transmitter must comply with any applicable RF expose requirements. For example, FCC Rules in Sections 2.1091, 2.1093 and specific Sections of Part 15, including 15.319(i), 15.407(f), 15.253( and 15.255(g), require that Unlicensed PCS, UNII and millimeter wave devices perform routine environmental evaluation for RF Exposure to demonstrate compliance. In addition, spread spectrum transmitters operating under Section 15.247 are required to address RF Exposure compliance in accordance with Section 15.247(b)(4). Modular transmi approved under other Sections of Part 15, when necessary, may also ne address certain RF Exposure concerns, typically by providing specifi installation and operating instructions for users, installers and ot interested parties to ensure compliance.	f) tters ed to c

Note: If compliance with one or more of the numbered requirements, listed above, cannot be demonstrated, it may be possible to obtain a "Limited Modular Approval" (LMA).
