

Wattio S.L. request Limited Modular Approval under 47 CFR §15.212 Modular transmitters, based on the below assessment.

Modular Approval Requirements	Yes	No
(a) The radio elements must have the radio frequency circuitry shielded. Physical/discrete and tuning capacitors may be located external to the shield, but must be on the module assembly.	✓	
(b) The module shall have buffered modulation/data input(s) (if such inputs are provided) to ensure that the module will comply with Part 15 Requirements with any type of input signal	✓	
(c) The module shall have its own power supply regulation on the module.		The SERIE module does not have its own DC regulation and so this must be provided by the host equipment.
(d) The module must contain a permanently attached antenna, or contain a unique antenna connector, and be marketed and operated only with specific antenna(s), per Sections 15.203, 15.204(b), 15.204(c), 15.212(a), 2.929(b);	✓	
(e) The module must demonstrate compliance in a stand-alone configuration;	✓	
(f) The module must be labelled with its permanently affixed FCC ID label, or use an electronic display	✓	
(g) The module must comply with all specific rules applicable to the transmitter. The grantee must provide comprehensive instructions to explain compliance requirements;	✓	
(h) The module must comply with RF exposure requirements. For any transmitters intended for use in portable devices, SAR compliance must be demonstrated to be independent of the host device.	✓	

Wattio S.L. is requesting a LMA because we will not allow the general public, OEM integrators or any other 3rd party to use this FCC grant. We will use this FCC ID only in our own products where we can fully control the host requirements.
