

FCC ID: 2ABTD-SERIE1

The module is SAR exempt according to KDB 447498 Section 4.3.1. Standalone SAR test exclusion considerations. At 5mm separation the module meets Portable exposure conditions exemption.

Maximum channel power is maximum tune-up power plus measurement uncertainty at 7dBm or 5mW.

Max Channel Power (mW)	5
Separation Distance (mm)	5
Frequency of Operation (GHz)	2.45

Exclusion Level (mW)	1.6
-----------------------------	------------

Must be ≤ 3 for 1g SAR and ≤ 7.5 for 10g SAR

For stand-alone configurations usage of this module will inherently be compliant for current RF exposure applications in Portable conditions (<20cm usage) in either head/body or extremity configurations.
