

6 Safety Human Exposure

6.1 Radio Frequency Exposure Compliance

6.1.1 Electromagnetic Fields

RESULT:

Pass

Test Specification

Test standard : CFR47 FCC Part 2.1093
KDB 447498 D01

Measurement Record:

The Maximum tested and declared conducted output power is less than 0 dBm (1.0mW) which is less than SAR exclusion testing threshold 9.6mW for Bluetooth band according to KDB 447498 D01. So this device is compliance with the RF Exposure requirement.
