

RTC Industries, Inc.

2800 Golf Road. Rolling Meadows, IL. USA

Federal Communications Commission
Authorization and Evaluation Division
1435 Oakland Mills Road
Columbia, MD 21046

Date: 2019-06-06

SUBJECT: Label Location Statement
FCC ID: 2ABUA-T200111

To Whom It May Concern:

We place the FCC label under the rear access door due to below reasons:

1. The label is visible and easily accessible when the user opens the rear access door to connect the device.
2. The label is located on the exterior surface of the enclosure and located within a user-accessible non-detachable compartment
3. The unit cannot be powered without the user seeing the label first.
4. The label is readily viewable at the time of purchase because the rear access door will not be fastened when the product is shipped.
5. The label placed on the surface of the access door of the equipment affects the appearance according to design requirements and could be easily removed or damaged if located on the surface of the access door.

Regards,

RTC Industries, Inc.
