Attestation of supported frequencies

Attn. FCC reviewer

To whom it may concern,

The 2.4 frequency band portion supported by the DWAM83 Digital Wireless Audio Transceiver Module is not implemented in this device, and cannot be used by the end user. From this module, only the 5150-5250 and 5725-5825 MHz frequency band portion is used. This device additionally has implemented Bluetooth base on CSR BC5.

Yours sincerely,

M. Koop
