

# Remote Control Generator Quick Start Manual

## ⚠ DANGER

	You will be <b>KILLED</b> or <b>SERIOUSLY HURT</b> if you do not follow the Operator's Manual instructions.		Exhaust contains poisonous carbon monoxide gas that can cause unconsciousness or <b>DEATH</b> . Operate in well ventilated, outdoor areas away from open windows or doors.
	Risk of Fire. Do not add fuel while the product is operating.		Failure to properly ground generator can result in electrocution, especially if the generator is equipped with a wheel kit.
	Generator is potential source of electric shock. Do not expose to moisture, rain or snow. Do not operate with wet hands or feet.		Do not expose to rain or use in damp locations.

## 1. REMOTE CONTROLLER

- 1, Remote controller Pilot lamp
- 2, START button
- 3, OFF button
- 4, Key ring
- 5, Remote controller learn lamp on control panel
- 6, Learn button
- 7, Receiving antenna

Figure 1

Figure 2

### Note:

When you use a new remote control, you need to learn operation. After that, the remote controller can be used to start the generator.

## 2. HOW TO LEARN

- a) Make the electric start key to the "ON" position.

Figure 3

- b) Press the learn button on control panel until the remote control learn lamp on control panel lights up.

Figure 4

- c) Press the "START" button at remote controller until the generator startup, the learning is complete. Press the "OFF" button to close the generator.

Figure 5

### Note:

The max remote control distance of the controller for startup is about 50m at the open place. For shutdown is about 40m distance. If there are obstacles between the remote controller and the generator, the remote control distance will be shortened.

## 3. HOW TO START THE GENERATOR WITH REMOTE CONTROLLER

### ⚠ DANGER

Using a generator indoors **CAN KILL YOU IN MINUTES**. Generator exhaust contains carbon monoxide. This is a poison you can not see or smell.

Never use inside a home or garage. **EVEN IF** doors and windows are open.

Only use **OUTSIDE** and far away from windows, doors, and vents.

Avoid other generator hazards.

READ MANUAL BEFORE USE.

- (a) Turn fuel valve under tank to the "ON" position (see Figure 6).

Figure 6

- (b) Turn the engine switch to the "ON" position (see Figure 7).

Figure 7

- (c) Connect the electric appliance (see Figure 8).

Figure 8

- (d) Turn the AC breaker to the "ON" position (see Figure 9).

Figure 9

- (f) Make the remote controller to aim at the generator receiving antenna, and then press the "START" button about 2-3s, the generator will start immediately. The generator will supply the output power about 20s later. (see Figure 10).

Figure 10

## 4. STOPPING AND STORAGE PROCEDURES

- (a) Press the "OFF" button and the output power will shut down immediately. The engine will stop about 10s later.

### Note:

You can not press the "START" button immediately in 10 seconds. You can use the remote controller to control the generator (start and stop). After you use the generator, you need follow the next steps to storage the generator.

- (b) Turn the engine switch to the "OFF" position (see Figure 11).

- (c) Turn fuel valve to "OFF" position (see Figure 12).

- (d) If generator is to be stored for longer than 30 days, refer to the operator's manual for further instructions.

## FCC STATEMENT

1. This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference.

(2) This device must accept any interference received, including interference that may cause undesired operation.

2. Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation.

This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.

- Increase the separation between the equipment and receiver.

- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

- Consult the dealer or an experienced radio/TV technician for help.
