SAFETY INFORMATION

Legal Notice

Declaration

Without prior written permission of OnePlus, reproduction, transfer, distribution or storage of the contents in this document in any form is prohibited. OnePlus operates a policy of ongoing development. Thus, OnePlus reserves the right to alter any specification detailed in this document without prior notice. The contents of this document are provided "as is". Except as required by applicable laws, no warranties of any kind, either express or implied, are made in relation to the accuracy of this document. To the maximum extent permitted by applicable laws, under no circumstances shall OnePlus or any of its licensors be responsible for any loss of profit, data, income, special, incidental, consequential, or indirect damages caused.

Availability of product specifics, application software, and accessories may vary for details. For information, please refer to your authorized OnePlus distributor. This device may contain commodities, technology, or software subject to Export Rules and Regulations. Diversion contrary to law is prohibited.

Trademarks and Permissions

OnePlus and its are trademarks or registered trademarks of OnePlus Technology (Shenzhen) Co., Ltd. All rights reserved. Android™ is a trademark of Google Inc. The Bluetooth® word mark and logos are registered trademarks owned by the Bluetooth SIG, Inc.

The N-Mark is a trademark or registered trademark of NFC Forum, Inc. in the United States and in other countries.

Other trademarks, product, service and company names mentioned may be the property of their respective owners.

Privacy Policy

To help you better and quickly retrieving to protect your personal information. To better understand how we protect your personal information, you can read our "Privacy Policy" in the Setup Wizard when you turn on your phone for the first time. You can check our "Privacy Policy" by following the steps: Settings > About Phone > Legal Information > Privacy Policy.

Safety

Please read all the safety and health information carefully before using your device to ensure its safe and proper operation.

General Safety Information

- Prolonged exposure to the ringer at high volume may cause harm to your device, property, yourself, or others.
- Do not switch on the device when prohibited or when it may cause interference or danger.
- Do not use device at gas stations, service stations, or near fuel or chemicals.
- Please do not store or carry your medical devices or accessories near liquid or thermal risk gas.
- Please keep away from the phone rear magnetic cards or the magnetic objects, since information stored on floppy discs, memory cards and credit cards could be damaged by magnetic radiation.
- Do not put your device in the microwave or charger in a microwave oven or other high-voltage equipment. Otherwise, it may cause circuit damage, fires, or other damages.
- Some hearing devices, including medical devices, might be susceptible to interference, and it can cause interference. Please check options and regulations where using your medical devices, especially in environments like medical institutions.
- Only use branded accessories and batteries that are approved by OnePlus. Using unapproved accessories or batteries may void the warranty for the phone or violate local regulations for radio devices. OnePlus shall take any responsibility for accidents or problems caused by using accessories or batteries that are not approved.
- The device is designed for water resistance under certain conditions, but OnePlus does not recommend excessive submersion. Liquid damage will void the warranty.
- When connecting with other devices, please follow the safety guidelines presented in this manual. Do not attempt to connect your device with incompatible products.
- Please do not use the phone if someone is damaged. Otherwise, it may cause injury.
- Please keep metal objects away from phone receiver. Small metal objects may be attracted to the device and personal injury or device damage may occur.
- Only connect to power sources with USB 2.0 or above.

Battery Safety

- Please do not attempt to repair, disassemble or modify the battery. Replacing battery by an incorrect type could lead to explosion. Your phone battery is a Li-ion OnePlus Authorized batteries. Using third-party products may cause battery leakage, overheating or fire.
- Do not put your device near heat sources, fireplaces, direct sunlight, or other heat sources. Prolonged exposure to heat may cause battery leakage, explosions, or fires.
- Do not put the device or phone on or place the battery with fuel objects. Damaging the battery could cause battery leakage, overheating, or fires.
- If you experience any battery abnormalities, such as high temperature, deformation, leakage, or color change, please immediately discontinue usage of the device and contact customer support.
- All batteries have a limited lifespan and will begin to lose capacity after several hundred charges/discharges.
- Keep the lifespan of the battery as focused as waste. Refer to local regulations.

Charging Safety

- The charger is intended for indoor use only.
- Do not charge the battery under the following conditions:
In direct sunlight, in temperatures below 5°C, in areas with humidity, dust or vibration, or near magnetic fields. Charging in these conditions may pose a risk of fire.
- The charger and the cable must be in near the equipment and shall be easily accessible.
- Ensure the environment ambient charging temperature of the equipment declined by manufacturer is 5-35°C.
- Sockets that are dirty may cause poor contact with the charger, and your device may not charge properly.
- Please unplug the official OnePlus chargers (using unauthorized chargers can be dangerous and can void your warranty).
- Make sure to unplug devices with the correct charging method based on the charging limits, or else incorrect charge can damage your phone.
- Do not use a damaged charger.
- Do not use a loose electrical outlet.
- Do not use a phone with charger.
- Do not use a damaged cable (such as a ripped charge power supply or the battery cable becomes damaged).
- Do not disassemble or modify charger, as this may lead to personal injury, fire or damage.
- Do not touch the charger, cable or power socket with wet hands, as this may cause electric shock.
- Do not allow heavy objects on the power cord or attempt to modify any cables.
- Make sure to grasp the charger firmly while unplugging it.
- Do not pull the power cord as this may lead to damage and cause electric shock or fire.
- Before cleaning the device, unplug the power plug from the socket.
- Unplug the charger from electrical outlets and the device when not in use.

Driving Safety

- Safety should take priority when you are operating a vehicle. Be sure to check the laws and regulations on the use of devices in your area.
- Do not allow your phone or accessories raise safety at risk.
- Compass and GPS information are only used for reference purposes. If you do not wish to disclose your location, be sure not to use applications that can record your location.

Health Information

To prevent possible hearing damage, do not listen at high volume levels for long periods.

- Exposure to high volume sounds may damage the hearing of the ears. Each individual is exposed with unique sensitivity to loud noises. Increasingly noise your eyes do not roll or wash dirt with water thoroughly and seek medical attention.
- Some people may get dizzy or experience medical problems in response to flashing lights or patterns. If you have a history of epilepsy before using this device. If you have the following symptoms: headaches, dizziness, convulsions, eyes or muscle cramps, loss of consciousness, or involuntary movements, please stop using the device immediately and consult a doctor for medical attention. Avoid using the device for extended periods and keep proper distance from your eyes.

Laser Safety Statement

If this product supports the laser autofocus feature. To ensure proper use of this product, please read this owner's manual carefully and retain for future reference. Should the unit require maintenance, contact an authorized service location. Use of controls, adjustments or the performance of procedures other than those specified herein may result in hazardous radiation exposure. To prevent direct exposure to laser beam, do not try to open the enclosure or make direct contact with the laser.

CLASS 1 LASER PRODUCT

EU Regulatory Conformance

CE Statement

Hereby, OnePlus Technology (Shenzhen) Co., Ltd. declares that the radio equipment type Smart Phone is in compliance with Directive 2014/53/EU. The full text of the EU declaration of conformity is available at the following internet address:
https://www.oneplus.com/support/manuals

Notice: Observe the national and regulations in the location where the device is used. This device may be restricted for use in some or all member states of the European Union (EU).

RF Exposure Information (SAR)

- This SAR limit of Europe is 2.0W/kg. The highest SAR value of this device can be with this limit. And please see the "Quick Start Guide" to find the highest SAR value.
- This device was tested for typical operation with the back of the handset kept 5mm from the body. To maintain compliance with RF exposure requirements, use accessories that maintain a 5mm separation distance between the user and the back of the handset. The use of belt clips, holsters and similar accessories should not contain metallic components in its assembly. The use of accessories that do not satisfy these requirements may not comply with RF exposure requirements, and should be avoided.
- Body-worn operation with certified wireless peripherals (wireless headsets, wireless headsets, etc.) may be supported in the future.
- Cases with metal parts may change the RF performance of the device, including the compliance with RF exposure guidelines in the manner tested and certified, and use such accessories should be avoided.

Conformément à la réglementation française, vous trouverez ci-dessous, en français, les recommandations et consignes concernant l'exposition aux ondes électromagnétiques émises par votre appareil.

Comment limiter votre exposition aux ondes électromagnétiques émises par votre appareil ?

Quand il émet et reçoit des signaux radio, votre téléphone mobile est exposé à des ondes électromagnétiques. Cette exposition est mesurée par le débit d'absorption spécifique (DAS). Les normes européennes définissent une valeur limite de DAS à ne pas dépasser. Cette valeur limite est de 2 watts par kilogramme (W/kg) en moyenne sur 10 grammes de tissu corporel. Elle a été définie pour garantir qu'aucun risque n'existe pour les utilisateurs, même pour ceux qui sont exposés à des appareils fonctionnant à une puissance supérieure à la valeur limite. Les mesures de DAS sont effectuées dans des positions standard, l'appareil émettant à son niveau certifié le plus élevé dans toutes les bandes de fréquences testées. Bien que le DAS soit déterminé au niveau de puissance certifié le plus élevé, le DAS réel de votre appareil en cours de fonctionnement peut être inférieur à la valeur maximale. En effet, votre appareil est conçu pour fonctionner à différents niveaux de puissance afin d'utiliser uniquement la puissance nécessaire pour accéder au réseau. En général, plus vous êtes proche d'une antenne relais, plus la puissance de votre appareil est faible.

Pour limiter votre exposition aux ondes électromagnétiques émises par votre appareil, nous vous recommandons de suivre les conseils suivants :

- Limitez votre temps d'utilisation de votre appareil ou restez à une distance de votre appareil supérieure à 5 mm de votre corps. Dans ce dernier cas, il est conseillé d'utiliser des accessoires d'origine pour appareil mobile, afin de garantir que ces accessoires soient conformes aux exigences d'exposition aux ondes électromagnétiques.

Restrictions in 5GHz band

The device is restricted to indoor use only when operating in the 5150 to 5350 MHz frequency range (802.11a (5GHz), 802.11n (5GHz), 802.11ac (5GHz), 802.11ax (5GHz)).

Frequency bands in which the radio equipment operates:
Some bands may not be available in all countries or all areas. Please contact the local carrier for more details.
Maximum radio-frequency power transmitted in the frequency bands in which the radio equipment operates: The device complies with the limits in the highest EIRP value specified in the related harmonized standard.
Please see the "Quick Start Guide" to find the frequency bands and transmitting power.

Correct Disposal of this Product

This crossed-out wheeled-bin symbol on your product, battery, literature or packaging indicates that the product and its electronic accessories should not be disposed of with other household waste at the end of their working lives. To prevent possible harm to the environment or human health from uncontrolled waste disposal, please separate your device and accessories from other types of waste and recycle them responsibly to promote the sustainable reuse of material resources. For more information, please contact the retailer where you purchased this product, or your local government office. For more information on how to recycle this product responsibly, please go to https://www.oneplus.com/support/recycle.

RoHS Compliance

This product complies with directive 2011/65/EU and its amendments, on the restriction of the use of certain hazardous substances in electrical and electronic equipment.

FCC Regulatory Conformance

FCC Statement

This device complies with part 15 of the FCC rules. Operation is subject to the following two conditions:
(1) This device may not cause harmful interference, and
(2) This device must accept any interference received, including interference that may cause undesired operation.

NOTE: The manufacturer is not responsible for any radio or TV interference caused by unauthorized modifications or changes to this equipment. Such modifications or changes could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications.

However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:
- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

FCC Caution

- Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.
- The antenna(s) used for this transmitter must not be co-located or operate in conjunction with any other antenna or transmitter.
- The device is restricted to indoor use only when operating in the 5.15 to 5.25 GHz frequency range. For OTC equipment, shall conducts material in US must be fixed to US operation channels only.

RF Exposure Information (SAR)

- This device is designed and manufactured not to exceed the emission limits for exposure to radio frequency (RF) energy set by the Federal Communications Commission of the U.S. Government.
- The SAR limit set by the FCC is 1.6W/kg. The highest SAR value of this device is found to meet (were) 1.6W/kg when worn on the body, as described in this user guide, and can also
