To whom it may concern,

TPC Declaration Statement:

Mimosa Networks declares that the B5 (FCC ID: 2ABZJ-100-00001) and B5c (FCC ID: 2ABZJ-100-00014) units have an analog transmit power monitoring circuit that is fed into an ADC of the CPU and the embedded firmware controls the output power level from that circuit. The transmit power is adjustable from -30 dBm to +27 dBm minus antenna gain. The power limit is set to the maximum allowable EIRP per each UNII bands requirement. The maximum limit is not adjustable and is factory set.

A handwritten signature in black ink, appearing to read "Kevin Forbey", written over a horizontal line.
