

Test

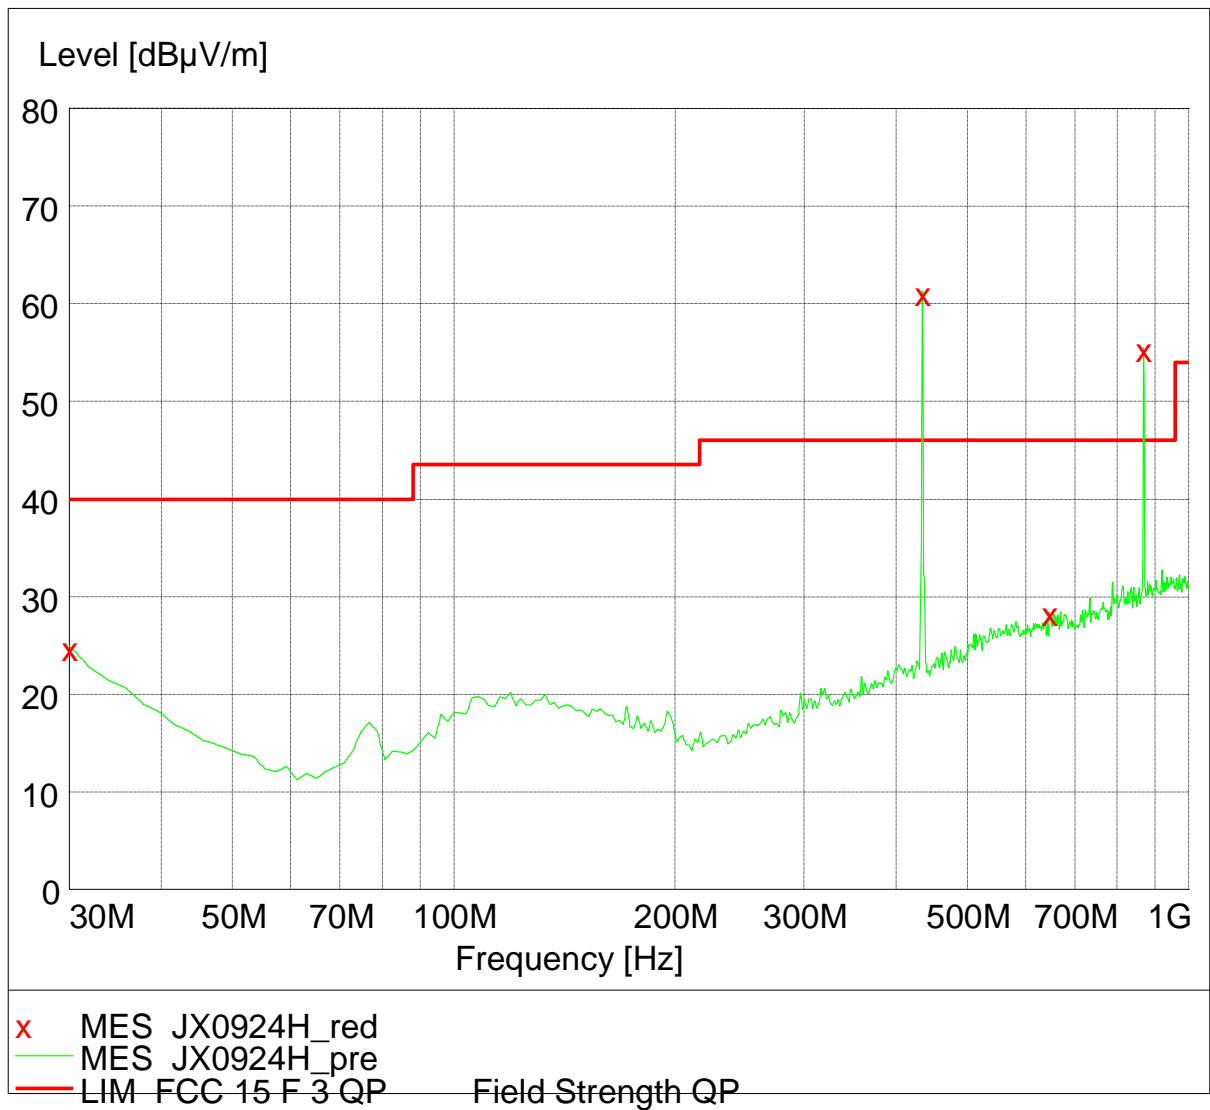

Data

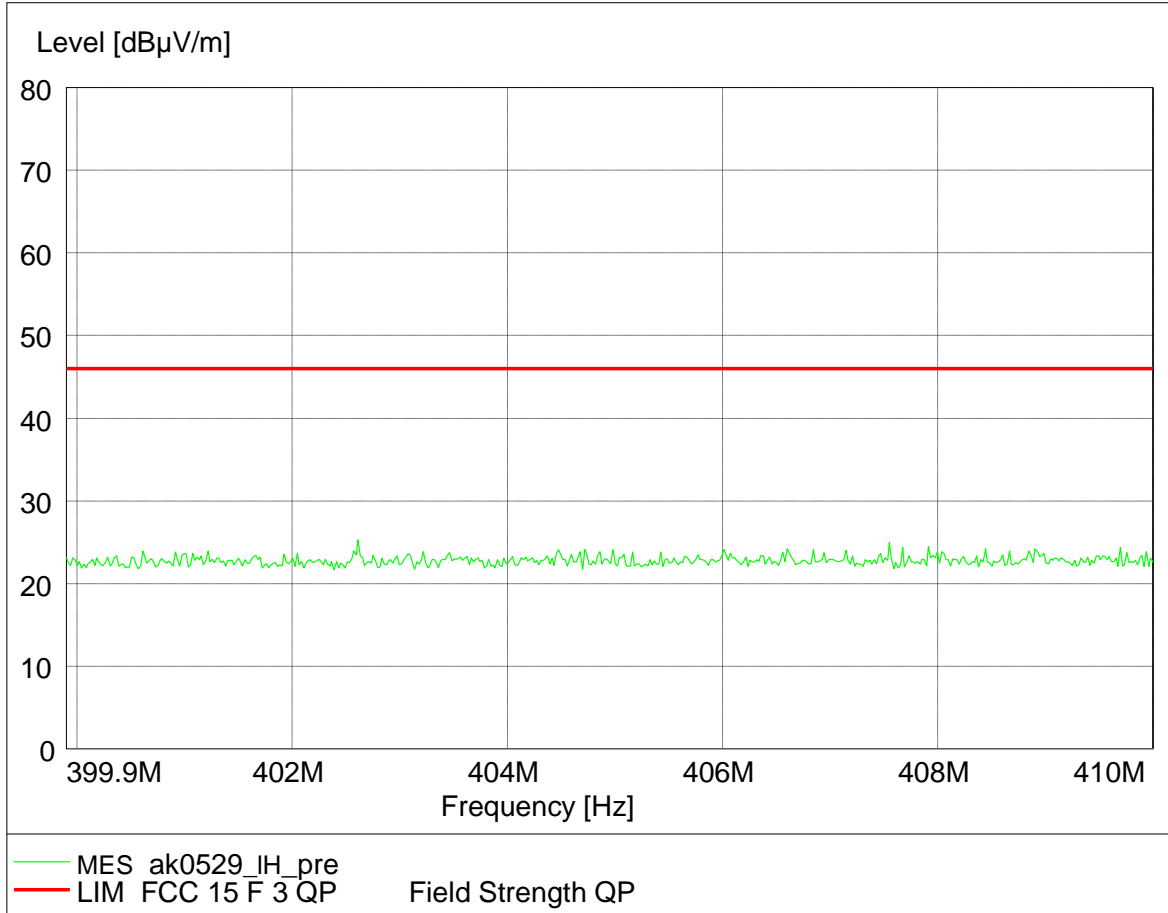

1. Fundamental & Spurious Emission & Restrict band radiated emission

Horizontal

30-1000MHz

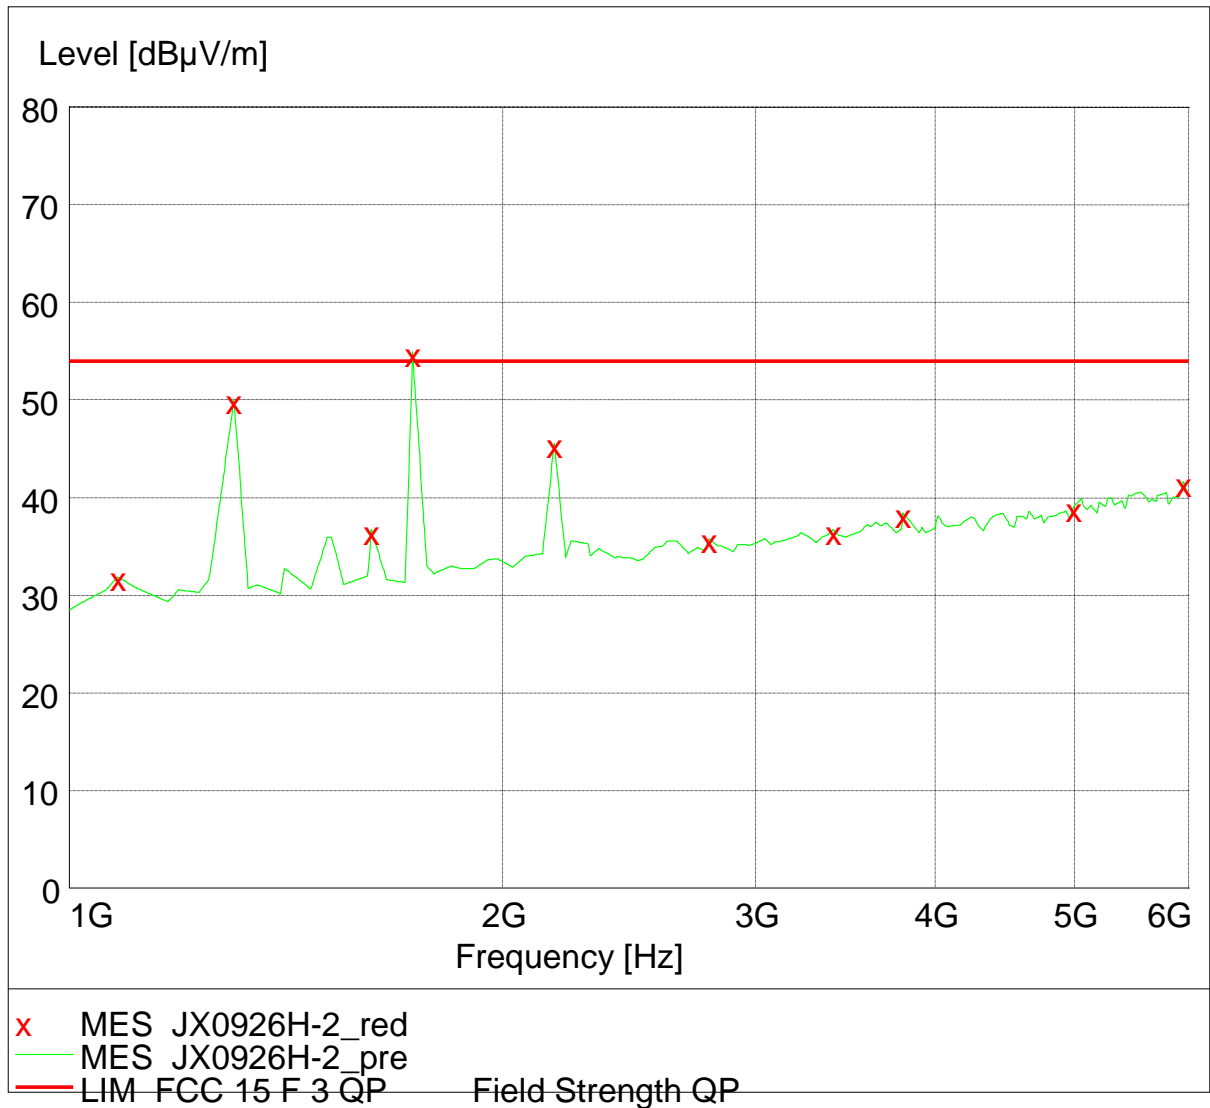

Restrict band

Horizontal

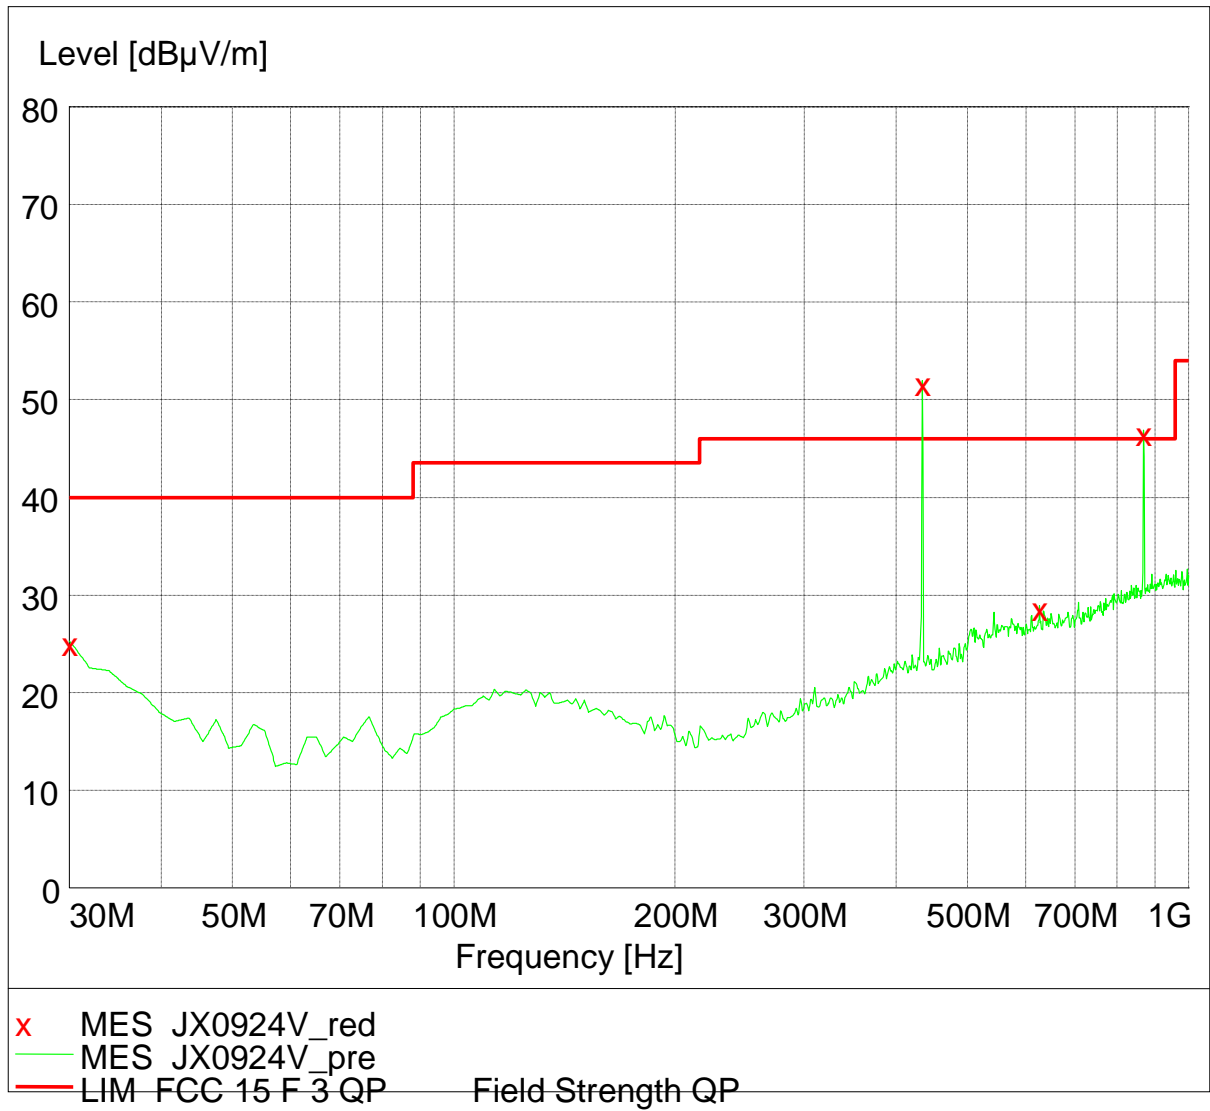

1000-6000 MHz

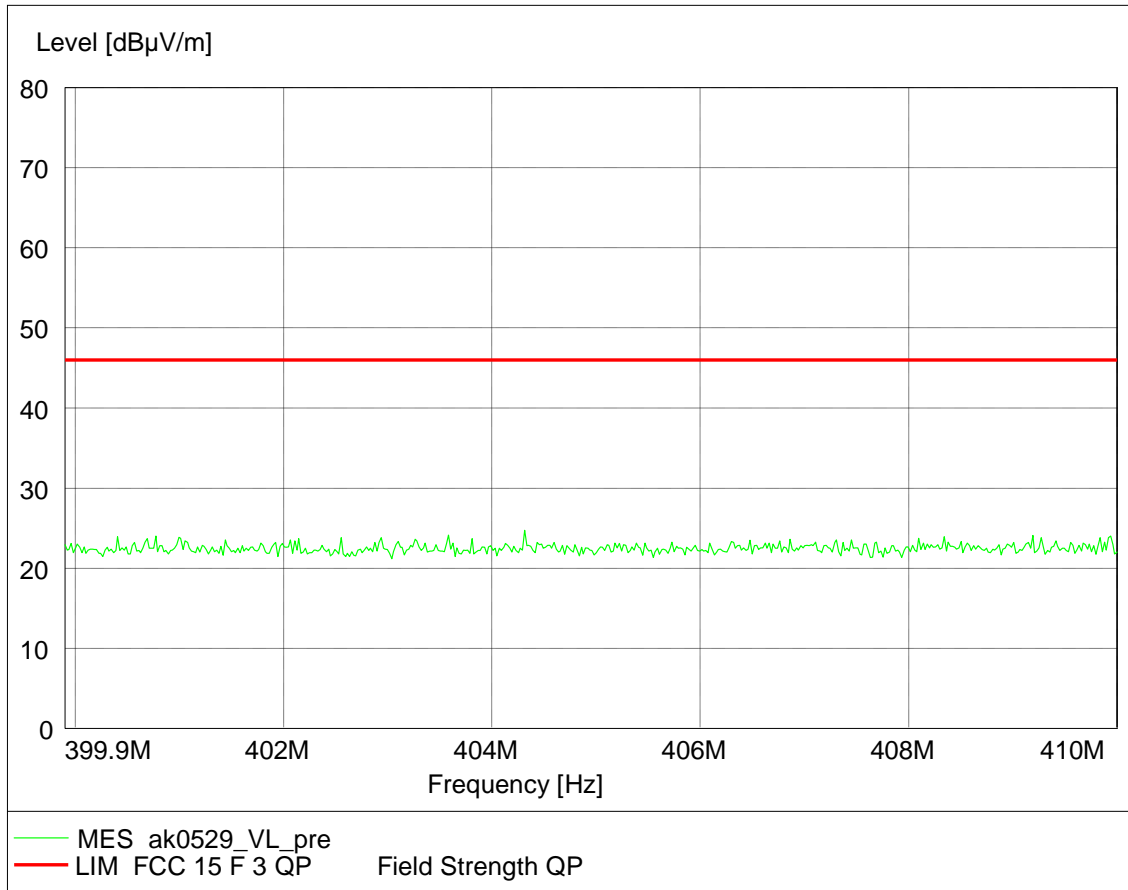

Vertical

30-1000MHz

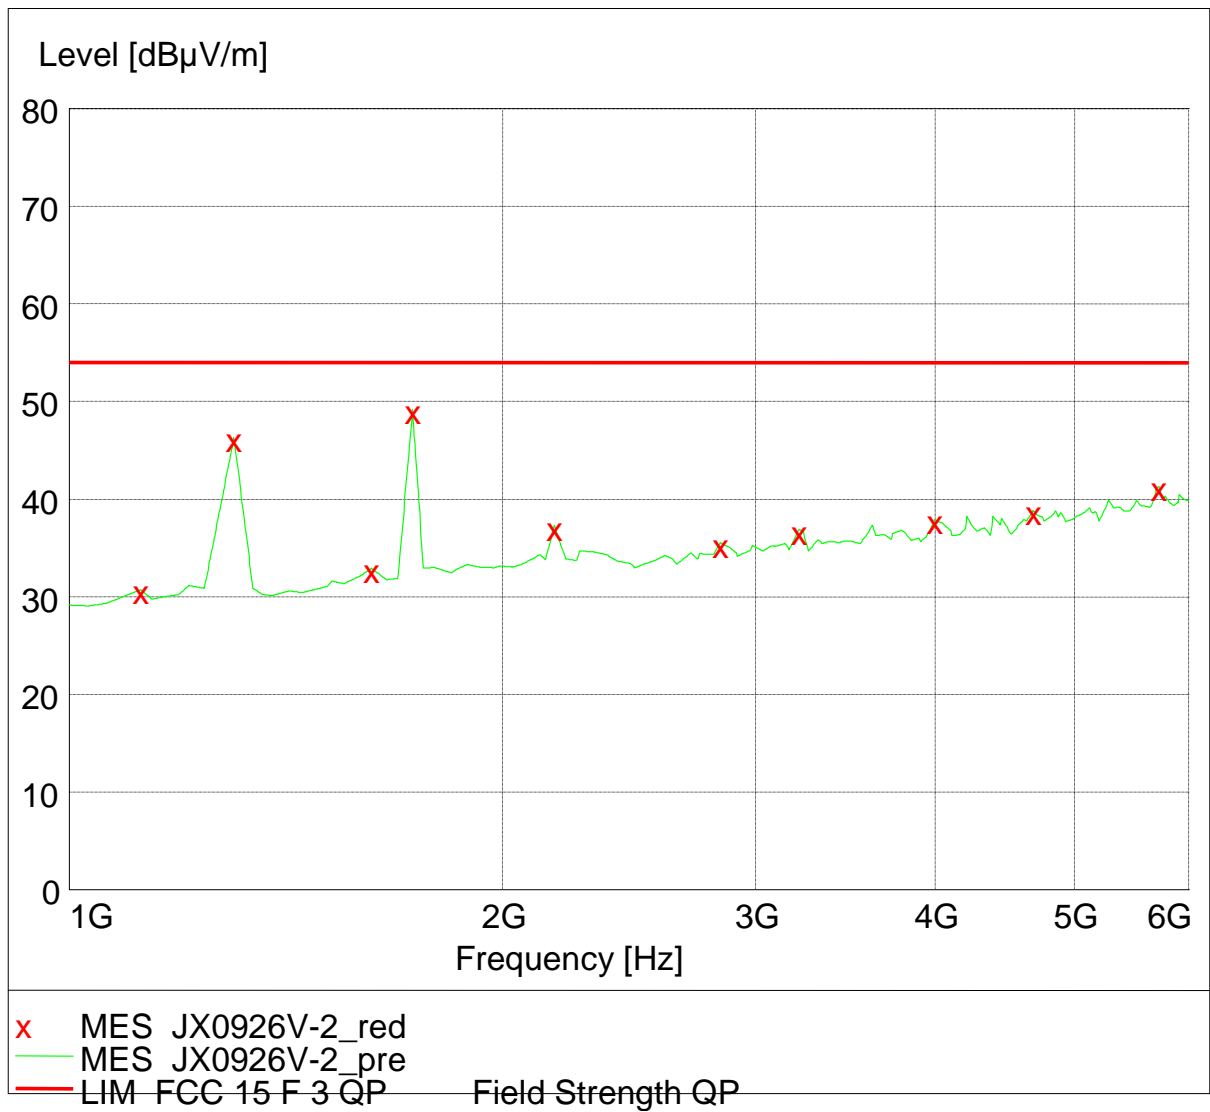

Restrict band

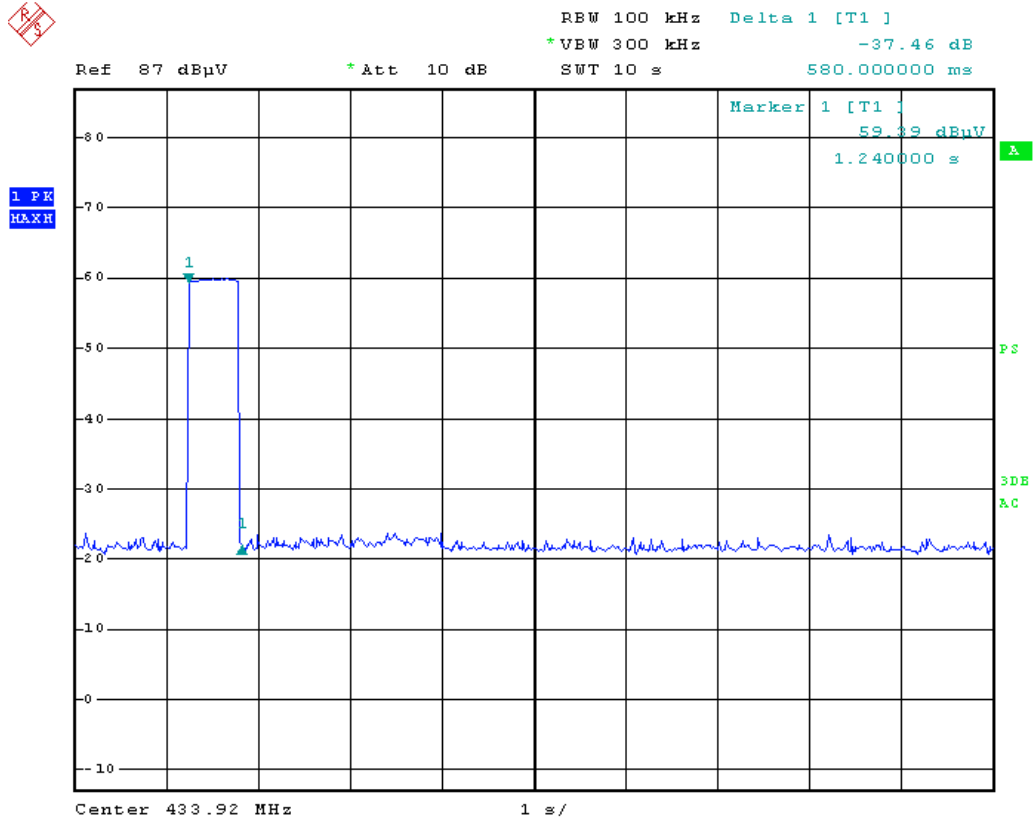

Vertical

1000-6000MHz

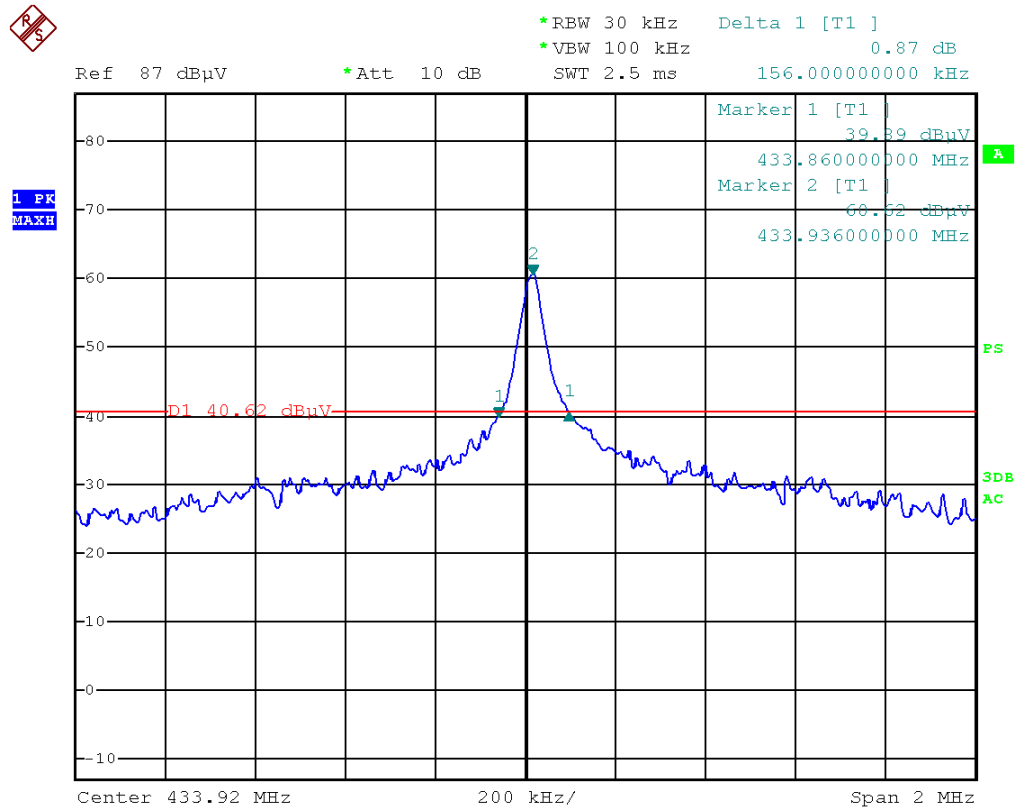

2. Deactivating time

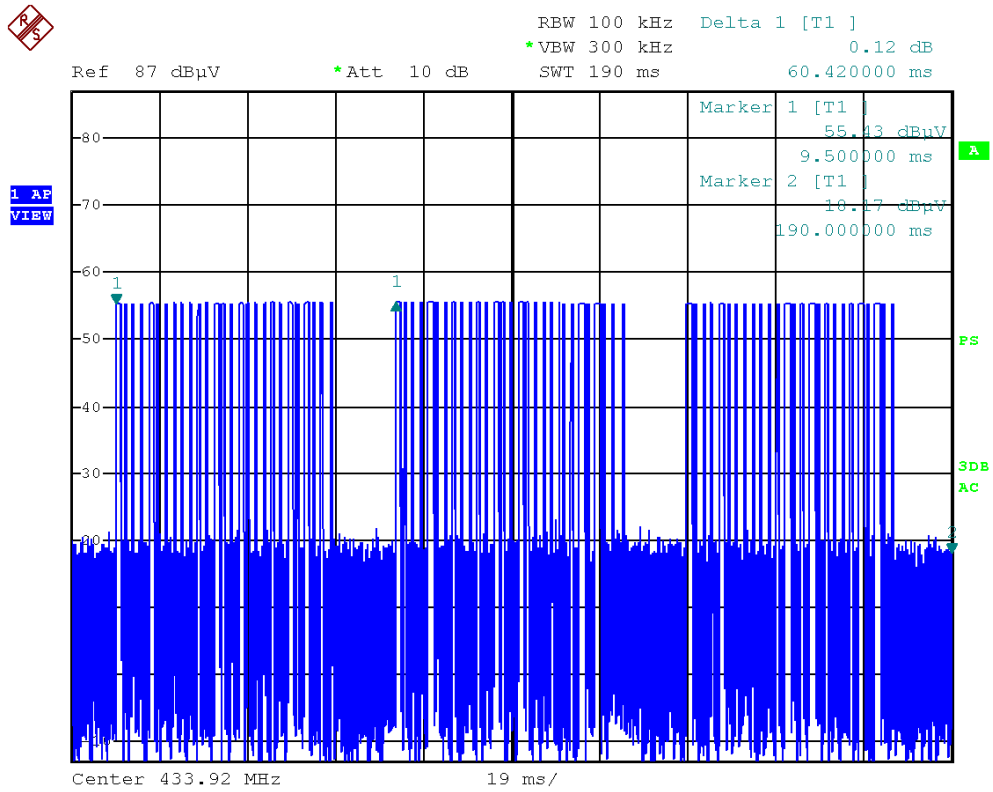

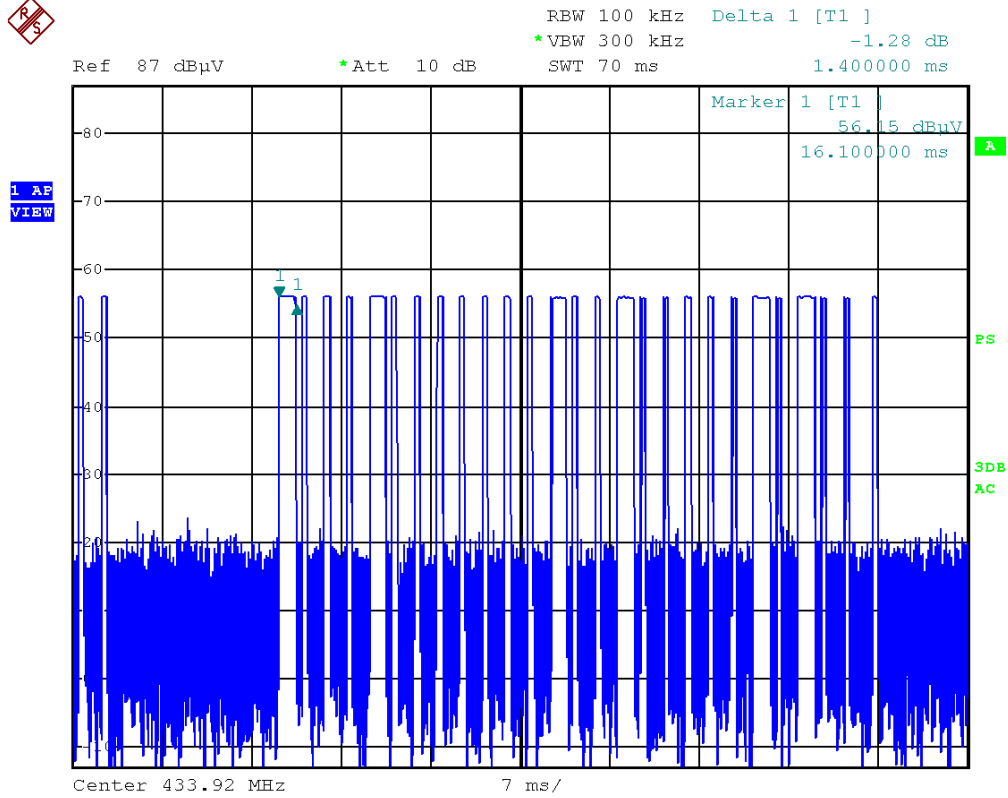

3. Emission bandwidth

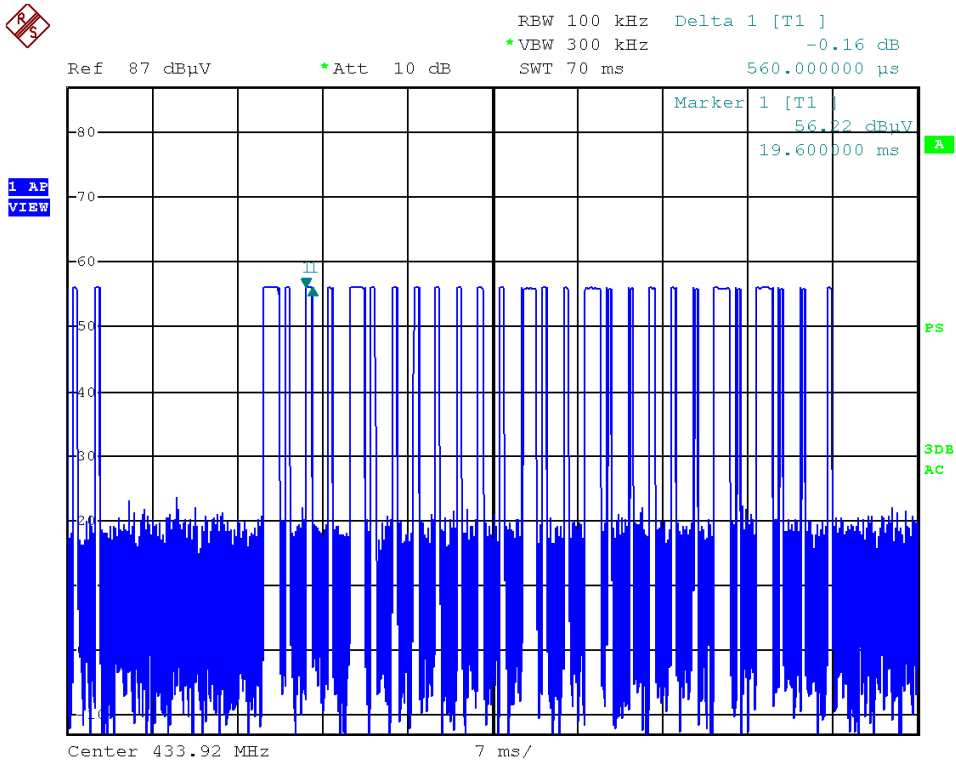

4. Duty Cycle

All the keys were assessed and the test data with maximum duty cycle was listed above.
The worst Duty cycle= $(6*1.4 + 21*0.56) / 60.42 = 0.33$
