

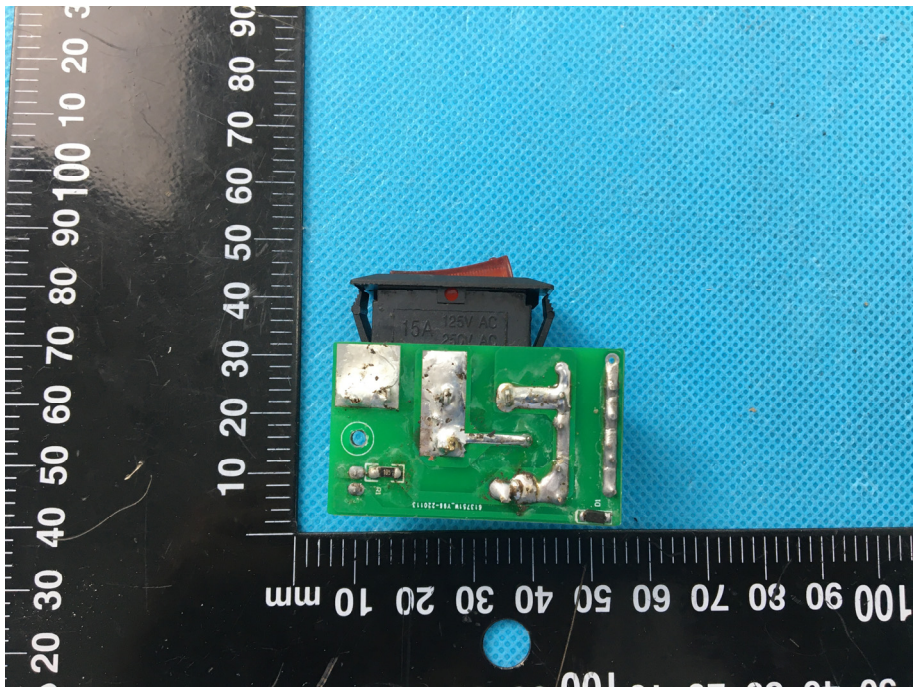

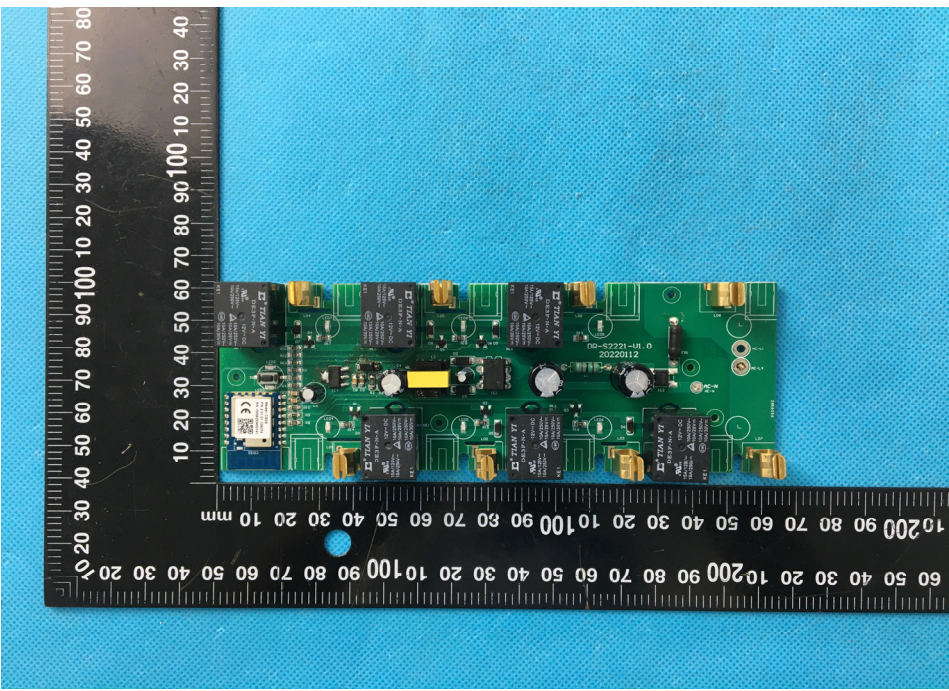

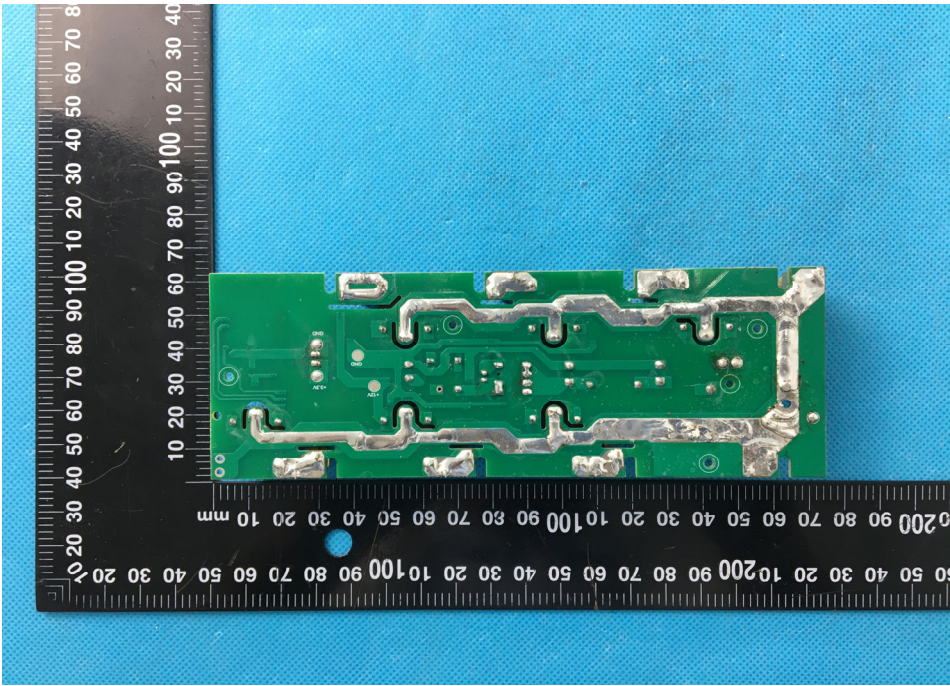

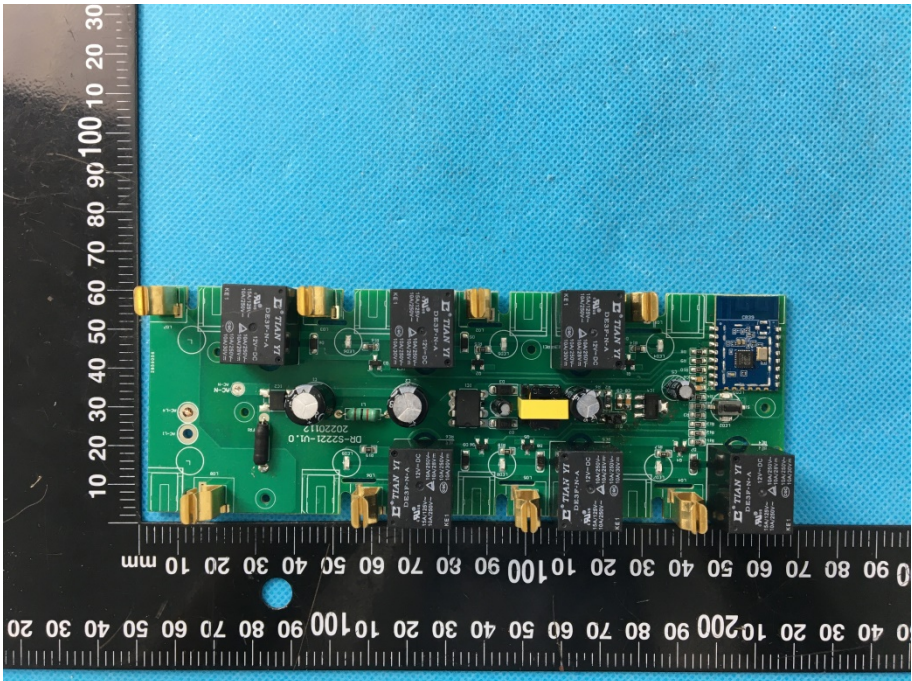

EXHIBIT 3 - EUT INTERNAL PHOTOGRAPHS

<p style="text-align: center;">Solder Board-Component View 2</p>	 <p>A photograph showing a small green printed circuit board (PCB) component with several silver solder joints. The component is placed on a blue textured surface next to a black ruler with white markings. The ruler shows measurements in millimeters, with the component's length being approximately 100 mm. The component has a black rectangular component on top with the text "15A 125V AC 250V AC".</p>
<p style="text-align: center;">Solder Board-Component View 3</p>	 <p>A photograph showing a larger green PCB component with multiple integrated circuits (ICs) and other components. The component is placed on a blue textured surface next to a black ruler with white markings. The ruler shows measurements in millimeters, with the component's length being approximately 100 mm. The component has several gold-colored connectors along one edge.</p>

<p style="text-align: center;">Solder Board-Component View 4</p>	 <p>A photograph of a green printed circuit board (PCB) component, likely a connector or interface board, showing extensive silver solder applied to its top surface. The board is rectangular and has several circular and rectangular pads. It is placed on a blue textured background with a black ruler for scale. The ruler shows measurements in millimeters, with the component's length being approximately 100 mm.</p>
<p style="text-align: center;">Solder Board-Component View 5</p>	 <p>A photograph of a green PCB component populated with various electronic components. The components include several integrated circuits (ICs) with labels such as 'TIAN YI', 'DR-52221-01.0', and '20220112'. There are also capacitors, resistors, and other surface-mounted components. The board is placed on a blue textured background with a black ruler for scale. The ruler shows measurements in millimeters, with the component's length being approximately 100 mm.</p>
