

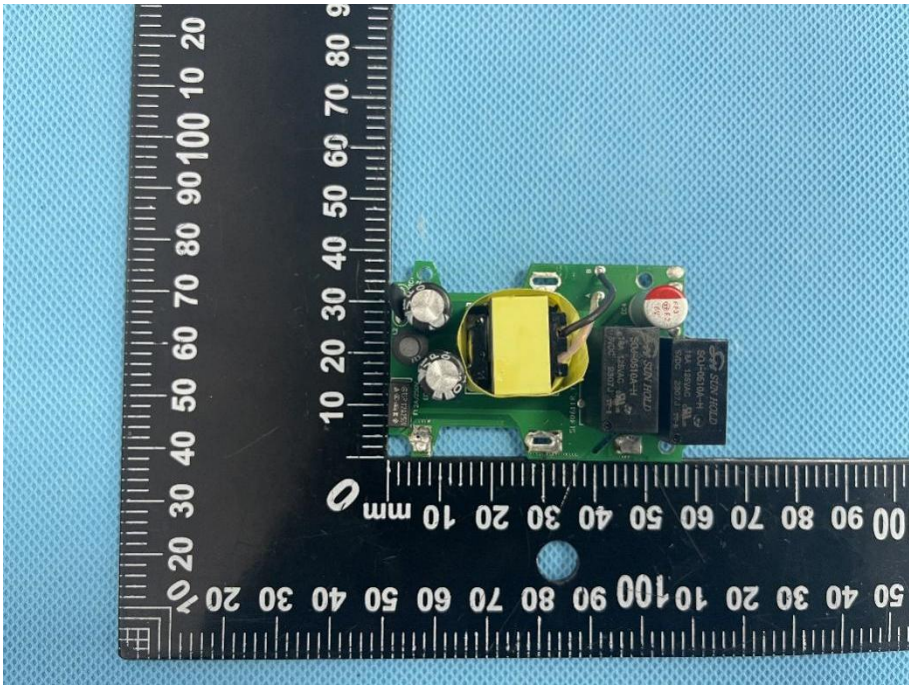

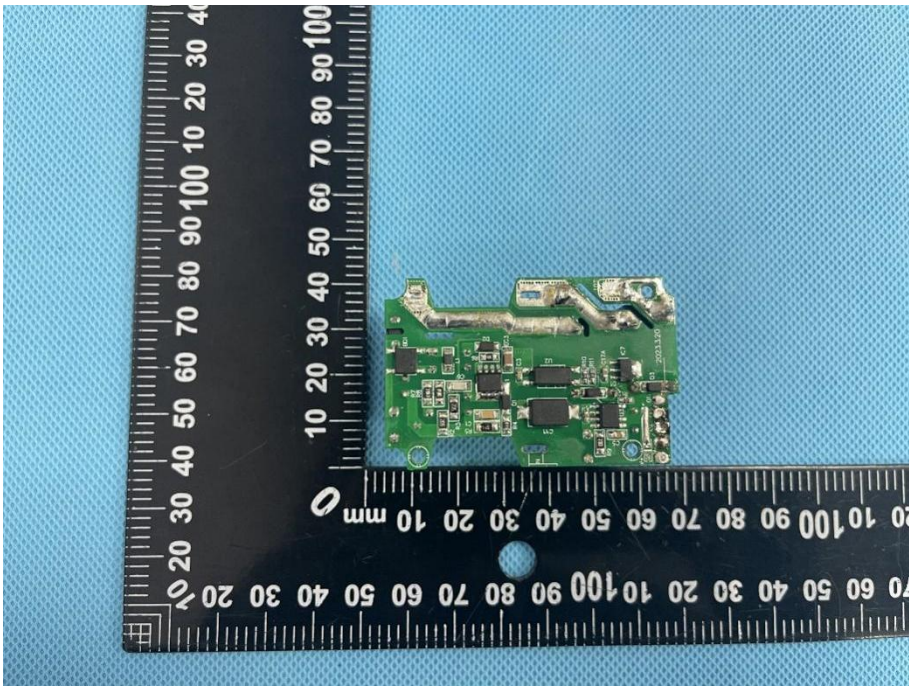

### EXHIBIT 3 - EUT INTERNAL PHOTOGRAPHS

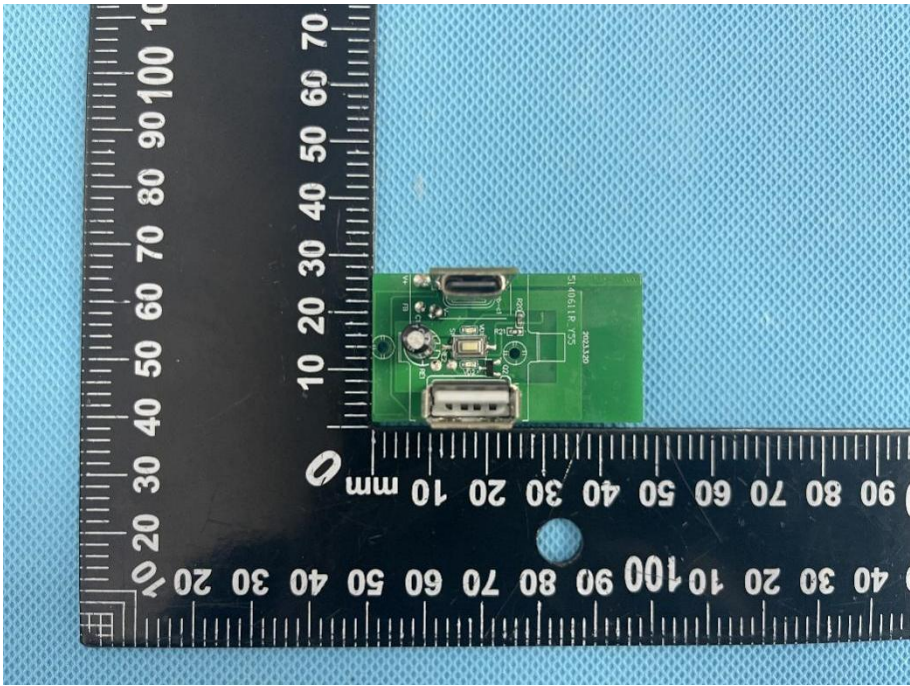

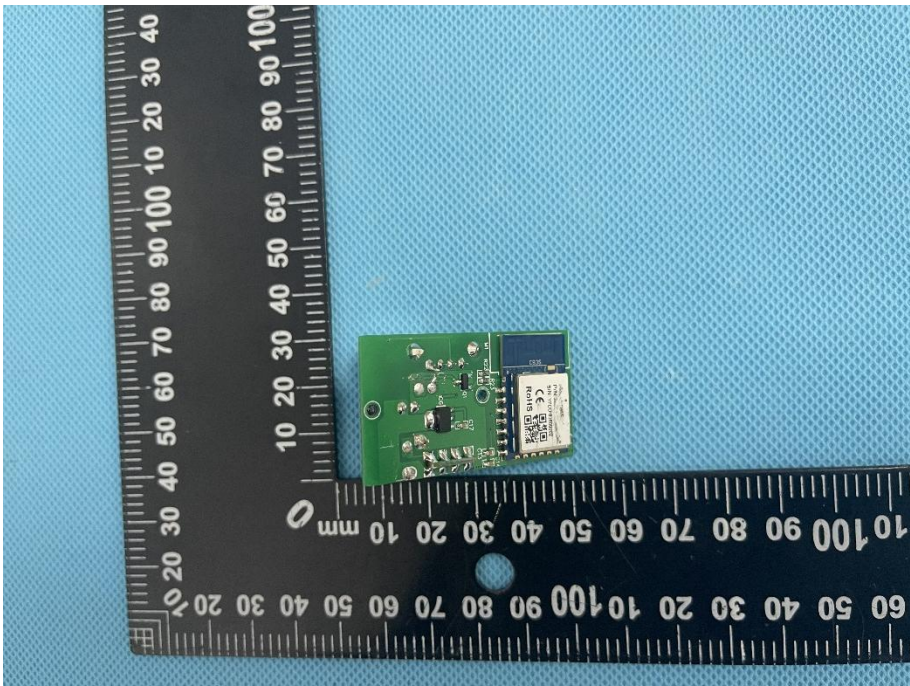

**EUT Housing and Board View 1**

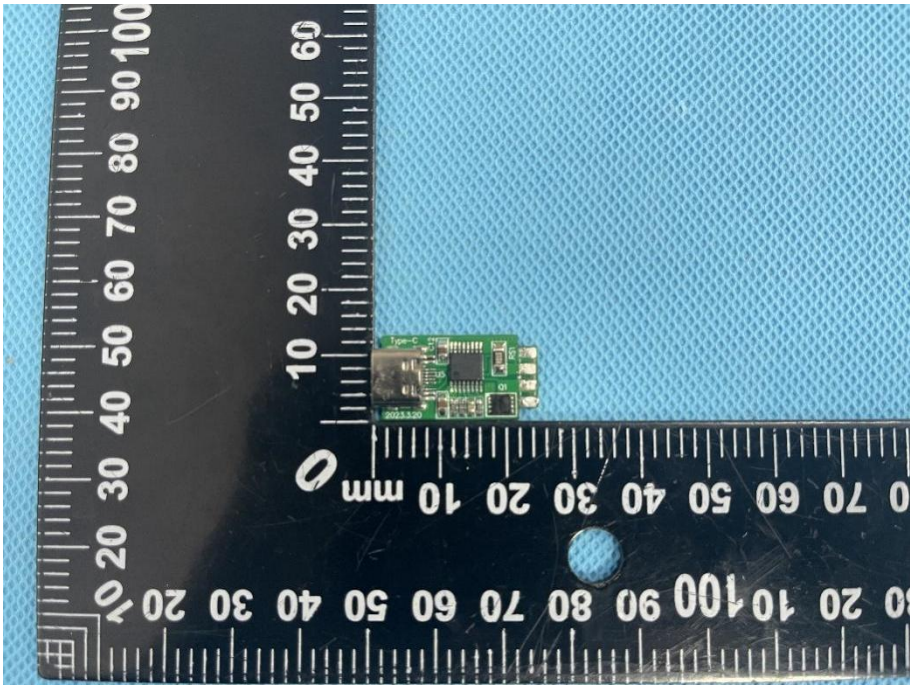

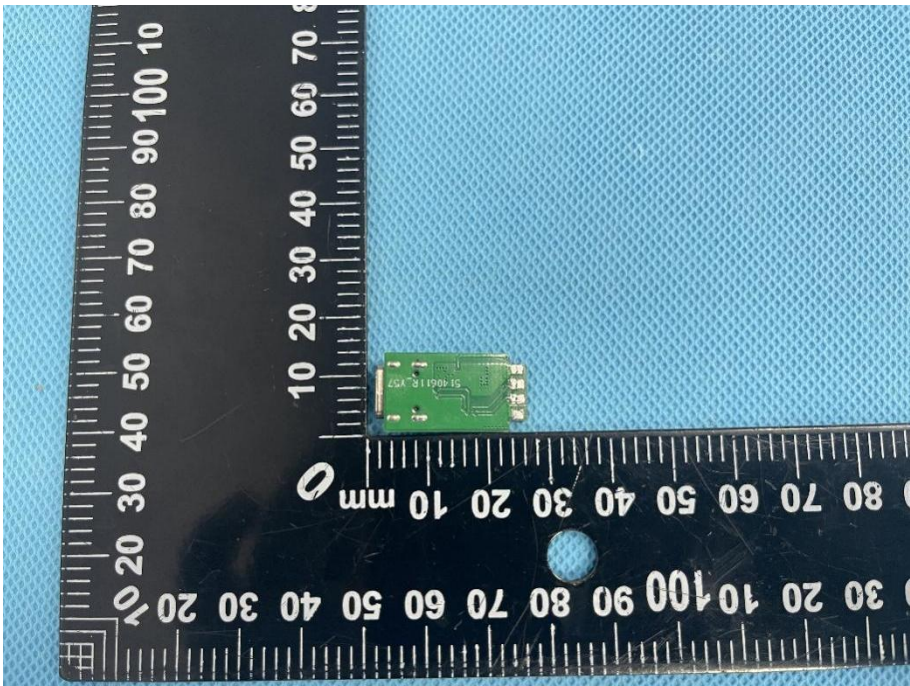

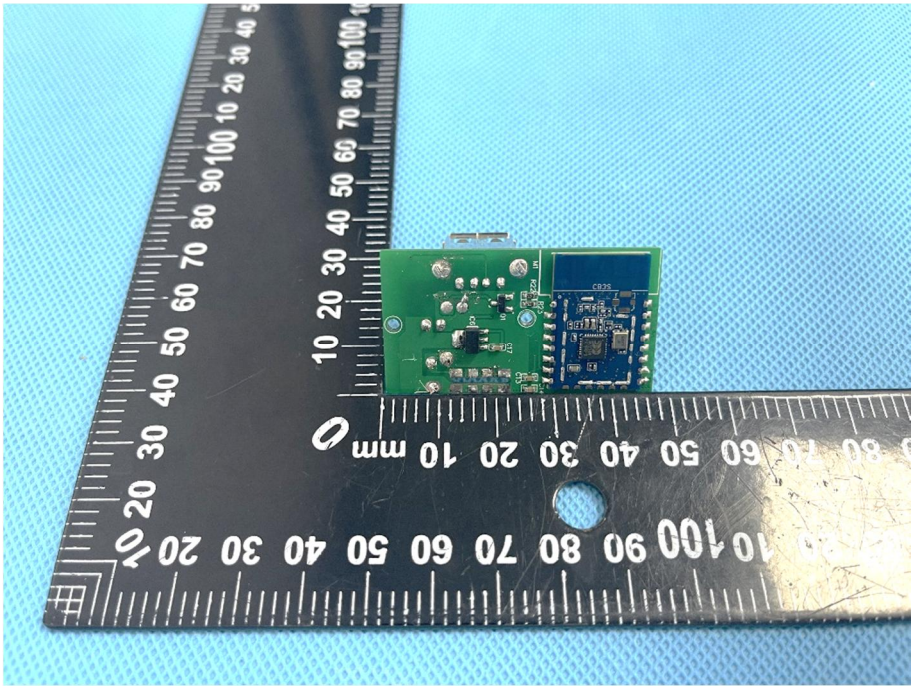

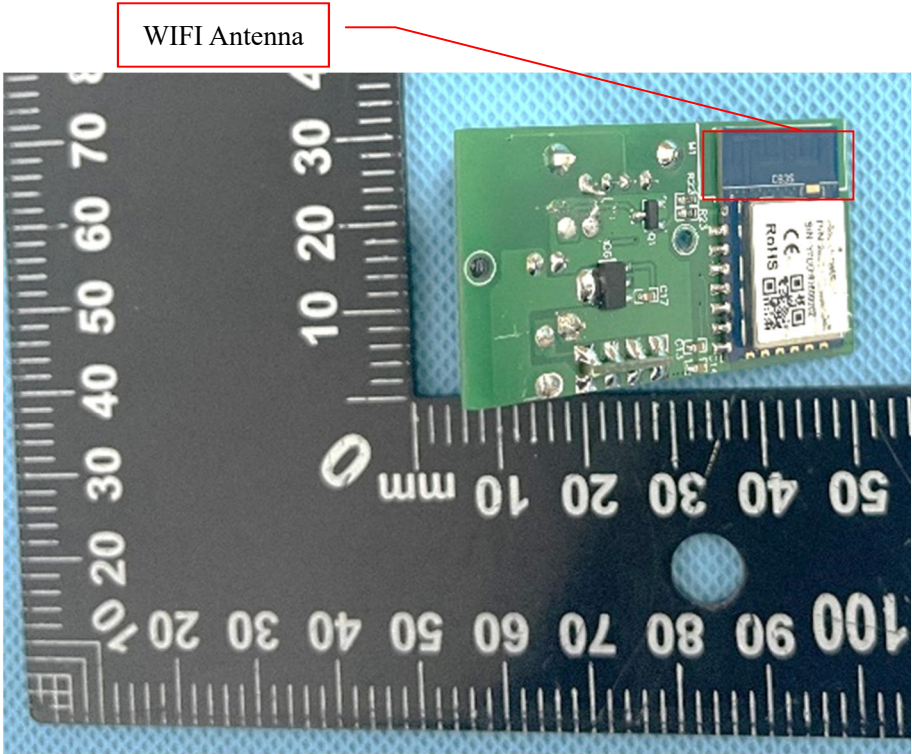

**EUT Housing and Board View 2**

<p><b>Solder Board-Component View 1</b></p>	 <p>A photograph of a green printed circuit board (PCB) component with various electronic components soldered onto it. The components include a yellow electrolytic capacitor, a black integrated circuit (IC), and several smaller surface-mount components. The board is placed on a blue textured surface next to a black ruler with white markings in millimeters. The ruler shows the component is approximately 100 mm long and 40 mm wide.</p>
<p><b>Solder Board-Component View 2</b></p>	 <p>A photograph of the same green PCB component from a different perspective, showing the underside or a different side. It features various surface-mount components, including a large black IC and several smaller components. The board is placed on a blue textured surface next to a black ruler with white markings in millimeters. The ruler shows the component is approximately 100 mm long and 40 mm wide.</p>

<p><b>Solder Board-Component View 3</b></p>	 A photograph of a green printed circuit board (PCB) component, labeled 'Solder Board-Component View 3'. The component is rectangular and features a USB-A port on the left side and a micro-USB port on the right side. It is placed on a blue textured surface next to a black ruler with white markings. The ruler shows measurements in millimeters, with the component's length being approximately 40 mm and its width approximately 20 mm. The component has several small components, including a microcontroller and various passive components, mounted on its surface.
<p><b>Solder Board-Component View 4</b></p>	 A photograph of the same green PCB component, labeled 'Solder Board-Component View 4'. This view shows the component from a different angle, highlighting a white label on the right side. The label contains text including 'CE', 'RoHS', and 'REACH' compliance markings, along with a QR code and other technical specifications. The component is placed on the same blue textured surface next to the same black ruler. The ruler shows the component's length is approximately 40 mm and its width is approximately 20 mm. The component has several small components, including a microcontroller and various passive components, mounted on its surface.

<p><b>Solder Board-Component View 5</b></p>	
<p><b>Solder Board-Component View 6</b></p>	

<p><b>Solder Board-Component View 7</b></p>	 <p>A photograph of a green printed circuit board (PCB) component with various electronic components, including a blue integrated circuit (IC) and several surface-mount components. The component is placed on a black ruler with white markings for scale. The ruler shows measurements in millimeters, with the component positioned between the 10 mm and 100 mm marks. The background is a light blue textured surface.</p>
<p><b>Antenna View</b></p>	 <p>A close-up photograph of the green PCB component, focusing on the antenna area. A red box highlights a small blue component labeled "WIFI Antenna". A red line points from the text "WIFI Antenna" to this component. The component is placed on a black ruler with white markings for scale. The ruler shows measurements in millimeters, with the component positioned between the 10 mm and 100 mm marks. The background is a light blue textured surface.</p>
