We aim to delight all our members and would love to hear about your discoveries! Call us at : **1-888-301-0332** (toll-free), 8am - 5pm CST Monday - Friday.

## How the LED Floating Pool Ball with Speaker Works

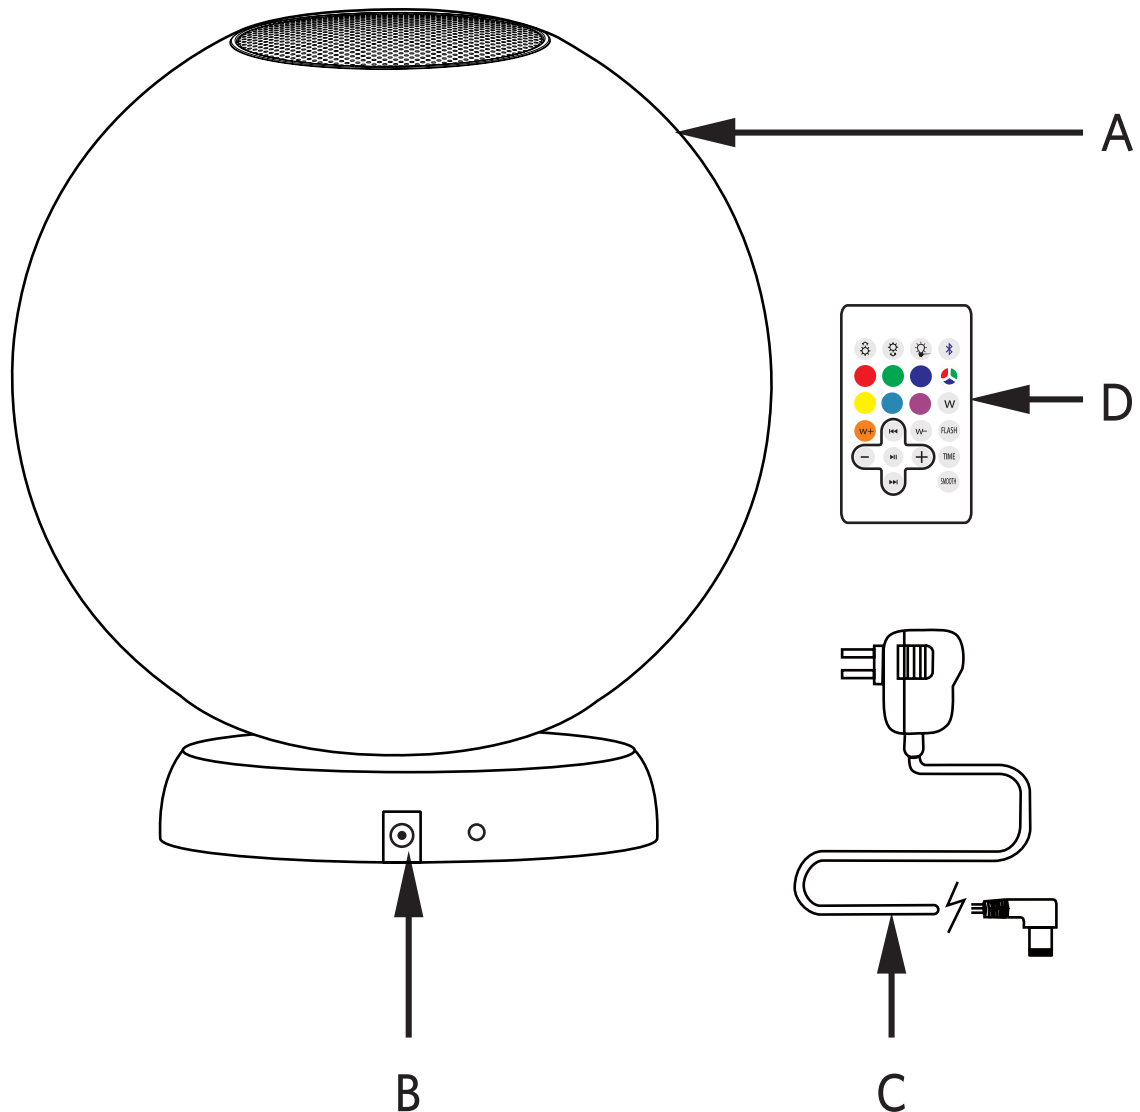

- *The LED floating pool ball with speaker functions using bluetooth technology to wirelessly connect to a compatible device such as mobile phones, MP3 players, PCs, notebooks or tablet PCs, and other enabled devices. If your output device you intend to connect to the LED floating pool ball with speaker is not bluetooth compatible, there are options such as a bluetooth adaptor.*
- *Please refer to the device's operation manual for options and availabilities.*
- *Since audio is transferred by bluetooth technology, performance and sound quality will be dependent on distance from the speaker.*

## Warning

- *This is not a toy, keep it out of the reach of children.*
  - *Keep this product away from chemicals, or high heat.*
  - *Regarding the adaptor:*
    - *Use the adaptor only to charge the battery of the LED floating pool ball with speaker.*
    - *The adaptor should not be used outdoors, or exposed to rain, humidity, liquids or heat.*
    - *Keep the adaptor and charging base out of the reach of children.*
    - *Disconnect the adaptor from power when not in use.*
    - *Never attempt to open the adaptor, the charging base or the LED floating pool ball with speaker.*
  - *Keep the remote control away from water, liquids and heat.*
-

## FCC statement

*Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment. This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not in-stalled and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:*

- Reorient or relocate the receiving antenna.*
- Increase the separation between the equipment and receiver.*
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.*
- Consult the dealer or an experienced radio/ TV technician for help.*

*This equipment complies with the FCC RF radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with a minimum distance of 20 centimeters between the radiator and your body.*
