Re: FCC ID: 2AC542CL60WXS

To Whom It May Concern:

The following application is submitted on behalf of our client, Cooper Lighting, for evaluation of their model WOSW and WVSX for certification under FCC Part 15.247.

The WOSW and WVSX are wireless control devices operating in the 802.11b/g/n wireless 2.4 GHz frequency band. The WOSW and WVSX wall switches can become the access point for WiFi communication in conjunction with occupancy sensors.

The difference between occupancy (WOSW) and vacancy (WVSX) modes/models have no effect on any of the RF settings. The WOSW and WVSX include different application code that reads the input of 5 pull up resistors to determine the load switching behavior.

The WOSW and WVSX were tested in full to the requirements of the aforementioned rules and found to be in compliance.

Sincerely,

A handwritten signature in black ink that reads 'R. Sam Wismer'. The signature is written in a cursive, flowing style.
