	mobile phone where blasting operation occurs.
	<p><b>Use qualified repair service</b></p> <p>Your mobile phone may be installed or repaired by qualified maintenance personnel only.</p>
	<p><b>Accessories and batteries</b></p> <p>Only authorized accessories and batteries can be used. Do not connect your mobile phone to any incompatible product.</p>
	<p><b>Waterproofness</b></p> <p>Your mobile phone is not waterproof, so please keep it dry.</p>
	<p><b>Data backup</b></p> <p>Do remember to make a backup of all important information stored in your mobile phone or keep a written record.</p>
	<p><b>Connect to other mobile phones</b></p> <p>Before connecting to another mobile phone, read the phone's user manual to get detailed safety instructions. Do not connect your mobile phone to any incompatible product.</p>
	<p><b>Emergency call</b></p> <p>Make sure your phone is within network service and its call function is already activated. Dial the required emergency call number and press the Send key. Offer the information of your location.</p>

## Charging the battery

 Note: Ambient temperature for battery charging is 0°C~ 45°C.

Before using your phone for the first time, fully charge the battery.

- a. Insert the provided USB cable into USB port of your mobile phone
- b. Insert USB charger into the mains socket until the battery is fully charged.

 Note: The battery can be charged via computer.

## Switching your mobile phone ON

 Note: Ambient temperature for use of mobile phone is -10°C ~45°C.

1. Hold down the Power key to switch on the mobile phone and activate the operating system.
2. If the screen is automatically locked, please touch the Unlock key to unlock the screen.

 Note: If you lock SIM card using your PIN code, key in your PIN code by touching the corresponding numeric keys on the keypad. Touch the “Sure” key to confirm the input.

3. When the main screen appears, you can start to use your mobile phone.

## Switching your mobile phone OFF

1. Hold down the Power key for 2 seconds and then touch the “OFF” option on the screen.
2. Hold down the Power key until the mobile phone is powered off.

Note: 1. Hold down the Power key for 1 second to lock the screen.

2. Hold down the Power key for 2 seconds and the following options pop out: Mute, Airplane, and OFF.

## Closing the screen

If the mobile phone and its screen are both on, press the Power key briefly to open the screen.

Note: If the mobile phone is on but its screen is off, press the Power key briefly to open the screen (hold down the Power key for 1 second).

## Charging the battery

Only authorized chargers and accessories fit for your mobile phone may be used.

The use of other types of charger and accessories may violate the authorization or warranty clause of mobile phone and cause danger.

To switch off any accessory, you should grasp it and remove the plug instead of yanking the power cord.

If battery power is exhausted, it might be 30 minutes before the charging reminder appears on the main screen.

## Original accessories

With regard to the supply of original accessories, please consult you local distributor. The following are precautions on use of accessories:

1. Please keep all accessories out of children's reach.
2. To disconnect any accessory, unplug it by grasping the plug instead of yanking the power cord.
3. Conduct periodical inspection to check if all mobile phones in car are properly installed and operate smoothly.

Only battery, charger and accessories authorized by the manufacturer are used. The use of battery, charger and accessories of any other type may violate authorization or warranty clause and cause danger.

### Why original accessories should be used?

As key components of this mobile phone, battery and charger plays a vital role in guaranteeing the workings of this mobile phone and your safety. Our long-term customer survey and after-sales service practice show that the failure of mobile phone is generally attributable to the use of unqualified accessories, especially battery and charger.

### Hazards of unqualified battery and charger include:

1. Shortened service life. The number of charging and discharging cycles of unqualified battery is considerably lower than that of original battery.
2. Greatly reduced useful life of your mobile phone. Unstable voltage will seriously affect the normal operation of the circuit of mobile phone and result in permanent damage.
3. Impaired performance and reliability of your mobile phone.

 Warning: Unauthorized accessories may cause combustion or explosion, which will harm your personal safety.

## **Battery information**

### **Charging and discharging**

This mobile phone is powered by storage battery. Its battery can be charged and discharged several hundred times, but will fail in the end. Please come to a certified mobile phone service provider for replacement. Only authorized batteries can be used, and only an authorized charger fit for this model of mobile phone may be used for charging your mobile phone.

When the battery is fully recharged, please disconnect the charger from your mobile phone and unplug it from power socket.

If battery power is exhausted, it will be some 30 minutes before the screen displays the charging prompt. No damaged charger may be used.

## Care and maintenance

Your device is a product of superior design and craftsmanship and should be treated with care. The following suggestions will help you protect your warranty coverage.

1. Keep the device dry. Precipitation, humidity, and all types of liquids or moisture can contain minerals that will corrode electronic circuits.
2. Do not use or store the device in dusty, dirty areas. Its moving parts and electronic components can be damaged.
3. Do not store the device in hot areas.
4. Do not store the device in cold areas. When the device return to its normal temperature, moisture can form inside the device and damage electronic circuit board.
5. Do not attempt to open the device other than as instructed in this manual.
6. Do not drop, knock, or shake the device. Rough handling can break internal circuit boards and fine mechanics.
7. Do not use harsh chemicals, cleaning solvents, or strong detergents to clean the device.
8. Do not paint the device. Paint can clog the moving parts and prevent proper operation.
9. Use a soft, clean, dry cloth to clean any lenses, such as camera lenses, light sensor lenses.
10. Use charger indoors.

These suggestions apply equally to your device, charger or any enhancement. If any device is not working properly, take it to the nearest authorized service facility for service.

# Important Safety Information

## ■ **Medical devices**

Operation of any radio transmitting equipment, including wireless phones, may interfere with the functionality of inadequately protected medical devices. Consult a physician or the manufacturer of the medical device to determine if they are adequately shielded from external RF energy or if you have any questions. Switch off your device when any regulations posted in these areas instruct you to do so.

## ■ **Vehicle**

Only qualified personnel should service the device or install the device in a vehicle. Faulty installation or service may be dangerous and may invalidate any warranty that may apply to the device. Check regularly that all wireless device equipment in your vehicle is mounted and operating properly. Do not store or carry flammable liquids, gases, or explosive materials in the same compartment as the device, its parts, or enhancements. For vehicles equipped with an air bag remember that air bags inflate with great force. Do not place objects, including installed or portable wireless equipment in the area over the air bag or in the air bag deployment area. If in-vehicle wireless equipment is improperly installed and the air bag inflates, serious injury could result.

## ■ **Aircraft**

Using your device is prohibited while flying in aircraft. Switch off your device before boarding an aircraft. The use of this device in an aircraft may be dangerous to the operation of the aircraft, disrupt the wireless telephone network, and may be illegal.

## ■ **Potentially explosive environments**

Switch off your device when in any area with a potentially explosive atmosphere and obey all signs and instructions.

## **FCC Warning**

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

## **Specific Absorption Rate (SAR) information**

SAR tests are conducted using standard operating positions accepted by the FCC with the phone transmitting at its highest certified power level in all tested frequency bands, although the SAR is determined at the highest certified power level, the actual SAR level of the phone while operating can be well below the maximum value, in general, the closer you are to a wireless base station antenna, the lower the power output.

Before a new model phone is available for sale to the public, it must be tested and certified to

the FCC that it does not exceed the exposure limit established by the FCC, Tests for each phone are performed in positions and locations (e.g. at the ear and worn on the body)as required by the FCC.

For body worn operation, this model phone has been tested and meets the FCC RF exposure guidelines when used with an accessory designated for this product or when used with an accessory that Contains no metal and that positions the handset a minimum of 1.0 cm from the body.Non-compliance with the above restrictions may result in violation of RF exposure guidelines.
