FCC Statement

This device complies with part 15 of the FCC rules. Operation is subject to the following two conditions:

- This device must accept any interference received, including that from unauthorized stations.
- This device must not cause any interference to other licensed operations.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential environment. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in particular installations. If this equipment does cause harmful interference to radio or television reception, you can usually correct the problem by reorienting the antenna. To avoid interference to other users, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or a qualified technician.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.
