

12. SETUP PHOTOS

RADIATED AND POWERLINE CONDUCTED EMISSIONS MEASUREMENT SETUP	
<p>A photograph showing a white, rectangular test device on a circular turntable inside an anechoic chamber. The chamber walls are covered with black cross-shaped electromagnetic absorbers. Several red metal rods are positioned around the device. A blue cross-shaped mark is visible on the top surface of the device. A small white label with the number '16U22614' is on top.</p>	<p>A photograph showing the back of the white test device on the turntable. Blue and red wires are connected to the device. A blue cross-shaped mark is on the back surface. A small white label with the number '16U22614' is on the back.</p>
<p>A photograph showing the front of the white test device. A red antenna probe is positioned near the device. Blue and red wires are connected. A blue cross-shaped mark is on the front surface. A small white label with the number '16U22614' is on top.</p>	<p>A photograph showing the back of the white test device. A red antenna probe is positioned near the device.
