# Home screen

You can bring all the items (applications, shortcuts, folders, and widgets) you love or use most frequently to your Home screen for quick access.

Touching the **Home** key always takes you back to the main Home screen.

# Reversible screen

This feature allows the UI to flip when the phone is reversed left and right. Stereo sound will always be on the correct side.

To activate this function, touch **Settings** > **Display** > **Reversible rotate**.

The reversible screen function will not apply while you're on a call.

# Phone call

## Making a call

Enter the desired number from the keyboard and touch  to make a call.

## Answering a call

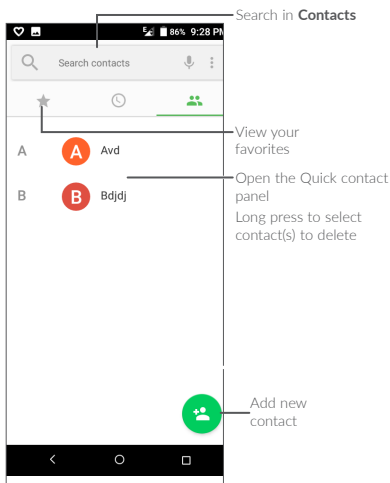

When you receive a call, slide  left, right, or up to:

Answer the call

# Contacts

You can view and create contacts on your phone and synchronize these with your Gmail contacts or other applications on the web or on your phone.

# Messaging

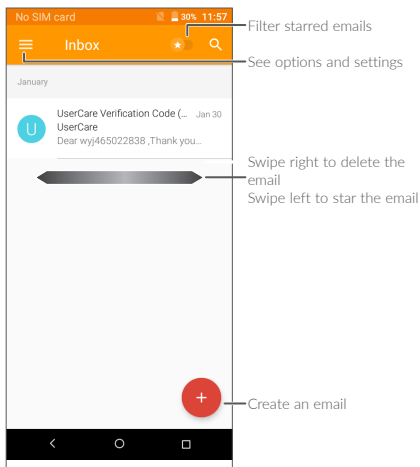

You can create, edit, and receive SMS and MMS.

An SMS will be converted to MMS automatically when media files (image, video, audio, slides, etc.) are attached or subject or email addresses are added.

# Email

The first time you set up your phone, you can select to use an existing Email account or to create a new one.
