4. When put a mobile phone without wireless charging function (for example iPhone 7 plus), or a coin on the wireless charger, the red light will flash to indicate the FOD status.

Product Specifications

Input: DC 5V/2A 9V 2A

Charging efficiency: $\geq 73\%$

Charging distance: 3-10MM
Frequency: 110.1-205 KHz
Wireless charging power: 15W max
Product size: 8cm*8cm*1cm
Product material: PC+ fabric
Charging interface type: USB to Type C cable
Charging cable length: 100cm

Safety precautions

- 1, This product is only suitable for charging mobile phones and electronic products that meet the Qi standard, please do not use it for other purposes;
- 2, Please disassemble the product without permission
- 3, Please place the device in a ventilated place, and avoid high temperature or direct sunlight
- 4, Children are not allowed to use this product alone. they should use this product under the supervision of a guardian
- 5, It needs to be waterproof during maintenance and keep the equipment in a power-off state.

FCC Warning

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:(1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation. Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator & your body.
