

MW-301 user manual

Start:

1. Press "button" , check LED light is in fast flashing.
2. Go to the system setting menu of the mobile phone, turn "ON" Bluetooth function.
3. Search and select the nearby device named as "MW-301" for pairing.
4. Open the default camera apps of the mobile phone.
5. Press "button" to take photos.
6. MW-301 will be disconnected from the phone automatically when rest for 90 sec.

Pair another mobile phone:

7. Turn "OFF" the Bluetooth function on all paired mobile phones. LED light is in fast flashing again.
8. You can now pair another mobile phone by step 3-5.
9. If MW-301 is already paired with more than 7 mobile phones, press "button" and hold 5 sec to clear the first bonded phone and then apply step 3-5 to accept new device.
(Noted: Only one mobile phone could be connected to MW-301 at the same time. User must turn "OFF" the other paired phones when using.)

FCC ID: 2ACGXMW-301

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.

This device and its antenna(s) must not be co-located or operation in conjunction with any other antenna or transmitter.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.
