

USER MANUAL

JAXJOX smart Heart rate monitor

90 mm

70 mm

This product is a sensor type heart rate monitor that will detect heart rate, store and send heart rate data to the Smart phone.

IMPORTANT This product is for sport purposes only and it is not meant to replace any medical advice.

This manual contains important safety and care information, and provides step by step instructions for using this product. Read it thoroughly, and keep the manual in a safe place in case you need to refer to it later.

DEVICE OVERVIEW:

A. Heart Rate Transmitter

a. Front View

b. Rear View

1. Left & Right wearing directions
2. Battery Door

B. Heart Rate Chest Strap

3. Electrodes
4. Fastening buttons

C. Smart phone (Sold separately)

GETTING STARTED

A. Unpacking the product

In this box, you will find:

- Heart rate transmitter
- Adjustable elastic belt
- CR2032 battery – already installed
- User manual

B. To wear chest strap

a. Wet the conductive pads on the rear of the chest belt with a few drops of water, Saliva or conductive gel to ensure solid contact.

b. Strap the heart rate chest belt across your chest. To ensure an accurate heart rate signal, adjust the strap until the belt fits securely below your (chest) pectoral muscles.

c. Attach the transmitter to the strap, marked 'LEFT' towards left.

IMPORTANT Inaccurate heart rate data will be detected if the device is worn in wrong directions.

C. To run software on smart phone, receive the heart rate data.

IMPORTANT

- Cleaning of transmitter and strap in a washing machine or dryer is strongly prohibited.
- Before hand washing the device, detach the transmitter of Heart Rate Monitor where electrodes are located, this part is not washable.
- While washing the straps, make sure water is no higher than 30 C.
- Ironing, bleaching or heating is prohibited.

BATTERIES

The transmitter uses 1 x CR2032 3V battery. The battery is already installed. The battery typically lasts one year.

A. Using a coin, twist the battery door counter clockwise until it clicks out of place.

B. Remove the old battery and insert the new battery with the +side upwards.

C. Replace the battery door by twisting it clockwise until it is firmly in place.

IMPORTANT

1. Non-rechargeable and rechargeable batteries must be disposed of properly. For this purpose, special containers are provided for non-rechargeable and rechargeable battery disposal at communal collection centers.

2. Keep batteries and small articles away from children. If a battery has been swallowed seek immediate medical advice.

3. The batteries supplied must not be recharged, reactivated by any other means, dismantled, put into fire or short-circuited.

CAUTION

RISK OF EXPLOSION IF BATTERY IS REPLACED BY AN INCORRECT TYPE. DISPOSE OF USED BATTERIES ACCORDING TO THE INSTRUCTIONS

Storage

*When the device is initiated, the device will record heart rate data every 2 seconds

*If the workout time does not exceed 2 minutes, the data will be discarded

*The stored heart rate data can only be transmitted via Bluetooth – please download the JAXJOX application

*The device has a memory space for 13 hours of use. Once the data goes beyond this point, the oldest workout data will be removed

App Operation Instruction

Supported Devices

iOS devices: iPhone5, iPad, iPad Mini or higher
Android devices: Android 4.3 or higher with Bluetooth 4.0 or higher with devices memory no less than 1GB

How to install the JAXJOX APP

Search "JAXJOX" in the App store or Google Play

JOXJOX APP icon

Connect to the App

First Time Connection

- Turn on the Bluetooth: Setup - Bluetooth - Turn on the Bluetooth
- ★ Do not try to find or pair with the device on this page.

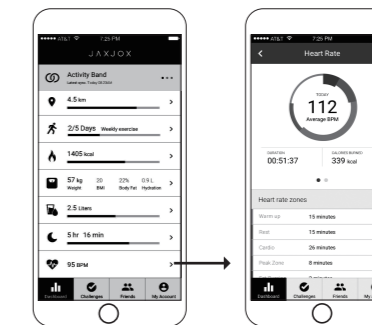

2. Open the App, register an account for the 1st time use, fill in your personal profile, enter My Account page, click: Add device+, enter the searching page, select the found device: JAXJOX

3. Start a new training session: Dashboard page → Active page, select up right corner "+" icon

4. Offline data: Wear the heart rate monitor normally, and make sure that the device is functioning properly. The data collected will be uploaded to the application. Please note that once the data has been sent to the application, it will be removed from the transmitter and will not be transmitted a second time.
