Q&A

Q Headphones can't be paired with mobile phones?

Check whether the headset is paired or connected back, and check the phone's Bluetooth search function.

Q 2 machine method boot?

Please check whether the battery of the earphone is sufficient and charge it for 30 minutes before turning it on.

Q 3 Can I replace the battery of the headset?

No, this headset uses a non-removable battery.

Q 4 Can I use this machine when on?

This headset can be used while driving, but it is not recommended to use a Bluetooth headset while driving and minimize the volume.

Q 5 Is the earphone disconnected from the phone?

The effective distance of the earphone is 10 meters indoors. If the distance between the phone and the earphone exceeds 10 meters or there are multiple obstacles, the earphone and the phone will be disconnected. Please keep within the effective distance to use the earphone.

Q 6 Do you hear different sounds after connecting the headset to your computer or mobile phone?

Because Bluetooth is a wireless technology, it is sensitive to objects between the headset and the connected device

Check for metal or other objects that affect the connection within the connection range. Q After the headset is connected to the phone, can I use the headset to control the app on the phone? The software Settings of the device applications may vary so that the functions of individual applications are not supported by the headset.

FCC Warning

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

-Reorient or relocate the receiving antenna.

-Increase the separation between the equipment and receiver.

-Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

-Consult the dealer or an experienced radio/TV technician for help.

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.
