

EXHIBIT 3 - EUT INTERNAL PHOTOGRAPHS

EUT Housing and Board View 1	
EUT Housing and Board View 2	

Solder Board-Component View 1	 A photograph of a small blue printed circuit board (PCB) component, labeled 'Solder Board-Component View 1'. The component is rectangular and features a large, square, silver-colored integrated circuit (IC) in the center. It has several gold-colored pins or connectors along its edges. The component is placed on a black surface with a white ruler for scale. The ruler shows measurements in millimeters, with markings every 10 mm and sub-markings every 1 mm. The component is positioned horizontally, with its longer side parallel to the ruler's edge.
Solder Board-Component View 2	 A photograph of the same blue PCB component, labeled 'Solder Board-Component View 2'. This view shows the component from a different angle, highlighting the gold-colored pins and connectors. The component is placed on the same black surface with a white ruler for scale. The ruler shows measurements in millimeters, with markings every 10 mm and sub-markings every 1 mm. The component is positioned horizontally, with its longer side parallel to the ruler's edge.

Solder Board-Component View 3	 A photograph of a blue printed circuit board (PCB) component, labeled '3', positioned on a blue textured surface. The component is rectangular with various electronic components, including a large central chip and several smaller components. It is placed next to a black ruler with white markings. The ruler shows measurements in millimeters, with the component spanning approximately 40 mm in width and 20 mm in height. The component is oriented vertically, with its longer side parallel to the ruler's edge.
Solder Board-Component View 4	 A photograph of a blue printed circuit board (PCB) component, labeled '4', positioned on a blue textured surface. The component is rectangular with various electronic components, including a large central chip and several smaller components. It is placed next to a black ruler with white markings. The ruler shows measurements in millimeters, with the component spanning approximately 40 mm in width and 20 mm in height. The component is oriented vertically, with its longer side parallel to the ruler's edge.

Solder Board-Component View 5	 A photograph showing a small, square, gold-colored electronic component mounted on a blue textured surface. The component is positioned next to a black ruler with white markings. The ruler has two scales: one horizontal scale at the bottom ranging from 0 to 100 mm, and one vertical scale on the left ranging from 0 to 80 mm. The component is located approximately at the 20 mm mark on the horizontal scale and the 30 mm mark on the vertical scale.
Solder Board-Component View 6	 A photograph showing a small, square, green electronic component mounted on a blue textured surface. The component is positioned next to a black ruler with white markings. The ruler has two scales: one horizontal scale at the bottom ranging from 0 to 100 mm, and one vertical scale on the left ranging from 0 to 80 mm. The component is located approximately at the 20 mm mark on the horizontal scale and the 30 mm mark on the vertical scale.

Solder Board-Component View 7	 A photograph of a small green printed circuit board (PCB) component, labeled '7', resting on a blue textured surface. The component features a silver rectangular pad, a black rectangular component, and a small white connector. Two thin wires, one red and one black, are attached to the board. A black ruler with white markings is positioned below the component, showing measurements in millimeters.
Solder Board-Component View 8	 A photograph of a small green printed circuit board (PCB) component, labeled '8', resting on a blue textured surface. The component features a silver rectangular pad, a black rectangular component, and a small white connector. Two thin wires, one red and one black, are attached to the board. A black ruler with white markings is positioned below the component, showing measurements in millimeters.

Solder Board-Component View 9	 A photograph showing a green printed circuit board (PCB) with various electronic components, including a large silver rectangular component and several smaller components. The board is placed on a blue textured surface next to a black ruler with white markings. The ruler shows measurements in millimeters (mm) and centimeters (cm).
Antenna View	 A photograph showing the internal components of a device, including a yellow battery, a green PCB, and two antennas. The device is placed on a blue textured surface next to a black ruler with white markings. The ruler shows measurements in millimeters (mm) and centimeters (cm). Two red boxes with labels point to specific antennas: "Wi-Fi RX Ant" points to a small antenna on the PCB, and "GPRS/ LTE Ant." points to a larger antenna on the PCB. Wi-Fi RX Ant GPRS/ LTE Ant.
