

Technical Description

The equipment under test (EUT) is a 2.4GHz transmitter operating at 2402 - 2475 MHz. It is powered by 2 x 1.5V "AAA" batteries

Antenna Type: Coaxial shielded antenna

TX FUNCTION:

The functions of TX main ICs are mentioned as below.

1. **Main Control** is MCU for system and gaming control.
2. **POWER** is LDO.
3. Peripheral keys as the direction of the stability of the regulation and rudder adjustment.
4. LED power indicator represents only
5. **16M Cystal** is crystal oscillator which provide 16MHz clock to **2.4G Module**
