12th July 2017

SUBJECT: Class 2 Permissive Change

FCC ID: 2ACTT-WGM110, 2ACTT-BGM111

I hereby advise the following:

The modules listed above have been installed in the Define IOT (Internet of Things) Bridge.

The original certifications for these modules were for single use modules.

A Class 2 permissive change is requested in order that these two single use modules can be co-located in the Define IOT Bridge host.

The modules have been installed in the IOT Bridge in accordance with the module manufacturer's instructions with both modules being installed on the same circuit board.

In addition to the RF transmitter modules power supply and signal processing circuitry have been added in order to operate as an IOT Bridge.

Testing has been carried out by EMC Technologies New Zealand Ltd the results of which show that the original test results continue to be representative.

The results also show that the two modules can operate simultaneously.

Yours sincerely

A handwritten signature in blue ink, appearing to read "AG", followed by a long horizontal flourish.
