

Letter for Model Differences

Date: October 24, 2022

Letter for Model Differences

Models: NJR4652F2S1, NJR4652F2S2

FCC ID: 2ACUJR4652

Two models listed here above are electrically identical.
The difference between the models is the following:

1. Chirp parameters are only optimized for each sensing capability by each firmware.
 - 1) For the model NJR4652F2S1: Presence Detection
 - 2) For the model NJR4652F2S2: Smart Entrance Counter

Note:

Desired type of a model can only be set by the manufacturer in their MCU of each module.
Therefore, End-user(s) **cannot** change this setting.

For further details, refer to the submitted exhibits, such as Operational Description (especially, chirp parameters), Block Diagram, Circuit Diagrams, Parts List, External Photographs and Internal Photographs.

Sincerely,

By:
