What's in the box?

oiootabletTM
Model 3

Micro USB Cable

Charger

This Startup Guide

Warranty Card

Let's get familiar.

Wake up your oiootablet .

Power Button

Press and hold the power button for 4 seconds to power ON; Press the power button again briefly to go to WAKE or SLEEP mode. To power the tablet OFF, press and hold the power button until you see a confirmation message, then follow the instructions.

Charge the battery.

Your oiootablet battery may have lost some of its juice while sitting in the store. It's a good idea to fully charge the battery as soon as possible. After connecting the supplied Micro USB cable to the tablet, connect the other end of the cable to power adapter. Finally, connect the power adapter to a power outlet. IF your tablet is idle and the battery becomes drained, just turn it off and charge it for 30 minutes before trying to start it back up.

Note: We do not recommend charging through a computer USB connection, which may take too long to charge or may not keep the tablet charged when powered on.

How to charge it up.

Please insert the cable connector the correct way!

Insert Micro USB connector with symbol up and wide side down

Note: The illustration displays the correct orientation for connecting the USB cable. If the USB plug is incorrectly inserted, damage to the USB port may occur and void the tablet's warranty.

Set up your oiootablet.

The first time you turn on your oiootablet, you will see a Lock screen. Touch and slide the lock to the right to start. From there you will be guided through a Setup process with videos and instructions that show you how to make the oiootablet behave just the way you like. To make your digital life even more uniquely your own, you will have immediate access to the full power of Android and over one million apps through Google Play™.

Connect with 4G.

The oiootablet comes with a SIM card from T-Mobile pre-loaded into the Micro SIM card slot. This enables you to activate 200 MB of free cellular data every month for the life of your tablet! Yes, free data every month with no annual service contracts, unless you want more. You can activate or upgrade this service with T-Mobile through the oiootablet setup process or through the T-Mobile ConnectMe app that is included.

Store your data.

The tablet also comes with an open Micro SD slot for extra storage space - for apps, music, photos, videos, documents - your digital stuff. To take advantage of this, you will need to supply your own Micro SD card and insert it into the open slot.

Quick Summary

Always Connected

You can connect the **oiootablet** to the internet by BOTH Wi-Fi and 4G, so you can take your digital life wherever your real life goes.

Social

To make it easy to sign into all your apps and stay in sync with your friends via your favorite apps and networks, we encourage you to login with your social network credentials if you have them.

Useful

Android is amazing. But it can take a lot of effort to FIND all the best apps and then CONFIGURE everything just the way you like it. The **oiootablet** does the GEEK work for you (if you choose) and sets you up with a carefully selected set of some of the best widgets and apps from Google Play from the start.

Uniquely YOU, '100' or 'U'

We all have many interests – and no single style fits everyone. So we created many 'Stiles' (with an 'i') to fit lots of different personal tastes. Try out some of these home-pages at the Stile 'Library.'

You can choose from many useful 'Stiles' – such as shopping, news or sports. Offering great apps and widgets to explore, they're like turnstiles to your favorite topics.

Android, Google™, & Apps

The **oioo**tablet brings the best of Google with the latest version of Android. It comes with all the top Google apps and widgets for mobility, such as Google™ Search, Google Now™, Google Maps™, Gmail™, Chrome™, Google+™ and YouTube™.

It also comes with the Google Play Store app, which gives you access to over one million apps and other great stuff from all the best developers.

Your use of third party apps, widgets and operating systems is governed by the end user license agreements of those third parties. Android, Google, Google Play and other marks are trademarks of Google Inc.

T-Mobile Legal:

Service or use of the **oioo**tablet with T-Mobile's mobile network is subject to your agreement to T-Mobile's Terms and Conditions. T-Mobile requires ARBITRATION of disputes UNLESS YOU OPT-OUT WITHIN 30 DAYS OF ACTIVATION. See T-Mobile's Terms and Conditions for details at www.T-Mobile.com. Use of some content or features on a mobile network may incur separate, additional charges and/or require qualifying service or access to a Wi-Fi connection. Mobile Internet Service: For service beyond the 200 mb free monthly offer, T-Mobile data rates apply. Domestic only. Partial megabytes rounded up. Full speeds available up to monthly allotment; then slowed to up to 2G speeds for rest of billing cycle. Roaming and on-network data allotments differ; see your selected service for details. Data connection speed can vary due to location, environment, network conditions and other factors. Coverage: Service not available in some areas. Network Management: Service may be slowed, suspended, terminated, or restricted for misuse, abnormal use, interference with our network or ability to provide quality service to other users, or significant roaming. See brochures and Terms and Conditions (including arbitration provision) at www.T-Mobile.com for plan options, coverage maps and additional information. T-Mobile is a registered trademark of Deutsche Telekom AG.

Federal Communications Commission (FCC) Statement

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:(1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation. This device has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Do not connect the equipment to an outlet on the same circuit as the receiver.
- Consult the dealer or an experienced radio/TV technician for help.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

FCC RF Exposure Information (SAR)

This device is designed and manufactured not to exceed the emission limits for exposure to radio frequency (RF) energy set by the Federal Communications Commission of the United States.

During SAR testing, this device is set to transmit at its highest certified power level in all tested frequency bands. Although the SAR is determined at the highest certified power level, the actual SAR level of the device while operating can be well below the maximum value. This is because the device is designed to operate at multiple power levels so as to use only the power required to reach the network. In general, the closer you are to a wireless base station antenna, the lower the power output.

The exposure standard for wireless employs a unit of measurement known as the Specific Absorption Rate, or SAR. The SAR limit set by the FCC is 1.6W/kg.

Tests for SAR are conducted using standard operating positions accepted by the FCC with the device transmitting at its highest certified power level in all tested frequency bands.

The FCC has granted an Equipment Authorization for this model device with all reported SAR levels evaluated as in compliance with the FCC RF exposure guidelines. SAR information on this model device is on file with the FCC and can be found under the Display Grant section of www.fcc.gov/oet/ea/fccid, after searching on FCC ID: 2ACUV-CTM-3US.

For this device, the highest reported SAR value for near the body is 1.43 W/kg RF exposure in simulated usage near the body with 0 mm separation.

This product supports:

Wi-fi

Standard: IEEE802.11b/g/n
Operating frequency: 2.4 GHz

Bluetooth: v 3.0

GPS: GPS/AGPS

DANGER - To reduce the risk of electric shock: An adapter should never be left unattended when plugged in. Always unplug this adapter from the electric outlet immediately after using.

WARNING - To reduce the risk of burns, fire, electric shock:

1. Do not allow to be used as a toy. Close attention is necessary when this adapter is used by or near children.
2. Never operate this adapter if it has a damaged cord or plug, if it is not working properly, if it has been dropped or damaged, or fallen into water. In such case, return the appliance to the nearest authorized dealer or service center for examination, repair, electric or mechanical adjustment.
