Ref: Confidentiality request for Metnet 1200 product

To whom it may concern,

This letter accompanies our FCC application for Metnet1200, FCC ID 2ACV4-M1200-003.

CCS has requested permanent confidentiality for the following exhibits:

- Block diagrams
- Internal photos
- Operation Description/Theory of Operation
- Parts list & placement/BOM
- Tune-up procedure
- Schematics
- User manual

Cambridge Communication Systems Ltd. has spent substantial effort in developing this product and it is one of the first of its kind in industry. Having the subject information easily available to "competition" would negate the advantage they have achieved by developing this product. Not protecting the details of the design will result in financial hardship.

The exhibits are not made public and are kept confidential by CCS in the following ways:

1. The design documents are not shared with third parties except under NDA – the standard CCS NDA template is provided alongside this letter.
2. Internal photographs are not available publicly, and the Purchase Agreement for Metnet products specifically requires in clause 3.10 that:

"3.10 The Customer shall not disassemble, decompile, reverse engineer or convert the whole or any part of the Products, including the Software, (except to the extent that such restriction on disassembly, decompiling or reverse engineering is prohibited by law and then the Customer shall provide CCS with prompt written notice prior to any such action)."

Therefore customers are prevented from obtaining such internal photographs.

Yours sincerely,

A handwritten signature in blue ink, appearing to read 'Paul', followed by a horizontal line extending to the right.

Paul Williams
