

Class II Permissive change request & explanation

Date: 11th September 2019

American Certification Body, Inc.
6731 Whittier Avenue
Suite C110
McLean, VA 22101

To Whom It May Concern:

Cambridge Communication systems have developed Metnet 60G mmWave backhaul. The original product Metnet 60G (AC mains powered) is FCC approved under FCC ID : 2ACV4-M60G-001.

As part of the permissive changes, CCS has added the option of powering the unit from Power over Ethernet (PoE) or 48V DC with fibre optic data interface and to use a fibre optic data interface with the AC power version. These changes do not affect the radio performance.

We would like to request ACB to accept our application for additional versions under class II permissive changes.

A handwritten signature in blue ink that reads 'Paul Morris'.
