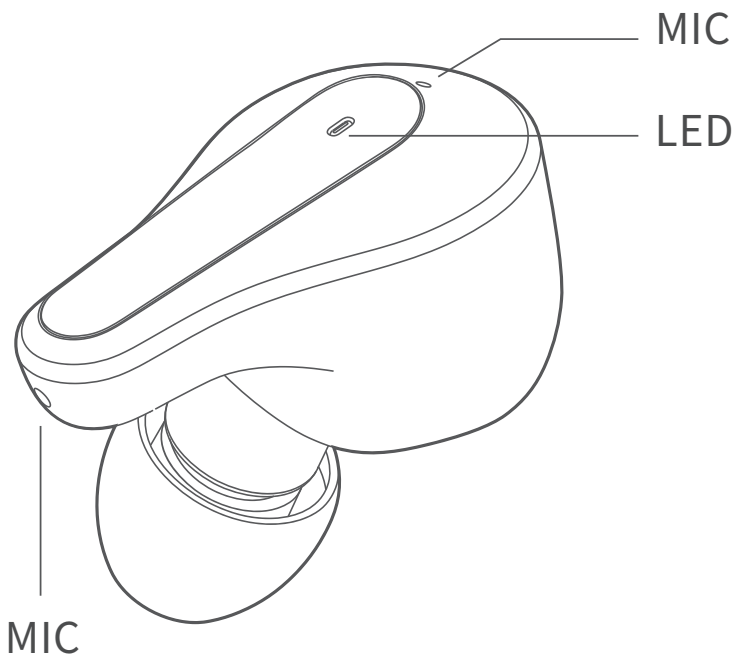
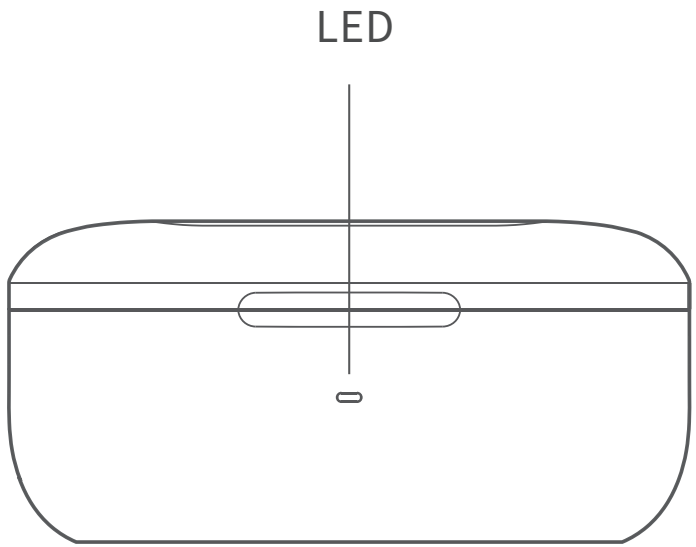
/ Description of Parts/



PWE-200 Earbud



Charging Case(Charging cradle)

/ Product Specifications and features /

Standby Time	200 hours (Slave)
Operating Time (Music)	6 hours
Operating Time(Call)	6 hours
Charging Time	2 hours (±30mins)
Battery Capacity	Earbuds : Lithium ion 3.7V (60mAh), Charging case : Lithium Polymer 3.8V (500mAh)
Working Distance	10m
Supported profiles	HFP / HSP / A2DP / AVRCP
Decoder	SBC, APT-X, AAC
Bluetooth Version	Version 5.0
Power Consumption	0.5W
Frequency Band	2.4GHz ISM Band (2.4000GHz ~ 2.4800GHz)

※ Above mentioned operating times based on connected devices or surrounding environment.

/ How to use /

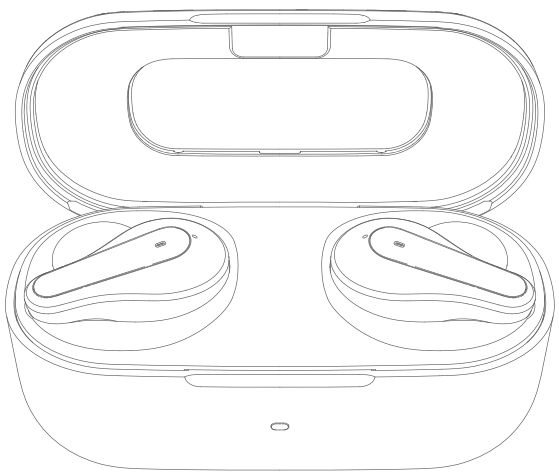
1. Power On / Off

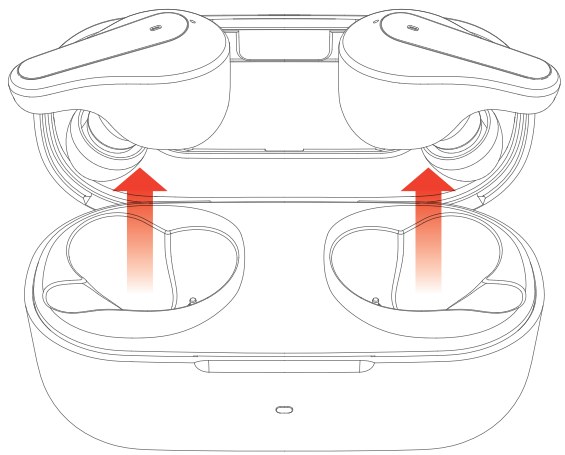
Power On

- The power is automatically turned on when the earbird is removed from the charging case.

Power Off

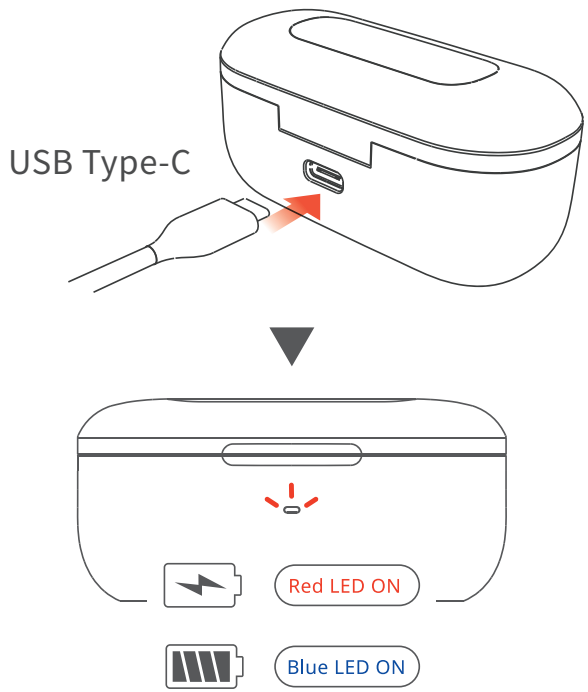
- The power will automatically turn off when the earbird is inserted into the charging case.





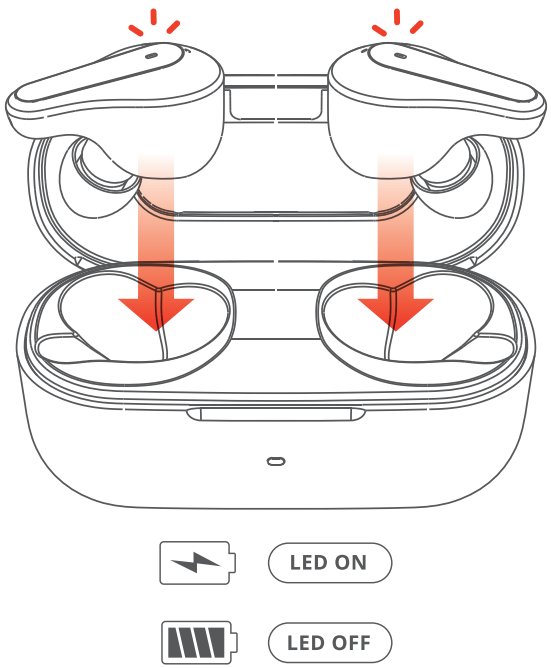
2. Battery Charging

Charging Case



- When the charger is connected to the cradle, the Red LED is on.
- When charging is completed, the LED is off.

Charging Earbuds



- When the earbud is inserted into the cradle, the red LED lights up.
- When the earbud is normally charged, the LED turns off.

※ When the charger is connected, the headset will be disconnected from the device.

Charging case Wireless charging

*Wireless chargers are sold separately.

- The product has a built-in wireless charging function that allows you to charge the product using a wireless charger.
- If the battery temperature rises above a certain level during wireless or high-speed charging, charging may stop for safety reasons.

※Recommendations

- When charging with USB HUB, the charging may not be smooth due to low current, and please use a 5V 500mA to 5V 1A rated charger for fast charging.
  ※ It takes about 2 hours to charge the battery when it is discharged.

※Low Battery Notifications and Alarms

- If the battery charge remains 20%, the red LED will flash rapidly once with an audible "battery is low."

3. **Pairing**

Register pairing

- The first time you turn on the power, the red and blue LEDs continue to flash and automatically enter pairing mode.
- After entering, if there is no connection for two minutes, enter standby.
- In the Bluetooth menu of your phone or target device, turn on Bluetooth, run a search, and locate and connect PWE-200 in the list of devices searched.
-"Connected" when connected normallyThe LED turns off with an announcement.
- Once registration is completed, it will automatically connect in the future.
- 1 to 3 seconds after registration is completed, a request is made to register the opposite earbird.
- When a pairing request occurs, please click "OK" or "Accept" to register.
- If both PWE-200-L and PWE-200-R are registered on the Bluetooth list, any subsequent removal of the earbuds from the charging case will automatically connect.

※If the red and blue LEDs do not keep flashing when the power is on, please follow the procedure below.

- With power on, touch the earbird on the side you want to register for 6 seconds.
- The red and blue LEDs continue to flash with the sound of "Start pairing".
- After entering, if there is no connection for two minutes, enter standby.
- On the Bluetooth menu of the device you want to pair, turn on Bluetooth and connect PWE-200 from the list of discovered devices.
- When connected normally, the LED will turn off with a "Connected" sound.

- Once registration is completed, after automatically connected.
- After 1 to 3 seconds of registration, you will be asked to register the opposite earbird, so press "OK" or "Accept" to register.
- Once PWE-200-L and PWE-200-R are all registered on the Bluetooth list, any subsequent removal of the earbird from the cradle will automatically connect.

4. PeerMode

- When you first receive the product and turn it on, it automatically connects between earbuds so you can listen to music on both sides.

※If one outside can be heard if you don't follow the steps below.

- Both ieobeodeu to touch, followed by 10 seconds after No. 2 in power is switched on in touch.
- The purple LED on both earbuds flashes once and then powers back on.
- The blue LED flashes every 0.3 seconds after power is back on.
- Once the earbird-to-earbird connection is complete, the blue LED stops flashing and the peer is completed.
- Automatically enters pairing mode after the earbird-to-eard connection is complete.

5. Call Answer / Call End / Call Reject

Call Answer, Call End

- When the phone rings, touch the earbird twice briefly to answer the call.
- If you touch the earbird twice during a call, the call will be terminated.

Call Reject

- Touch the earbird for more than 1 second to reject the call.

6. Call Transfer

- If you touch the MASTER-Earbird (one side) during an earbird call, it switches to mobile phone mode and you want to call the earbird again. A touch of the MASTER-Earbird (one side) switches the call to the earbird.

7. Music Play

Music Play

- Touch the button briefly to play the song.

Music Stop

- Touch the button briefly to stop the song.

8. Multi Pariring

- Multi-pairing is useful when connecting more than one mobile phone device.
- For multiple pariring, music or calls can only be made on one device at a time on PWE-200.

9. Auto Reconnect

Automatic connection on removal from the charging case

- If you have previously paired mobile phone information, it automatically connects when the earbird is removed from the charging case.

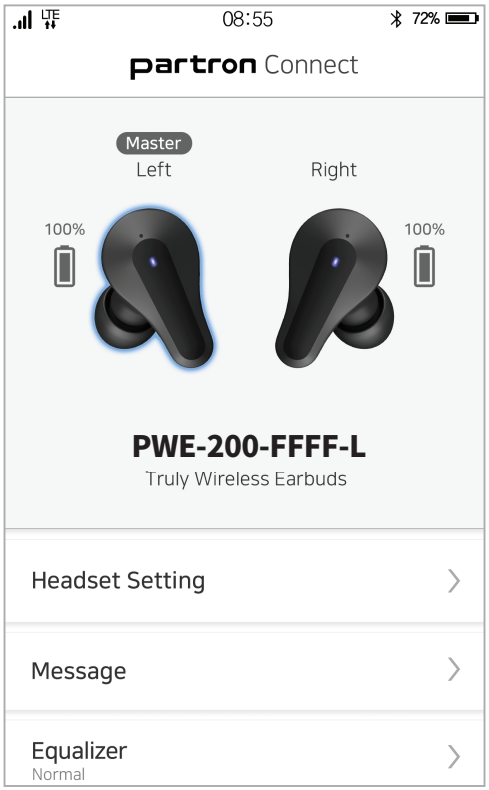
※ If the automatic connection failed, briefly touch the button once to connect.

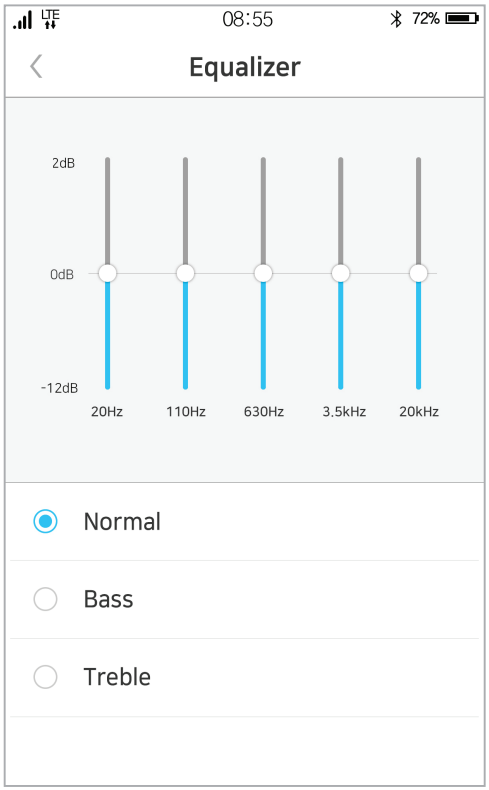
Out Of Range

- If a connected device is more than 10m away from the earbuds, the voice alert “disconnected” will be heard of the earbuds.

- The earbuds reconnects automatically if the device is placed within the connection range.

10. Using of Partron Connect application





Partron Connect
APP Download

ANDROID APP ON Google play

Available on the App Store

- “Partron Connect” is available for download in Google Playstore and Apple Appstore.

- Additional functions are available such as change of the headset Equalizer/ Volume set-up etc after installing the Partron Connect app.

FCC Compliance Information

FCC ID : 2AD5K-PWE200

1) FCC Compliance Statement

This device complies with part 15 of the FCC rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

2) FCC Interference Statement

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation.
If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to correct the interference by one of the following measures:

Reorient or relocate the receiving antenna.

Increase the separation between the equipment and receiver.

Connect the equipment into an outlet on a circuit different from which the receiver is connected.

Consult the dealer or an experienced radio/TV technician for help.

3) FCC Caution

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate this equipment. This transmitter must not be co-located or operating in conjunction with any other antenna or transmitter.

-This equipment complies with RF exposure requirements set forth for an uncontrolled environment.
