## Uncertainty

---

Uncertainty (factor  $k=2$ ) was calculated according to the DEKRA Testing and Certification S.A.U. internal document PODT000.

The total uncertainty of the measurement system for the measured conducted disturbance characteristics of EUT from 150 kHz to 30 MHz is  $I = \pm 3,9$  dB for quasi-peak measurements,  $I = \pm 3,2$  dB for peak measurements ( $k = 2$ ).

The total uncertainty of the measurement system for the measured radio disturbance characteristics of EUT from 30 MHz to 1000 MHz is  $I = \pm 4,9$  dB for quasi-peak measurements,  $I = \pm 4,6$  dB for peak measurements ( $k = 2$ ).

The total uncertainty of the measurement system for the measured radio disturbance characteristics of EUT from 1000 MHz to 12.75 GHz is  $I = \pm 2,6$  dB for peaks and average measurements ( $k = 2$ ).

## Data provided by the client

---

The following data has been provided by the client:

1. Information relating to the description of the sample ("Identification of the item tested", "Trademark", "Model and/or type reference tested")
2. OURA is a revolutionary wellness ring and app, designed to help user gets more restful sleep and performs better. It enables user to learn how the lifestyle choices affect user's sleep, and how the quality of the sleep affects user's ability to perform.

The OURA ring can automatically tell when user is sleeping. When user goes to sleep, the OURA ring analyzes the quality of the rest and recovery by measuring the heart rate (optically), respiration rate, body temperature, and movement. While user is awake, it monitors the duration and intensity of the activities, and the time user spends sitting.

The OURA app integrates and visualizes this data to identify patterns between the sleep quality and daily activities. By understanding how well user slept and recharged, it can determine the readiness to perform and help user adjust the intensity and duration of the day's activities. It can also uncover actionable insights for changes to the daily activities that can help user sleep better.

## Declaration of differences

### Purpose of the document:

This document contains general information of the Oura Ring Gen3 HW differences.

### Ring sizes:

There are eight sizes of the rings: US6, US7, US8, US9, US10, US11, US12 and US13. All sizes are identical in RF characteristics.

All sizes were pre-tested and size US11 was selected as worst case to represent all sizes.

The rings in different sizes also have different size circuit boards and capacity batteries.

Every eight size of rings need dedicated battery type/physical size. Batteries are Li-ion type.

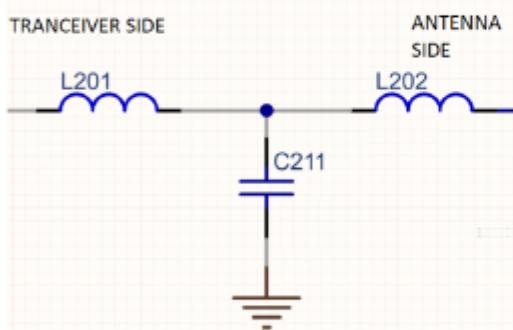

- Li-ion type
- Nominal voltage 3.7V
- Capacities varying from 15mAh to 22mAh depending on battery size.
- Batteries are CB certified and tested according to UN 38.3 requirements

## HW versions BLB03 vs. BLB04:

### Memory

BLB03 and BLB04 HW versions have slightly different memory systems. BLB\_03 have two of SPI controllable MX25R6435FBDILO 64MB flash memories and BLB\_04 one GD25LE128ELIGR 128MB flash memory component.

### BLB\_03

- o two of MX25R6435FBDILO NOR flash memory component

- o Max clock frequency 133 MHZ

### Battery charge state sensing:

The charge state is sensed from the battery. There are differences between state sensing between BLB\_3 and BLB\_04 design. BLB\_03 design uses battery gauge MAX17260 for the sensing and the BLB\_04 uses direct battery voltage sensing using processors ADC input.

## Description of the operation modes

---

The operation modes described in this paragraph constitute a functionality of the sample under test for itself. Every operation mode takes a failure criteria for the immunity test that they were applying to it and a monitoring to guarantee performance of the same ones.

The operation modes used by the samples to which the present report refers, are shown in the following table:

Id	Description
OM/01	EUT ON. Charging in IDLE mode. Power supply: 5 Vdc
OM/02	EUT ON. Charging ring with Bluetooth ON with communication established. Power supply: 5 VDC (through auxiliary AC/DC 110 Vac).
