

## Description of Permissive Change

Date: 2018/1/3

Federal Communications Commission  
Authorization and Evaluation Division  
7435 Oakland Mills Road  
Columbia, MD 21046

Attn: OET Dept.

Ref: FCC class II permissive change.

Applicant: **Nokia Solutions and Networks.**

**Dear Examiner,**

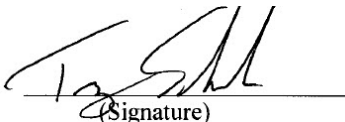

This is to request a Class II permissive change for FCC ID: 2AD8UFZPFWID01

This Equipment is prepared for FCC Reassessment, The hardware is identical in all respects to the version used in the original FCC filing. The difference compared to the original is that the following additional LTE Modulation type and WCDMA air interface operation is now supported as listed below:

1. Add 256QAM LTE modulation. This functionality is enabled by a software update from the base station controller to the unit.
2. Add WCDMA B4 (BW 5MHz, support 2 carriers). In this use case WCDMA capable products will be shipped from the factory in WCDMA mode configuration. Should the customer wish to migrate from the WCDMA air interface to the LTE air interface in the future, this functionality is enabled by a software update from the base station controller to the unit. The product cannot operate in both WCDMA and LTE modes simultaneously. Once migrated to LTE air interface it will remain in that configuration.

If you have any questions regarding this application, please feel free to contact me.

Sincerely yours,

(Signature)

Terry Schwenk
