

Product summary: IP Video Door Station D11x

The product "IP Video Door Station D11x" is a network/IP based video door station.

Product photo

Integrated Radio/Wireless modules: 2.4 GHz Wifi module, Bluetooth module, Radar sensor module with FCC ID 2ACUJR4266F2B

Integrated Lamp: IR Light (12x IR LEDs)

Power supply: 15 VDC or PoE IEEE802.3.af

Network interfaces: Ethernet with cable

Required certifications: CE (RED), ROHS 2.0, FCC (ID), IC (ID), REACH 201 (with 201 SVHC tests), 10 ROHS 2.0 tests, IEC/EN 62368, IEC/EN 62471

Full product datasheet: Upon request by email

Base Data: IP Video Door Station D11x

Product name / EUT name: IP Video Door Station

Trademark: DoorBird

Model Number / Name: D11x

Prepared for: Bird Home Automation GmbH

Address: Joachimsthaler Str. 12, 10719 Berlin, Germany

Manufacturer: Bird Home Automation GmbH

Address: Joachimsthaler Str. 12, 10719 Berlin, Germany

USA, FCC Grantee Code + Product code: 2AD99B009D

Canada, IC Company number (CN) + Unique Product Number (UPN): 20208-B009D

Boards / Inner Components: IP Video Indoor Station A1101

8 Ohm Speaker

Intercom Camera Image Sensor Board v1

With Image Sensor Sony IMX323
Block Diagram, Operational Description (Explanation of Block Diagrams) and BoM / Key components provided by: liaoxtali@hichip.net

Intercom Camera Main Board v1

With Wifi Module
Block Diagram, Operational Description (Explanation of Block Diagrams) and BoM / Key components provided by: liaoxtali@hichip.net

IR LED Board BHAD11LED

Block Diagram, Operational Description (Explanation of Block Diagrams) and BoM / Key components provided by: Bird Home Automation GmbH.

2.4 GHz WiFi antenna

With ipex connector

Microphone

BLE Board BHAD11BLE

With Rigardo BLE Module
Block Diagram, Operational Description (Explanation of Block Diagrams) and BoM / Key components provided by: Bird Home Automation GmbH.

Adapter Board BHAD11EC

With Radar sensor module
Block Diagram, Operational Description (Explanation of Block Diagrams) and BoM / Key components provided by: Bird Home Automation GmbH.

Light sensor

Power supply: IP Video Door Station D11x

Option 1

Any applicable certified (e.g. CE, UL..) power supply with 15 VDC @ 1 Ampere output, e.g. UT20 (available in different colors, e.g. white) or TEKA018-1501000XX

Option 2

Any IEEE802.3.af conformal power supply (e.g. PoE injector / PoE Switch)

Putting into operation: IP Video Door Station D11x

Easiest way to put the "IP Video Door Station D11x" into operation:

- A Network/IP router
- Free App "DoorBird", available at Apple App Store and Google Play Store

If you need help/advice: please contact by email certlab-support@doorbird.com

INSTALLATION MANUAL

Read these instructions carefully before starting to use any components. Keep the manual so you can refer to it at a later date if required. If you hand over the device to other persons for use, please hand over the operating manual as well.

You can always find the most up-to-date version of the installation manual on www.doorbird.com/support To make things easier we use the term "device" for the product "IP Video Door Station D11x series" and "mobile device" for a smartphone or tablet.

Liability

Every care has been taken in the preparation of this document. Please inform Bird Home Automation GmbH of any inaccuracies or omissions. Bird Home Automation GmbH cannot be held responsible for any technical or typographical errors and reserves the right to make changes to the product and manuals without prior notice. Bird Home Automation GmbH makes no warranty of any kind with regard to the content of this document, including, but not limited to, the implied warranties of merchantability and fitness for a particular purpose. Bird Home Automation GmbH shall neither be liable nor responsible for incidental or consequential damages in connection with the furnishing, performance or use of this material. This product is only to be used for its intended purpose.

Equipment Modifications

This equipment must be installed and used in strict accordance with the instructions given in the user documentation. This equipment contains no components that require service by the user. Unauthorized equipment changes or modifications will invalidate all applicable regulatory certifications and approvals.

Symbols used

Danger: Indicates a hazardous situation which, if not avoided, will result in death or serious injury.

Warning: Indicates a hazardous situation which, if not avoided, could result in death or serious injury.

Caution: Indicates a hazardous situation which, if not avoided, could result in minor or moderate injury.

NOTICE **Notice:** Indicates a situation which, if not avoided, could result in damage to property.

Important: Indicates significant information which is essential for the product to function correctly.

Note: Indicates useful information which helps in getting the most out of the product.

Hazard information

WARNING

- Mounting, installation and servicing work on electrical devices may only be performed by a qualified electrician. Failure to observe this regulation could result in the risk of serious damage to health or fatal injury due to electric shocks.
- Devices with 110-240 V connection: The device may only be connected to an easily accessible power socket outlet. The mains adapter must be pulled out if a hazard occurs.
- For power supply, only use the original plug-in mains adapter delivered with the device or a recommended PoE-Switch/PoE-Injector as specified in this manual.
- Because of electrostatic charging, direct contact with the circuit board can result in destruction of the device. Direct contact with the circuit board must therefore be avoided at any time.
- Observe the EN 60065 resp. EN 60950 resp. EN 62368 standard.
- Do not use the device if there are signs of damage to the housing, control elements or connecting sockets, for example, or if it demonstrates a malfunction. If you have any doubts, please have the device checked by an authorized expert.
- Do not open the device. This voids the warranty of the device. The device does not contain any parts that can be maintained by the user. In the event of an error, please have the device checked by an authorized expert.
- For safety, approval and licensing reasons (CE/FCC/IC etc.), unauthorized change and/or modification of the device is not permitted.
- The device is not a toy; do not allow children to play with it. Do not leave packaging material lying around. Plastic films/bags, pieces of polystyrene, etc. can be dangerous in the hands of a child.
- Always lay cables in such a way that they do not become a risk to people and domestic animals.
- Voltage is applied to parts within the equipment. Do not touch any parts that are not associated with the installation, wiring, or connection. Electric shock could result.
- On devices which are not marked as weather-proof: Keep the device away from water or any other liquid.
- Do not install or make any wire terminations while power supply is plugged in. It can cause electric shock or damage to the device.
- Before turning on power, make sure wires are not crossed or shorted. If not, fire or electric

**WARNING**

- shock could result.
- High voltage may be present internally. Do not open the device. Electric shock could result.
- The device is not of explosion-proof. Do not install or use near gases or flammable materials. Fire or explosion could result.
- Do not install two power supplies in parallel to a single input. Fire or damage to the device could result. Be sure to connect a single power supply to the device.
- Do not connect any terminal on the device to an AC power line. Fire or electric shock could result.
- Keep AC cord from being marred or crushed. If the AC cord is fractured, fire or electric shock could result.
- Do not plug or unplug with wet hands. Electric shock could result.
- Do not put any metal or flammable material into the device. Fire, electric shock, or device trouble could result.
- Existing wiring may contain high voltage AC electricity. Damage to the device or electric shock could result. Wiring and installation must be done by a qualified electrician.
- When mounting the device on a wall or ceiling, install the device in a convenient location, but not where it could be jarred or bumped. Injury could result.
- On devices with ground terminals, connect to an earth ground. Otherwise fire or malfunction could result.
- On devices with plastic or real glass, do not put high pressure on the glass. If fractured, injury could result.
- On devices with LCD, if LCD is punctured, do not allow contact with the liquid crystal inside. Injury could result. If necessary, gargle your mouth and clean your eyes or skin with clear water for at least 15 minutes and consult your doctor.
- Do not put anything on the device or cover the device with cloth, silicone, glue, coating, separate covering etc. Fire or device issues could result.
- Do not install the device in any of the following locations. Fire, electric shock, or device trouble could result.
- Places under direct sunlight or places near heating equipment that varies in temperature.
- Places subject to dust, oil, chemicals, hydrogen sulfide (hot spring).
- Places subject to moisture and humidity extremes, such as bathrooms, cellars, greenhouses, etc.

- Places where the temperature is very low, such as inside a refrigerated area or in front of an air conditioner.
- Places subject to steam or smoke (e.g. near heating or cooking surfaces).
- Where noise generating devices such as dimmer switches or inverter electrical appliances are closeby.
- Locations subject to frequent vibration or impact.
- On devices with intercom, be sure to perform a call test with low audio volume on both intercom devices. A sudden call etc. may arrive causing for example damage to your ear.
- If the device does not operate properly, unplug the power supply.
- All devices which are not marked as weather-proof are designed for indoor use only. Do not use outdoor.
- On devices which are marked weather-proof: Do not spray with high-pressure water. Device issues could result.
- We do not assume any liability for damage to property or personal injury caused by improper use or the failure to observe the
- hazard information. In such cases, any claim under warranty ceases. For consequential damages, we assume no liability!

Safety instructions

- The device shall be used in compliance with local laws and regulations.
- Store the device in a dry and ventilated environment.
- Avoid exposing the device to shocks or heavy pressure.
- Do not install the device on unstable brackets, surfaces or walls. Make sure the material is strong enough to support the weight of the device.
- Use only applicable tools when installing the device. Using excessive force with tools could cause damage to the device.
- Do not use chemicals, caustic agents, or aerosol cleaners.
- Use a clean dry cloth for cleaning.
- Use only accessories that comply with technical specification of the device. These can be provided by Bird Home Automation GmbH.
- Use only spare parts provided by or recommended by Bird Home Automation GmbH.
- Do not attempt to repair the device by yourself. Contact Bird Home Automation GmbH for service matters.

- Keep the device more than 1 m (3.3') away from microwave, radio, TV, wireless router and any other wireless devices.
- On devices with intercom or built-in speaker or built-in microphone or signal transmission functions, keep the wires more than 30 cm (12") away from AC 100-240 V wiring. AC induced noise and/or device malfunction could result.
- Install the device in an area that will be accessible for future inspections, repairs and maintenance.
- If the device is used close to a cellular phone, the device may malfunction.
- The device can be damaged if dropped. Handle with care.
- The device turns inoperative during power failure.
- On devices with intercom or built-in speaker or built-in microphone, in areas where cellular or Radio / TV broadcasting station antennas are closeby, the device may be affected by radio frequency interference.
- On devices with LCD screen, it must be noted in advance that the LCD panel, though manufactured with very high precision techniques, inevitably will have a very small portion of its picture elements always lit or not lit at all. This is not considered a device malfunction.
- On devices with intercom, due to the environmental sound around the device, it may hinder smooth communication, but this is not a malfunction.
- On devices with Username/Password, the Username/Password to access the device is the customer's responsibility. Make sure to use a password that cannot be easily guessed by a third party. We recommend that you change the Password on a regular basis.
- We will, under no circumstances, be liable for damage that occurs due to failures in power supply, network equipment or terminal devices; failures due to Internet providers and cellular network providers; failures such as disconnected lines and other losses in communication, which makes it impossible to provide this service as well as in any way delay this service due to any other causes outside of our responsibility; or if an error or missing data occurs during transmission.

Transportation

When transporting the device, use the original packaging or equivalent to prevent damage to the device.

Warranty Information

For information about the device warranty, see www.doorbird.com/warranty

COMPONENTS*

1x Main Electrical Unit
with call button(s)
and front panel

1x Back-housing with
wall-mounting bracket

1x Installation manual

1x Quickstart guide
with Digital Passport

1x Drilling template

1x Waterproof A4 laser
printer paper for labelling
name plates

1x Power supply unit (mains adaptor)
with four country-specific adaptors

1x RJ45 Adapter

1x Screw connection
terminal plug

Small parts

* The sketches in this manual may differ from the purchased model.

DEVICE WITH 1 CALL BUTTON

Front

- 1) Front panel
- 2) HDTV Video
- 3) Security screws
- 4) Light Sensor
For night-vision mode
- 5) Bluetooth transceiver
- 6) Speaker
- 7) Microphone
- 8) 4D Motion sensor
- 9) Illuminated call button with nameplate

Inside

- 10) Diagnostic-LED
Lights up a few seconds after
connecting the device to power
- 11) Main Electrical Unit
- 12) Screw connection terminal
- 13) Gasket
- 14) Housing with wall-mounting bracket

The flush-mounted model may differ optically.

DEVICE WITH 2 CALL BUTTONS

Front

- 1) Front panel
- 2) HDTV Video
- 3) Security screws
- 4) Light Sensor
For night-vision mode
- 5) Bluetooth tranceiver
- 6) Speaker
- 7) Microphone
- 8) 4D Motion sensor
- 9) First illuminated call button with nameplate
- 10) Second illuminated call button with nameplate

Inside

- 11) Diagnostic-LED
Lights up a few seconds after connecting the device to power
- 12) Main Electrical Unit
- 13) Screw connection terminal
- 14) Gasket
- 15) Housing with wall-mounting bracket

The flush-mounted model may differ optically.

DEVICE WITH KEYPAD MODULE

Front

- 1) Front panel
- 2) HDTV Video
- 3) Speaker
- 4) Security screws
- 5) Light Sensor
For night-vision mode
- 6) Microphone
- 7) Bluetooth tranceiver
- 8) 4D Motion sensor
- 9) Keypad Module
The illumination is also acting as Diagnostic LED(s)
- 10) Illuminated modern call button (with nameplate) or illuminated classic call button (round)

Inside

- 11) Main Electrical Unit
- 12) Diagnostic-LED
Lights up a few seconds after connecting the device to power
- 13) Gasket
- 14) Screw connection terminal
- 15) Holder for 2-Wire Ethernet PoE Converter A1071 (optional)
- 16) Housing with wall-mounting bracket

The flush-mounted model may differ optically.

VIDEOS

Need help with the installation? Be sure to watch our installation videos which can be found on <http://www.doorbird.com/support>

Each individual step of the installation is clearly documented in the videos.

INSTALLATION

All the steps below should be carried out carefully by a competent adult, taking into consideration any applicable safety regulations. Please contact us directly or seek the advice of a competent specialist.

Please ensure that all wires used for the installation are undamaged along their entire length and approved for this type of use.

Network speed and network components

Please ensure that the upload speed of your Internet connection is at least 0.5 Mbps. The user experience is only as good as your network speed, network stability and quality of your network components, such as your Internet Router and WiFi access points or WiFi repeaters. Please also make sure that your network components are no older than two years old, have been manufactured by a well-known manufacturer, and have the latest firmware installed.

Should these requirements not be fulfilled, it may occur, for example that the performance of audio and video is poor or push notifications are delayed or do not arrive on your smartphone or tablet at all.

Requirements:

High-speed Internet (via landline): DSL, cable or optical fibre

Network: Ethernet, with DHCP

1

SWITCHING OFF POWER

Switch off the power to all wires leading to the assembly location, i.e. the door chime, electric door opener, power supply unit for the video door station etc.

2

DISMANTLING THE EXISTING DOORBELL

Should there already be a doorbell or door station on the exterior wall of the house, please remove it.

3

DETERMINING THE ASSEMBLY LOCATION

The device uses an ultra wide-angle hemispheric lens so that even when the person is a minimum distance of 50 cm (19.68 in) away from the device, a low installation height is sufficient. The lens is therefore not mechanically adjustable. The camera lens should be located at an altitude of at least 145 cm (57 in). You may check this prior to the final mounting.

Only for D1101V & D1102V

We offer additional wall-mounting kits for D1101V and D1102V Surface-Mount with a wedge corner wall-mount adapter (7.5° vertical down or up) and alternatively an angle corner wall-mount adapter (45° horizontal, mounts left or right).

A8001 Wedge corner wall-mount adapter (7.5°, mounts vertical down or up), sold separately

A8002 Angle corner wall-mount adapter (45° horizontal, mounts left or right), sold separately

When choosing the assembly location, consider the lighting conditions. Avoid direct sunlight, direct backlight and reflective surfaces.

Do not expose the device to direct sunlight. The housing temperature can exceed the maximum allowed temperature limit. This can result in damage of electric and mechanic components of the device and injuries especially when touching exterior parts of the device. White and bright silver-colored front plates absorb less sunlight than dark ones.

An image sensor must not be exposed to direct sunlight for an extended period of time. Direct sunlight will “blind” the camera and may permanently bleach the small color filters on the image sensor chip.

Any defects caused by direct sunlight are not covered by warranty.

4

ASSEMBLING THE MOUNTING HOUSING

The product is available as a surface-mounted and flush-mounted version. In the flush-mounted version, the front panel is slightly larger to better cover the hole in the wall and the mounting housing (backbox) is made entirely of metal instead of plastic.

If you use the flush-mounted housing, lever up the wall accordingly.

If the wall of the house is not made of wood, you

should drill dowel holes 5 mm (0.19 in) in diameter in the wall according to the drilling template and then place the dowels provided into the boreholes.

If you must drill holes in a wall, insert screws into a wall or lever up a wall, ensure that no cables or mains (gas, water, etc.) are to be found in the wall.

If the wall of the house is made of wood, dowels are not normally required. There are special dowels for assembling the device on an insulating wall, e.g. Fischer insulating dowels.

4.1 ASSEMBLING THE FRONT PANEL

Remove the front panel with the attached Main Electrical Unit carefully from the mounting housing (backbox) using the screw driver provided.

We have designed the front panel and safety screws in a way that they cannot be screwed through the front panel so that they do not fall off / get lost during installation.

D1101V & D1102V

Turn the safety screws counter-clockwise until they are loose.

Pull the front panel with attached Main Electrical Unit out of the mounting housing (backbox).

D1101KH

Turn the safety screws counter-clockwise until they are loose.

Pull down the front panel.

Pull the front panel with attached Main Electrical Unit out of the mounting housing (backbox).

4.2 MOUNTING

Lead all cables and wires you want to connect to the device through the mounting housing.

Flush-mounted models

Surface-mounted models

Screw the wall-mounting bracket of the mounting housing to the wall.

Flush-mounted models

Please make sure that the outer frame of the flush-mounted housing rests on the outside of the wall and that the edge of the flush-mounted housing is sealed all around against moisture from the outside.

Surface-mounted models

5

NETWORK CONNECTION OPTIONS

You can connect the device to the network by either using a WiFi 2.4 GHz connection (only for D1101V and D1102V) or a network cable.

OPTION 1

Network cable

(recommended, maintenance free)

Install a network cable (which is plugged into a network switch / router with Internet access) from the inside of your building to the assembly location. The network cable between the assembly location and the network switch / router can have a maximum length of 80 m/262 ft (IEEE 802.3). If you must span a distance of more than 80 meters/262 feet you can put a network switch in between.

If you have only two wires available at the assembly location, you may use the "DoorBird 2-Wire Ethernet PoE Converter A1071", sold separately. It allows you to transfer network data (Ethernet) and power (PoE) with a simple two-wire cable over long distances. For example, existing buildings with a simple two-wire bell wire can be equipped with network technology without having to retrofit any network cables.

OPTION 2

WiFi 2.4 GHz

(only for D1101V and D1102V)

For reasons of network stability, we principally recommend using a network cable, as WiFi is sensitive to interference (range, house walls acting as shields, reliability of performance, third party WiFi networks, wireless transmitters causing interference in the area, etc.).

When using WiFi please make sure you have a good WiFi signal at the assembly location of the device. You can increase the WiFi signal by using so called "WiFi repeaters", which can boost your WiFi signal. You should install such a WiFi repeater close to the assembly location of the device, typically inside your home and close to the device.

The device does not have a battery as power supply, therefore, choose one of the following options.

OPTION 1

Power supply using the power supply unit (mains adaptor)

To power the device using the provided mains adapter, 2 insulated wires are required. The power supply unit has a 300 cm (9.8 ft) long cable with two insulated wires. The network connection is then established via a network cable or alternatively via WiFi.

The provided mains adaptor is only capable to power one device. It is not designed to power multiple devices simultaneously.

If you must power more than one device with one power supply, we recommend to use a PoE-Switch with PoE Standard IEEE 802.3af Mode A or an appropriate DIN rail power supply (see "OPTION 3").

Do not plug the power supply unit into the wall socket yet.

Only use the power supply unit provided along with the device, or a DIN-rail power supply unit (see "OPTION 3") that you can obtain from us separately, since this has been specially stabilized electrically and is equipped with an integrated audio interference reduction device. Other power supply units may destroy the device or cause poor transmission quality. The warranty automatically expires if you use a different power supply unit.

The power supply unit is plugged into a wall socket inside your house (Step 10), usually where the two wires from your assembly location come out of the wall in the interior of the house.

The provided mains adapter is not outdoor-ready, it is for indoor-use only.

OPTION 2

Power supply and network connection using PoE (Power over Ethernet)

To power the device via a PoE-Switch (e.g. D-Link DGS-1008P) or PoE-Injector (e.g. DoorBird Gigabit PoE Injector A1091), use a CAT.5 cable or higher in accordance with the PoE standard IEEE 802.3af Mode A.

A CAT.5 cable or higher must be used for this purpose, as network signals can only be transmitted over completely insulated, shielded and twisted cables. If you use PoE as a source of power, the four wires for PoE then simultaneously form the data line. The device will not start if your PoE-Switch/PoE-Injector does not support the PoE Standard IEEE 802.3af Mode A.

If you must power more than one device with one power supply, we recommend to use a PoE-Switch with PoE Standard IEEE 802.3af Mode A or an appropriate DIN rail power supply (see "OPTION 3").

Theoretically (not recommended by us!), an unshielded, but over the whole length (max. 80 m/262 ft) twisted bell wire with two pairs of wires (first twisted pair of wires: "T+, T-", second twisted pair of wires "R+, R-") can be used for the network and PoE transmission as an alternative to a Cat.5 network cable or better. This is comparable to a Cat.3 network cable. In this case, however, we cannot guarantee the data throughput or the stability of the network connection and power supply; this must be measured and checked on site by qualified personnel over several hours (network data is transmitted at high frequency, therefore a shielded Cat.5 network cable twisted in pairs or better must normally be used).

Do not combine the power supply from the power supply unit (mains adaptor) with the power supply via PoE.

You can find further information about PoE here: <http://www.doorbird.com/poe>

1. Disconnect the PoE-Switch or PoE-Injector from the power grid.
2. Place the network cable in the installation site of the device.

OPTION 3

Power supply using a DIN rail power supply unit

Alternatively to the mains adapter, we offer DIN rail power supplies in our online shop, which can be installed by a specialist. The network connection is then made via a network cable or alternatively via WiFi.

If you must power more than one device with one power supply, we recommend to use a PoE-Switch with PoE Standard IEEE 802.3af Mode A or an appropriate DIN rail power supply.

7

CONNECTING THE DEVICE

It is possible to connect the cables and wires to the device conveniently and safely via the labeled screw connection terminal. You can connect all necessary cables and wires to the device now.

For easier installation we strongly recommend to remove the plug from screw connection terminal while you connect the cables and wires.

Please remove any cables and wires from the connection ports of the device that you do not need.

Port	Description
LAN/POE	<div data-bbox="191 113 294 231"> </div> <p data-bbox="322 110 983 197">The device does not have an integrated standardized RJ45 socket to ensure ...</p> <ul data-bbox="322 134 958 197" style="list-style-type: none"> · that the device rests as flat as possible on the wall. · that no wall needs to be levered up. · that a strong and inflexible Cat.6 or Cat.7 installation cable can be used. <p data-bbox="322 225 994 264">Use only four wires (1, 2, 3 and 6) of a standard Network cable Cat.5 or better, coming from the Internet Router/PoE-Switch/PoE-Injector.</p> <p data-bbox="322 293 566 312">Cat.5 / Cat.6 Network cable</p> <ul data-bbox="191 320 947 427" style="list-style-type: none">  T+ White and orange network cable wire (Number 1, Transmit Data +)  T- Orange network cable wire (Number 2, Transmit Data -)  R+ White and green network cable wire (Number 3, Receive Data +)  R- Green network cable wire (Number 6, Receive Data -) <p data-bbox="322 453 676 472">Cat.7 Network cable (Installation cable)</p> <ul data-bbox="191 488 1034 612" style="list-style-type: none">  T+ White network cable wire from pair "orange/white" (Number 1, Transmit Data +)  T- Orange network cable wire from pair "orange/white" (Number 2, Transmit Data -)  R+ White network cable wire from pair "green/white" (Number 3, Receive Data +)  R- Green network cable wire from pair "green/white" (Number 6, Receive Data -) <p data-bbox="322 639 1016 679">NOTICE Do not power the device simultaneously via the power supply from the power supply unit (mains adaptor) and the power supply via PoE.</p>

COM 1	Jack for authorized peripherals of Bird Home Automation which will be released in the future, e.g. keypad
CB 2	Jack for second call button.
CB 1	Jack for first call button.

NOTICE The jacks "CB1", "CB2" and "COM1" on the rear side of the Main Electrical Unit must only be used to connect components certified by Bird Home Automation.

NOTICE Please take care when connecting the cables and wires. Connecting the cables and wires the wrong way may damage the device. Wires without insulation material must not protrude out of the green screw connection terminal, it may lead to electrical short and damage the device.

8

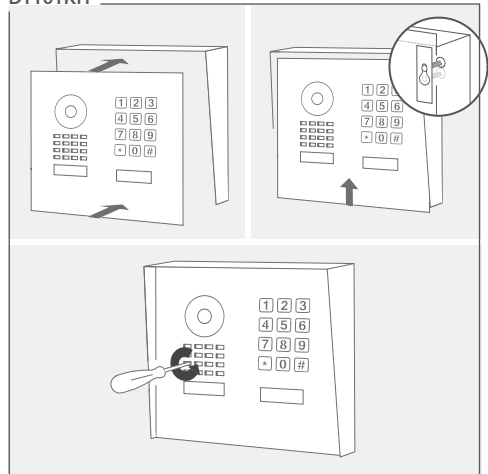

ASSEMBLE THE DEVICE TO THE MOUNTING HOUSING (BACKBOX)

Assemble the front panel with the attached Main Electrical Unit carefully using the screwdriver provided to the mounting housing.

D1101V & D1102V

D1101KH

Turn the safety screws clockwise until they are firmly tightened.

NOTICE Tighten the safety screws by hand only (less than 5 newton meter [Nm]), otherwise the Main Electrical Unit housing may be damaged.

If any of the black foam rubber gasket under the front panel protrudes, you can carefully press it in with the triangle tool provided in the small parts bag. Please do not press too hard, so that the gasket is not pressed too far into the inside of the housing and the unit will have a leak.

9

ACTIVATE THE DEVICE

If the device is to be supplied with power by a mains adapter, plug the power adapter of the device into a wall socket. If the device is to be powered via PoE, switch on the PoE-Switch/ PoE-Injector which is connected to the device. If the device is to be powered via DIN-rail power supply, switch on the DIN-rail power supply.

The Diagnostic-LED indicates whether the device is supplied with power. This LED lights up in green color a few seconds after you have connected the device to the power supply. The device is now ready for operation.

If the Diagnostic LED does not light up, please check the power supply. When using a wall-plug power supply and not PoE please check whether you have connected the positive pole and negative pole to the device correctly.

The device is ready for operation (booting up process, any software updates, etc.) once it has emitted a short diagnosis sound from the integrated loudspeaker. This may last for up to 5 minutes.

10

DOWNLOADING AND INSTALLING THE APP

Download the "DoorBird" App by Bird Home Automation onto your mobile device from the Apple App Store or Google Play Store. You can always find the most up-to-date version of the App manual on www.doorbird.com/support

If you use WiFi for connecting the device to your Internet Router, first go to the DoorBird App > "WiFi Setup" and follow the instructions.

If you have finished the WiFi setup or have connected the device to your Internet Router by means of a network cable, go to the DoorBird App > "Add device" and click on the QR code icon in the "User" field. Scan the user QR code found on the "Digital Passport" provided with the device.

If you have problems adding the device to the App please check if the device is online (www.doorbird.com/checkonline). If the device is not online, please check the WiFi or network cable connection again.

DIAGNOSTIC-LED

You can see if the device is powered by checking the Diagnostic LEDs, which lights up a few seconds after the power is connected.

The Diagnostic-LED is designed to illuminate only slightly.

DIAGNOSTIC-SOUNDS

After around one minute, the device emits brief diagnostic sounds after it has been connected to power supply / network / internet.

LENS

The product uses a straightened Wide-Eye hemispheric lens (HD). Due to the wide angle of coverage (horizontal, vertical, diagonal), a small edge may appear in the corners of the image as well as reflections in the image from the surface of the front of the unit.

MOTION SENSOR

The device has a built-in Motion Sensor with 4D Technology. You can use it for numerous applications, e. g. to send an alarm to a mobile device or to switch a relay to turn on an outdoor light.

The adjustable distance is optimized for a 1.75m (69 in) tall 70kg (165 lbs) person in a free environment. The accuracy of the distance of the motion sensor can vary depending on the environment.

BLUETOOTH TRANSCEIVER

The device has a built-in Bluetooth® transceiver. We will add further functionality for interesting applications soon. Please check our company news blog or the latest version of this manual at www.doorbird.com/support for updates.

API

The device features a well documented API for third-party integration. For information, terms and conditions see www.doorbird.com/api

DOORBIRD CONNECT

The device features many options to integrate it into third-party applications. For information, terms and conditions see www.doorbird.com/connect

CHANGING THE LABEL OF A CALL BUTTON NAMEPLATE

Applies only to devices with 1 and more illuminated call buttons with nameplate.

MAINTENANCE OF THE FRONT PANEL

Cleaning and maintenance instructions

All of our front panels are made of high-quality materials and are designed for a durable lifetime. Since door stations are usually installed in unprotected outdoor areas, they are exposed to adverse weather conditions and aggressive substances, especially close to frequently used roads, in coastal and industrial areas. Therefore, please consider the following care instructions. Unfortunately, we cannot accept any liability for damage if these instructions are not being observed. Aggressive dirt such as bird droppings should be removed as quickly as possible.

NOTICE Aggressive stains such as bird droppings should be removed as soon as possible.

NOTICE Never use abrasive detergents such as steel wool or scouring milk!

Warm water is usually sufficient, if necessary with a little detergent, a soft cloth or brush. Plastic parts (camera or name tags) must not be treated with metal care products. Remove all residues of cleaning agents or lubricants to avoid stains or discolouration after the maintenance.

Stainless Steel

Only high-quality stainless steel is used for all available DoorBird door stations. However, high-quality stainless steel can also rust, as approx. 70 % of stainless steel is made of iron. Rust resistance is only achieved by a protective layer (also called passive layer), which covers the iron like a skin. This protective layer consists essentially of chromium and other precious metals.

Iron particles, grinding dust and chips deposited on stainless steel can lead to corrosion (rust film). These iron particles can be found everywhere, but especially in coastal and industrial areas and close to frequently

used roads. Please remove ferrous deposits immediately, as they will attack your door station and lead to real rust if not removed. To remove rust, simply wipe off the dust; in addition, a care product is recommended, e.g. WD 40, available e.g. at Amazon for less than € 5.00. Simply apply in a thin layer and rub in. The same applies if rust appears on the engravings on the stainless steel surface.

Cement or lime splashes should be carefully removed as soon as possible with a wooden spatula before hardening.

The following cleaning detergents are not to be used as they reduce corrosion resistance:

- products containing chloride and hydrochloric acid
- Bleach (in case of accidental use, rinse thoroughly with water)
- Silver polish

After the cleaning with clear water wipe with damp cloth and rub dry to avoid lime traces. Lime residues can be avoided by using demineralised water.

Stainless steel PVD coated

PVD coated, chrome-plated or gold-plated surfaces are recommended to be cleaned with a grease-dissolving detergent and clear water or with a clean and dust-free microfibre cloth. For high-gloss surfaces, use a scratch-free cloth (e.g. cleaning cloth for glasses, furniture polishing cloth, etc.).

Lacquered surfaces

Clean painted surfaces and lettering with a soft, scratch-free cloth moistened with a mild soap solution (e.g. cleaning cloth for glasses, furniture polishing cloth, etc.). To prevent stains or discolouration, the detergents should be wiped off without leaving any residue. Be particularly careful with lettering in order not to damage the film or the print.

TROUBLESHOOTING

The device does not power up

If the device is to be supplied with power by a mains adapter, plug the power adapter of the device into a wall socket. If the power adapter was already plugged into a wall socket, check if the cables and wires are correctly connected to the screw connection terminal. In most cases, removing the cable and wires from the screw connection terminal plug and reconnecting them to the screw connection terminal plug helps (loose contact). If you are powering more than one device simultaneously with one mains adapter, check if the mains adapter is able to deliver enough power over the full cable length.

If the device is to be powered via PoE, switch on the PoE-Switch/ PoE-Injector which is connected to the device. If the PoE-Switch/ PoE-Injector was already switched on, check if the cables and wires are correctly connected screw connection terminal. In most cases, removing the cable and wires from the screw connection terminal plug and reconnecting them to the screw connection terminal plug helps (loose contact). If the problem still exists, please check if your PoE-Switch / PoE Injector supports the PoE Standard IEEE 802.3af Mode A, see also www.doorbird.com/poe

If the device is to be supplied with power by a DIN-rail power supply, switch on the DIN-rail power supply. If the DIN-rail power supply was already switched on, check if the cables and wires are correctly connected to the screw connection terminal. In most cases, removing the cable and wires from the screw connection terminal plug and reconnecting them to the screw connection terminal plug helps (loose contact). If you are powering more than one device simultaneously with one DIN-rail power supply, check if the DIN-rail power supply is able to deliver enough power over the full cable length.

The device does not connect to network via network cable (“No Network” diagnosis sound)

In most cases, removing the cable and wires from the screw connection terminal plug and reconnecting them to the screw connection terminal plug helps (loose contact). If the problem still exists, please check if the network cable is properly connected to your router / switch and the network cable is not broken.

If the problem still exists, please check if your Router has DHCP turned on and is able to assign an IP address to the device.

The device does not connect to Internet (“No Internet” diagnosis sound)

In most cases, your Internet is down or your router blocks Internet access for the device. Please see www.doorbird.com/downloads/ports.pdf

If the problem still exists, please check if your Router has DHCP turned on and is able to assign an IP address to the device.

The device does not connect to Internet

In most cases, your Internet is down or your router blocks Internet access for the device. Please see www.doorbird.com/downloads/ports.pdf

LEGAL NOTES

General remarks

1. DoorBird is a registered trademark of Bird Home Automation GmbH.
2. Apple, the Apple logo, Mac, Mac OS, Macintosh, iPad, Multi-Touch, iOS, iPhone and iPod touch are trademarks of Apple Inc.
3. Google, Android and Google Play are trademarks of Google, Inc.
4. The Bluetooth® word mark and logos are registered trademarks of Bluetooth SIG, Inc.
5. All other company and product names may be trademarks of the respective companies with which they are associated.
6. We reserve the right to make changes to our products in the interests of technical advancement. The products shown may also look different from the products supplied based on ongoing enhancement.
7. Reproducing or using texts, illustrations and photos from this instruction manual in any media - even if only in the form of excerpts - shall only be permitted with our express written consent.
8. The design of this manual is subject to copyright protection. We do not accept any liability for any errors or any erroneous content or printing errors (even in the case of technical specifications or within graphics and technical sketches).
9. Our products are in compliance with all technical guidelines, electrical and telecommunications regulations applicable in Germany, the EU and the USA.

Data privacy and data security

1. For maximum security, the device uses the same encryption technologies as are used in online banking. For your security, no port forwarding or DynDNS is used either.
2. The data centre location for remote access over the Internet by means of an App is obligatory in the EU if the determined Internet IP-Address location of the device is within the EU. The data centre is operated in line with the most stringent security standards.
3. Video, audio and any other surveillance methods can be regulated by laws that vary from country to country. Check the laws in your local region before installing and using this device for surveillance purposes.

If the device is a door-, indoor station or camera:

- In many countries video and voice signal may only be transmitted once a visitor has rung the bell (data privacy, configurable in the App).
- Please carry out the mounting in such a way that the detection range of the camera limits the device exclusively to the immediate entrance area.
- The device may come with a visitor history and motion sensor. You can activate/deactivate this function if required.

If necessary, indicate the presence of the device in a suitable place and in a suitable form.

Please observe any relevant country-specific statutory regulations concerning the use of surveillance components and surveillance cameras applicable at the installation site.

Check with the property owner and your house community if you are allowed to install and use this product. Bird Home Automation GmbH cannot be held responsible for any miss-use or miss-configuration of this product, including the unauthorized opening of a door.

Bird Home Automation cannot be held responsible for damages caused by improper existing installations or improper installation.

Software and operating system's updates (so-called "firmware updates") are generally automatically installed on the products of Bird Home Automation GmbH via Internet, if technically possible. Automatic firmware updates keep the products' software up to date so that they always work reliably, safely and efficiently. Through further development, features can be added, extended or slightly changed. Major changes or limitations to existing features will generally occur if Bird Home Automation GmbH deems it necessary (e.g. for data protection, data security or stability reasons, or to keep them up to date). When a firmware update is available, Bird Home Automation GmbH's servers generally automatically distribute it to all compatible products connected to the Internet or Bird Home Automation GmbH's servers. This process is gradual and can take several weeks. As soon as a product receives a firmware update, the system will be installed and will restart by itself. Installed firmware updates cannot be undone. Since the products and software of Bird Home Automation GmbH are not explicitly customer-specific

products, a customer cannot deny an automatic update if the product is connected to the Internet or to the Bird Home Automation GmbH's server.

Instructions for disposal

Do not dispose of the device with regular domestic waste. Electronic equipment must be disposed e.g. at local collection points for waste electronic equipment in compliance with the Waste Electrical and Electronic Equipment Directive.

INSTALLATIONSANLEITUNG

Lesen Sie diese Anleitung sorgfältig, bevor Sie die Komponenten in Betrieb nehmen. Bewahren Sie die Anleitung zum späteren Nachschlagen auf!

Wenn Sie das Gerät anderen Personen zur Nutzung überlassen, übergeben Sie auch diese Bedienungsanleitung.

Die stets aktuelle Version der Installationsanleitung finden Sie unter www.doorbird.com/de/support

Zur Vereinfachung der Begriffe verwenden wir „Gerät“ für das Produkt „IP Video Türstation D11x“ sowie „mobiles Endgerät“ für ein Smartphone/Tablet.

Haftung

Die Erstellung dieses Dokuments wurde sorgfältig vorbereitet. Bitte informieren Sie Bird Home Automation GmbH über etwaige Ungenauigkeiten oder Unterlassungen. Bird Home Automation GmbH kann nicht für technische oder typografische Fehler verantwortlich gemacht werden und behält sich das Recht vor, Änderungen an dem Produkt und den Handbüchern ohne vorherige Ankündigung vorzunehmen. Bird Home Automation GmbH übernimmt keinerlei Garantie in Bezug auf das in diesem Dokument enthaltene Material, einschließlich, aber nicht beschränkt auf die implizierten Garantien der Marktgängigkeit und Eignung für einen bestimmten Zweck. Bird Home Automation GmbH haftet nicht für Neben- oder Folgeschäden im Zusammenhang mit der Bereitstellung, Durchführung oder Verwendung dieses Materials. Das Gerät darf nur für den vorgesehenen Zweck verwendet werden.

Gerätemodifikationen

Dieses Gerät muss in Übereinstimmung mit den Anweisungen in der Installationsanleitung installiert und verwendet werden. Dieses Gerät enthält keine vom Benutzer zu wartenden Komponenten. Durch unbefugte Gerätemodifikationen oder Änderungen erlöschen alle anwendbaren Zertifizierungen und Zulassungen.

Verwendete Symbole

Achtung: Weist auf eine gefährliche Situation hin, die, falls nicht verhindert, zum Tod oder schweren Verletzungen führt.

Warnung: Weist auf eine gefährliche Situation hin, welche, falls nicht verhindert, zum Tod oder schweren Verletzungen führen kann.

Vorsicht: Weist auf eine gefährliche Situation hin, welche, falls nicht verhindert, zu geringfügiger oder mäßiger Verletzung führen kann.

Bitte beachten: Weist auf eine gefährliche Situation hin, welche, falls nicht verhindert, zu Sachschäden führen kann.

Wichtig: Weist auf wichtige Informationen hin, die den richtigen Betrieb des Produkts gewährleisten.

Hinweis: Weist auf nützliche Informationen hin, die die optimale Verwendung des Geräts unterstützen.

Gefahrenhinweise

WARNUNG

- Einbau, Montage und Servicearbeiten elektrischer Geräte dürfen ausschließlich durch eine Elektrofachkraft erfolgen. Bei Nichtbeachten besteht die Gefahr schwerer gesundheitlicher Schäden oder Lebensgefahr durch elektrische Stromschläge.
- Geräte mit 110-240 V Anschluss: Das Gerät darf nur an eine leicht zugängliche Netz-Steckdose angeschlossen werden. Bei Gefahr ist der Netzstecker zu ziehen.
- Benutzen Sie für die Stromversorgung des Gerätes ausschließlich das mitgelieferte Originalnetzteil oder einen in dieser Anleitung empfohlenen PoE-Switch/PoE-Injektor (sofern das Gerät PoE unterstützt).
- Durch elektrostatische Aufladung kann bei direktem Kontakt mit der Leiterplatte das Gerät zerstört werden. Vermeiden Sie daher ein direktes Berühren der Leiterplatte zu jeder Zeit.
- Norm EN 60065 bzw. EN 60950 bzw. EN 62368 beachten.
- Verwenden Sie das Gerät nicht, wenn es von außen erkennbare Schäden z. B. am Gehäuse, an Bedienelementen oder an den Anschlussbuchsen bzw. eine Funktionsstörung aufweist. Im Zweifelsfall lassen Sie das Gerät von einer autorisierten Fachkraft prüfen.
- Öffnen Sie das Gerät nicht. In solchen Fällen erlischt jeder Gewährleistungsanspruch! Für Folgeschäden übernehmen wir keine Haftung! Das Gerät enthält keine durch den Anwender zu wartenden Teile. Im Fehlerfall lassen Sie das Gerät von einer autorisierten Fachkraft prüfen.
- Aus Sicherheits-, Zulassungs- und Lizenzgründen (CE/FCC/IC etc.) ist das eigenmächtige Umbauen und/oder Verändern des Gerätes nicht gestattet.
- Das Gerät ist kein Spielzeug! Erlauben Sie Kindern nicht damit zu spielen. Lassen Sie das Verpackungsmaterial nicht achtlos liegen.

WARNUNG

- Plastikfolien/-tüten, Styroporsteile etc. können für Kinder zu einem gefährlichen Spielzeug werden.
- Verlegen Sie Kabel stets so, dass diese keine Gefährdungen für Menschen und Haustiere darstellen.
 - An Teilen im Gerät liegt Spannung an. Berühren Sie keine Teile, die nicht mit der Installation, der Verdrahtung oder dem Anschluss verbunden sind. Elektrische Stromschläge können die Folge sein.
 - Halten Sie die Geräte von Wasser oder anderen Flüssigkeiten fern, die nicht als wetterfest gekennzeichnet sind.
 - Führen Sie keine Installation durch und stellen Sie keine Verbindungen her, während die Stromversorgung eingeschaltet ist. Beschädigungen am Gerät oder elektrische Stromschläge können die Folge sein.
 - Bevor Sie die Stromversorgung einschalten, stellen Sie sicher, dass die Drähte nicht gekreuzt oder kurzgeschlossen sind. Feuer oder elektrische Stromschläge können die Folge sein.
 - Hochspannung kann intern vorhanden sein. Öffnen Sie das Gerät nicht. Elektrische Stromschläge können die Folge sein.
 - Das Gerät ist nicht explosionsgeschützt. Nicht in der Nähe von Gasen oder brennbaren Materialien installieren oder verwenden. Feuer oder Explosion können entstehen.
 - Installieren Sie nicht zwei Stromversorgungen parallel zu einem einzigen Eingang. Feuer oder Beschädigung des Gerätes können entstehen. Achten Sie darauf, nur ein einziges Netzteil an das Gerät anzuschließen.
 - Schließen Sie keinen Anschluss am Gerät an eine Netzstromleitung an. Feuer oder elektrische Stromschläge können die Folge sein.
 - Stellen Sie sicher, dass das Netzkabel nicht beschädigt oder gequetscht ist. Wenn das Netzkabel gebrochen ist, kann es zu einem Brand oder elektrischen Stromschlag kommen.
 - Nichts mit nassen Händen anstecken oder abziehen. Elektrische Stromschläge können die Folge sein.
 - Führen Sie kein Metall oder brennbares Material in das Gerät. Feuer, elektrische Stromschläge oder Gerätestörungen können die Folge sein.
 - Bestehende Verdrahtungen wie Türgongverdrahtung usw. können Hochspannungs-Wechselstrom enthalten. Schäden am Gerät oder elektrische Stromschläge können auftreten. Die Verdrahtung und Installation muss von einem qualifizierten Elektriker durchgeführt werden.
- Gerätemontage an Wand oder Decke: Vermeiden Sie Installationsorte, an denen das Gerät Erschütterungen oder Stößen ausgesetzt ist.
 - Bei Geräten mit Erdungsklemmen muss eine Erdung angeschlossen werden. Feuer oder Gerätestörungen können die Folge sein.
 - Bei Geräten mit Kunststoffglas oder Echtglas, keinen hohen Druck auf das Glas ausüben. Bei Bruch kann es zu Verletzungen kommen.
 - Bei Geräten mit LCD, wenn LCD beschädigt ist, nicht mit dem Flüssigkristall in Kontakt kommen. Verletzungen können die Folge sein. Wenn nötig, spülen Sie den Mund aus, reinigen Sie Ihre Augen oder Haut mit klarem Wasser für mindestens 15 Minuten und wenden Sie sich an Ihren Arzt.
 - Bringen Sie nichts auf dem Gerät an und verdecken Sie das Gerät nicht mit einem Tuch, Silikon, Klebstoff, Farbe, separater Abdeckung etc. Es können Feuer- oder Gerätestörungen auftreten.
 - Installieren Sie das Gerät nicht an einer der folgenden Orte. Feuer, Stromschlag oder Gerätestörungen können die Folge sein.
 - Orte unter direktem Sonnenlicht oder Orte in der Nähe von Heizgeräten, die in der Temperatur variieren.
 - Orte mit Staub, Öl, Chemikalien, Schwefelwasserstoff (heiße Quellen).
 - Orte, die extremer Feuchtigkeit und Luftfeuchtigkeit ausgesetzt sind, wie Bäder, Keller, Gewächshäuser, etc.
 - Orte, an denen die Temperatur extrem niedrig ist, wie z. B. in einem gekühlten Bereich oder vor einer Klimaanlage.
 - Orte, die Dampf oder Rauch ausgesetzt sind (z.B. in der Nähe von Heiz- oder Kochflächen).
 - Orte, an denen Geräusch erzeugende Geräte wie Dimmschalter oder Wechselrichter-Elektrogeräte in unmittelbarer Nähe sind.
 - Orte, die häufigen Vibrationen oder Stößen ausgesetzt sind.
 - Bei Geräten mit Gegensprechfunktion ist darauf zu achten, dass ein Anruftest durchgeführt wird, bei dem beide Gegensprechgeräte auf geringer Lautstärke eingestellt sind. Ein plötzlicher Anruf etc. kann ankommen und das Gehör schädigen.
 - Wenn das Gerät nicht ordnungsgemäß funktioniert, ziehen Sie den Netzstecker aus der Steckdose.
 - Alle Geräte, die nicht als wetterfest gekennzeichnet sind, sind nur für den Innenbereich konzipiert und nicht im Freien zu benutzen.

- Geräte, die als wetterfest gekennzeichnet sind, nicht mit Hochdruckwasser besprühen. Gerätestörungen können die Folge sein.
- Bei Sach- oder Personenschäden, die durch unsachgemäße Handhabung oder Nichtbeachten der Gefahrenhinweise verursacht werden, übernehmen wir keine Haftung. In solchen Fällen erlischt jeder Gewährleistungsanspruch! Für Folgeschäden übernehmen wir keine Haftung.

Sicherheitsanweisungen

- Die Verwendung des Geräts muss unter Beachtung der örtlich geltenden rechtlichen Bestimmungen erfolgen.
- Lagern Sie das Gerät in einer trockenen und belüfteten Umgebung.
- Achten Sie darauf, dass das Gerät weder Stößen noch starkem Druck ausgesetzt ist.
- Installieren Sie das Gerät nicht an instabilen Halterungen, Oberflächen oder Wänden. Stellen Sie sicher, dass das Material stabil genug ist, um das Gewicht des Geräts zu tragen.
- Verwenden Sie bei der Installation des Geräts ausschließlich passende Werkzeuge. Ein zu großer Kraftaufwand mit Werkzeugen kann das Gerät beschädigen.
- Verwenden Sie keine chemischen, ätzenden oder aerosolhaltigen Reinigungsmittel.
- Verwenden Sie zum Reinigen ein sauberes, trockenes Tuch.
- Verwenden Sie nur Zubehör, das den technischen Daten des Geräts entspricht. Dieses ist von Bird Home Automation GmbH erhältlich.
- Verwenden Sie ausschließlich Ersatzteile die von Bird Home Automation GmbH bereitgestellt oder empfohlen werden.
- Versuchen Sie nicht, das Gerät selbstständig zu reparieren. Wenden Sie sich bezüglich Reparatur und Wartung an Bird Home Automation GmbH.
- Halten Sie das Gerät mehr als 1 m (3,3') entfernt von Mikrowelle, Radio, TV, WLAN Router und anderen drahtlosen Geräten.
- Bei Geräten mit Gegensprechfunktion oder eingebautem Lautsprecher oder eingebautem Mikrofon oder Signalübertragungsfunktion, installieren Sie die Drähte mehr als 30 cm (12") entfernt von 100-240 V Wechselstromverdrahtung. Ansonsten können Wechselstrom-induzierte Geräusche und/oder Geräte-Störungen auftreten.
- Installieren Sie das Gerät in einem Bereich, der

für zukünftige Inspektionen, Reparaturen und Wartungen zugänglich ist.

- Wenn das Gerät in der Nähe eines Mobiltelefons verwendet wird, kann das Gerät gestört werden.
- Das Gerät kann beschädigt werden, wenn es fallen gelassen wird. Mit Vorsicht behandeln.
- Das Gerät wird während eines Stromausfalls außer Betrieb gesetzt.
- Bei Geräten mit Gegensprechfunktion oder eingebautem Lautsprecher oder eingebautem Mikrofon kann das Gerät in Bereichen, in denen Antennen von Mobilfunksendern, Radio- oder TV-Sendern in der Nähe sind, beeinträchtigt werden.
- Bei Geräten mit LCD-Bildschirm muss im Voraus darauf hingewiesen werden, dass bei einem LCD-Panel, obwohl es mit sehr hohen Präzisionstechniken hergestellt wird, unvermeidlich ein sehr kleiner Teil seiner Bildelemente nicht immer beleuchtet oder gar nicht beleuchtet wird. Dies gilt nicht als Gerätefehler.
- Bei Geräten mit Gegensprechfunktion können Umgebungsgeräusche um das Gerät herum eine reibungslose Kommunikation behindern. Dies ist keine Fehlfunktion.
- Bei Geräten mit Benutzername/Passwort ist der Anwender für den Zugriff mittels Benutzername/Passwort auf das Gerät verantwortlich. Vergewissern Sie sich ein Passwort zu verwenden, das von einem Dritten nicht leicht erraten werden kann. Wir empfehlen Ihnen, das Passwort regelmäßig zu ändern.
- Wir haften unter keinen Umständen für Schäden, die aufgrund von Fehlern in der Stromversorgung, Netzwerkgeräten oder Endgeräten auftreten; Ausfälle aufgrund von Internetanbietern und Mobilfunkanbietern; Ausfälle aufgrund von getrennten oder gestörten Leitungen und andere Übertragungsverluste, die es unmöglich machen, unseren Dienst zu erbringen, sowie allen anderen Ursachen die außerhalb unserer Verantwortung liegen; Oder, wenn während der Übertragung ein Fehler oder fehlende Daten auftreten.

Transport

Bei Bedarf transportieren Sie das Gerät in der Originalverpackung oder einer entsprechenden Verpackung, so dass Schäden vermieden werden.

Gewährleistung

Informationen zur Gewährleistung des Geräts finden Sie unter www.doorbird.com/de/warranty

KOMPONENTEN*

1x Elektrische Haupteinheit mit Ruftaste(n) und Frontblende

1x Montagerückgehäuse mit Wandmontagehalterung

1x Installationsanleitung

1x Quickstartanleitung mit Digital Passport

1x Bohrschablone

1x Wasserfestes A4 Laserdrucker-Papier für die Beschriftung einer Namensschildtaste

1x Steckernetzteil (110 - 240 V AC auf 15 V DC) mit 4 Landesadaptern

1x RJ45 Adapter

1x Grüner Schraubanschlussklemmenstecker

Kleinteile

* Die Zeichnungen in dieser Anleitung können optisch von ihrem erworbenen Produkt abweichen.

GERÄT MIT EINER RUFTASTE

Vorderseite

- 1) Frontblende
- 2) HDTV Video
- 3) Sicherheitsschrauben
- 4) Lichtsensor
Für den Nachtsichtmodus
- 5) Bluetooth-Transceiver
- 6) Lautsprecher
- 7) Mikrofon
- 8) 4D Bewegungssensor
- 9) Beleuchtete Ruftaste mit Namensschild

Innenseite

- 10) Diagnose LED
Leuchtet nach ein paar Sekunden auf nachdem das Gerät mit dem Strom verbunden wurde
- 11) Elektrische Haupteinheit
- 12) Schraubklemmenblock
- 13) Dichtung
- 14) Rückgehäuse mit Wandmontagehalterung

Das Unterputzmodell kann optisch abweichen.

GERÄT MIT 2 RUFTASTEN

Vorderseite

- 1) Frontblende
- 2) HDTV Video
- 3) Sicherheitsschrauben
- 4) Lichtsensor
- 5) Bluetooth-Transceiver
- 6) Lautsprecher
- 7) Mikrofon
- 8) 4D Bewegungssensor
- 9) Erste beleuchtete Ruftaste mit Namensschild
- 10) Zweite beleuchtete Ruftaste mit Namensschild

Innenseite

- 11) Diagnose LED
Leuchtet nach ein paar Sekunden auf nachdem das Gerät mit dem Strom verbunden wurde
- 12) Elektrische Haupteinheit
- 13) Schraubklemmenblock
- 14) Dichtung
- 15) Rückgehäuse mit Wandmontagehalterung

Das Unterputzmodell kann optisch abweichen.

GERÄT MIT KEYPADMODUL

Vorderseite

- 1) Frontblende
- 2) HDTV Video
- 3) Lautsprecher
- 4) Sicherheitsschrauben
- 5) Lichtsensor
- 6) Mikrofon
- 7) Bluetooth-Transceiver
- 8) 4D Bewegungssensor
- 9) Keypad Modul
Die Beleuchtung agiert auch gleichzeitig als Diagnose LED(s)
- 10) Beleuchtete Ruftaste „Modern“ (mit Namensschild) oder beleuchtete Ruftaste „Classic“ (rund)

Innenseite

- 11) Elektrische Haupteinheit
- 12) Diagnose LED
Leuchtet nach ein paar Sekunden auf nachdem das Gerät mit dem Strom verbunden wurde
- 13) Dichtung
- 14) Schraubklemmenblock
- 15) Halterung für 2-Draht Ethernet PoE Konverter A1071 (optional)
- 16) Rückgehäuse mit Wandmontagehalterung

Das Unterputzmodell kann optisch abweichen.

VIDEOS

Sie können sich durch die Installation mit unseren Installationsvideos auf www.doorbird.com/de/support begleiten lassen. In den Videos wird jeder Installations-schritt einzeln und gut dokumentiert dargestellt.

INSTALLATION

Alle folgenden Schritte sollten von einem fachkundigen Erwachsenen sorgsam und unter Berücksichtigung sämtlicher geltender Schutzvorschriften durchgeführt werden. Sollten Sie Fragen haben, wenden Sie sich bitte direkt an uns oder einen kompetenten Fachmann.

Achten Sie darauf, dass alle Drähte, die Sie für die Installation verwenden, über die gesamte Länge unbeschädigt und für die Verwendungsart zugelassen sind.

Netzwerkgeschwindigkeit und Netzwerkkomponenten

Stellen Sie sicher, dass Ihre Internetverbindung über mindestens 0,5 Mbit/s Uploadgeschwindigkeit verfügt. Sie können über die DoorBird App jederzeit auch einen Geschwindigkeitstest durchführen. Das Nutzererlebnis ist nur so gut wie die Netzwerkgeschwindigkeit, Netzwerkstabilität und Qualität Ihrer Netzwerkkomponenten, wie z.B. Ihr Internet Router und WLAN Access Points oder WLAN Repeater. Stellen Sie sicher, dass Ihre Netzwerkkomponenten nicht älter als zwei Jahre sind, von einem namhaften Hersteller gefertigt wurden und über die neuste Firmware verfügen. Sind diese Voraussetzungen nicht erfüllt, kann es z.B. dazu kommen, dass Audio- und Videoverbindungen schlecht sind oder Push-Nachrichten verzögert oder gar nicht auf Ihrem Smartphone oder Tablet ankommen.

Anforderungen:

High Speed Internet (Festnetz): DSL, Kabel oder Glasfaser

Netzwerk: Ethernet Netzwerk, mit DHCP

1

STROM ABSCHALTEN

Schalten Sie den Strom sämtlicher zum Montageort führenden Leitungen ab, d.h. z.B. den Strom für die Türstation, den Türgong, elektrischen Türöffner, PoE-Switch/PoE-Injektor etc.

2

DEMONTAGE DER BESTEHENDEN TÜRKLINGEL

Demontieren Sie, falls an der Hauswand bereits vorhanden, die bestehende Türklingel bzw. Türstation.

3

MONTAGEORT FESTLEGEN

Das Gerät verwendet eine hemisphärische Ultraweitwinkel Linse, so dass selbst bei einem minimalen Abstand der Person von 50 cm (19.68 in) zum Gerät eine geringe Montagehöhe ausreicht. Daher ist das Objektiv auch mechanisch nicht verstellbar. Die Kameralinse sollte sich auf einer Höhe von mindestens 145 cm (57 in) befinden. Sie sollten die korrekte Höhe vor der endgültigen Montage testen.

Nur bei D1101V und D1102V!

Alternativ sind Wandmontage-Kits mit einem Eck-Keil- (7.5° vertikal nach oben oder unten) und einem Eck-Winkel-Wandmontageadapter (45° horizontal, links oder rechts montierbar) für D1101V und D1102V separat erhältlich.

A8001 Eck-Keil-Wandmontageadapter (7.5° vertikal nach oben oder unten montierbar), separat erhältlich

A8002 Eck-Winkel-Wandmontageadapter (45° horizontal, links oder rechts montierbar), separat erhältlich

Bei der Auswahl des Montageortes sind die Lichtverhältnisse zu beachten. Vermeiden Sie direkte Sonneneinstrahlung, direkte Hintergrundbeleuchtung und reflektierende Oberflächen.

Setzen Sie das Gerät keinem direktem Sonnenlicht aus. Die Gehäusetemperatur kann die maximal zulässige Temperaturgrenze überschreiten. Dies kann zu Beschädigungen elektrischer und mechanischer Komponenten des Geräts und zu Verletzungen führen, insbesondere bei der Berührung von Außenteilen des Geräts. Weiße und helle silberfarbene Frontblenden absorbieren weniger Sonnenlicht als dunkle.

Ein Bildsensor darf keiner direkten Sonneneinstrahlung über längere Zeit ausgesetzt werden. Direkte Sonneneinstrahlung lässt die Kamera „erblinden“ und kann die kleinen Farbfilter auf dem Bildsensorchip dauerhaft beschädigen.

Ein durch direkte Sonneneinstrahlung hervorgerufener Defekt ist nicht von der Gewährleistung abgedeckt.

4

MONTAGE DES RÜCKGEHÄUSES

Das Produkt ist als Auf- und Unterputzvariante verfügbar. Bei der Unterputzvariante ist die Frontblende etwas größer, damit das Loch in der Wand besser abgedeckt ist und das Rückgehäuse besteht aus Plastik vollständig aus Metall. Wenn Sie das Unterputzgehäuse verwenden, bereiten Sie eine Aussparung in der Wand vor.

Wenn die Hauswand nicht aus Holz besteht, bohren Sie gemäß der Bohrschablone Dübellöcher mit einem Durchmesser von 5 mm in die Wand und setzen Sie die mitgelieferten Dübel ein.

Wenn die Wand aus Holz besteht, sind üblicherweise keine Dübel erforderlich. Für die Montage des Geräts auf einer Isolierwand gibt es spezielle Dübel, z.B. Fischer Isolierdübel.

Wenn Sie Löcher bohren, Schrauben setzen oder eine Wand aufbrechen, achten Sie darauf, dass sich keine Kabel oder Leitungen (Gas, Wasser usw.) dahinter befinden.

4.1 Entfernen der Frontblende

Entfernen Sie die Frontblende mit der Haupteinheit vorsichtig mit dem mitgelieferten Schraubendreher vom Montagerückgehäuse.

Die Frontplatte und die Sicherheitsschrauben sind so konstruiert, dass sie nicht aus der Frontplatte herausgeschraubt werden können. Dadurch fallen sie bei der Montage nicht heraus/können abhanden.

D1101V & D1102V

Drehen Sie die Sicherheitsschrauben gegen den Uhrzeigersinn, bis sie sich lösen.

Ziehen Sie die Frontplatte mit der elektrischen Haupteinheit aus dem Montagerückgehäuse heraus.

D1101KH

Drehen Sie die Sicherheitsschrauben gegen den Uhrzeigersinn, bis sie sich lösen.

Ziehen Sie die Frontblende nach unten

Ziehen Sie die Frontblende zu sich heran.

4.2 Montage

Führen Sie alle Kabel und Drähte, die sie verbinden möchten durch das Montagegehäuse. Schrauben Sie die Wandmontagehalterung des Montagegehäuses an die Wand.
